

Pallavi Rubber Products

TO STAY COMPETITIVE BY UTILIZING INNOVATIVE TECHNOLOGY

"Leading Innovator in Custom Rubber and Thermoplastic Solutions: Molded Anti-Vibrations, Mounts, Buffers, Dampers, Suspensions, and More for Railways and Roadways"

Product Name: ELASTIC JOINT (PASSENGER COACH)

Product Description:

The Elastic Joint transmits braking and acceleration forces in the X direction between the bogie pin and the frame, significantly affecting travel comfort. It also compensates for relative movement in the Z and Y directions, handling vertical and transverse suspension under varied weather and dusty environments.

Product Application:

Rubber to Metal Bonded Torsion Block for dynamic applications in railway systems.

Specifications:

- Working Load Range: 4000 Kg (Axial), 14600 Kg (Radial), 4° (Torsion)
- Working Temperature Range: -10°C to 60°C (customizable)

Primarily Use In LHB Coaches with FIAT-SIG Bogies
