When your spirit needs some stimulating +
empowering vibes and we do this by tapping into your
core nature to uplift, support and nurture the primary
vessels within your body. Vedic marma points, similar
to Chinese meridian points on the face + scalp are
being stimulated to release toxins and things like
emotional baggage. This increases circulation and
opens up space inside the cranium, making room for
more wholesome things in your life. If I may add,
you're also getting stoned by a gua sha face massage.

The Confession \$80
(caring for complex + problematic skin) 50mins

Believe it or not, your face tells it all! Whether you've
got a situation with Acne + Anti-aging + Skin
Disorders there's a natural way to soothe your bumps
back to balance. We aim to harmonize your skin's
condition by getting to the root of the problem. Our
diet and lifestyle usually contribute to our situation yet
it is not our fault and by learning what that is, we can
transform our skin care mantra which leads to an oddly
satisfying result.
