

# Windshield for Club Car Precedent Installation Instructions

Windshield

2 Strut Brackets

2 Hardware Assemblies

Note: When unpacking windshield, do not remove protective covering with a scraper, razor blade or other tool that may scratch the windshield.

1. Attach Strut Bracket on Driver Side Windshield Strut. Position Bracket 1/4" above hole. ➡

2. Attach Strut Bracket to Passenger side of Windshield as shown.

3. Disassemble hardware. Insert rubber grommets in Windshield notches as shown.

4. Attach Windshield to Struts, lining up rubber grommets to holes in Windshield Struts.

5. Attach hardware through holes in Windshield Struts as shown.

6. To secure windshield when unfolded, use clamps on upper portion of windshield.

7. Squeaking may occur, caused by friction between windshield and strut bracket. Application of a spray lubricant (such as WD-40) down channel of Windshield Strut Bracket, should minimize this.
