

EVER BAMBOO®

A perfect replica of natural bamboo

TAKE GAKI

Natural bamboo and traditional craftsmanship

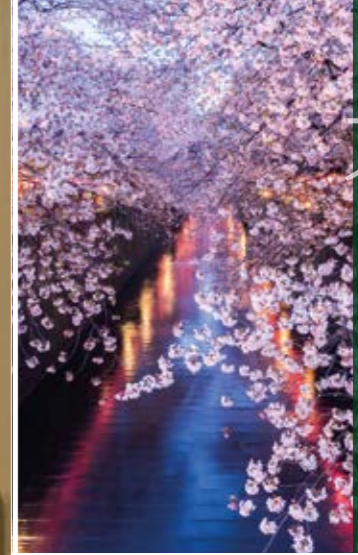

HIGHLY
AUTHENTIC

QUALITY
FROM JAPAN

*The essence
of Japan*

和
の
趣

Invite a beautiful
seasonal breeze
to the home.

春

SPRING

The gentle fragrance of a flower beginning to open in the garden, spring is already here.

夏

SUMMER

Breeze is like peace, a swaying song it sings, drifting away in the summer wind, dancing across green fields.

秋

AUTUMN

Time is filled with a hurried dusk. The trees begin to colour and foretell the deeper seasons.

冬

WINTER

Trees spread their roots to the earth and people expand their minds to the new season.

5th ROOM®

Concepts and products for your building and garden

There are many encounters with the environment around buildings for every person every day. People meet fellow human beings or enjoy the connection with nature in the garden. In Takasho's product world, these areas form the "5th ROOM" as an important part of the daily living space, alongside the living areas with kitchen, living room, dining room and bedroom.

Through the harmonious arrangement of the "5th ROOM", from the entrance area to façade and fence elements or rooms in the garden to the atmospheric lighting, all 5 senses of residents and guests are addressed. This creates an atmosphere that invites people to

spend time there by day and by night and fosters a state of well-being.

Inspired by Japanese garden culture with the meaning of the seasons and the elements of wind, light, water and greenery, Takasho has developed a range of matching products for this purpose, which can be ideally combined with each other, especially in the combination of building and garden design.

Takasho supports architects, planners and end customers from the very beginning in the development of suitable harmonious overall concepts to the execution of elegant solutions.

The product series

- EVER ART WOOD®**
Laminated aluminium profiles
- EVER ART BOARD®**
Laminated aluminium composite panels

10 YEARS WARRANTY

- on 1. the fading of the colour
- and 2. to the cracking of the panels

EVER BAMBOO®

EVER BAMBOO® combines the benefits of the latest technology and materials with the proven techniques of traditional craftsmanship. This gives the panels made of specially reinforced ASA resin numerous advantages that enable a wide range of applications. At the same time, the atmosphere of natural bamboo is preserved.

Durability

The high quality of EVER BAMBOO® ensures that the finish of the surfaces is not affected by temperature changes, rain and sunlight.

Texture

The three-dimensional structure creates subtle shadows and a surface that is close to nature.

Material

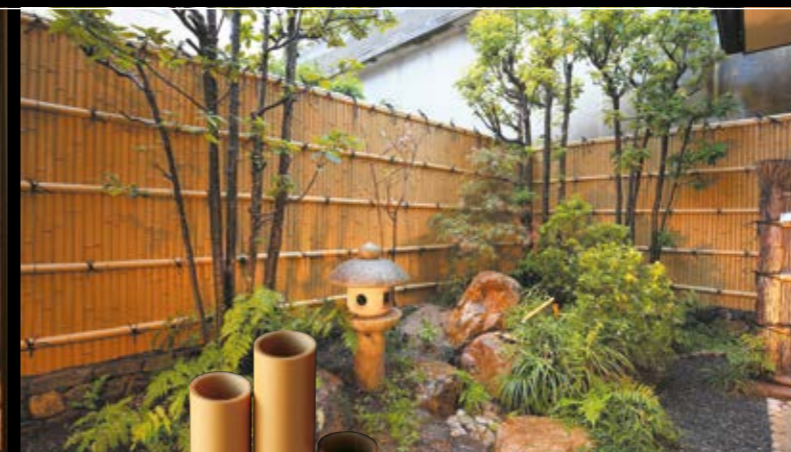

The strong material guarantees maximum stability and lasting weather resistance.

Design

The finishing touches are perfected by hand without any compromise on detail.

DELUXE ARTISAN BAMBOO

Like with our "ECO BAMBOO", we have faithfully recreated the expressiveness of natural bamboo while incorporating the techniques of traditional artisan craftsmen, culminating in our "DELUXE ARTISAN BAMBOO". The character of each individual bamboo section and knot is replicated here in an impressive way.

ECO BAMBOO DELUXE

The wonderful characteristics of natural bamboo are faithfully reproduced using environmentally friendly materials. The special expression of each individual section is meticulously portrayed from beginning to finish. Certain sections of the bamboo have been finished by hand by our craftsmen, to deliver a perfect replica of natural bamboo.

ECO BAMBOO

黒竹

Black

The toned black lines of Black Bamboo create a polished, crisp impression. Subdued and tasteful, yet with a contemporary, modern feel. Takasho panels deliver deep, delicate colours and rhythmical three-dimensional textures. Every beautiful detail has been carefully replicated.

Sarashi

さらし

Takasho's careful attention to detail is thoroughly demonstrated in the shape, form, and colour tones of our bamboo. In particular, the multihued colour tones of the bamboo add a sense of subdued refinement known as "Wabi-Sabi." Takasho is proud of the techniques that we have refined and perfected over many years, culminating in the most realistic bamboo reproductions available on the market.

EVER BAMBOO® will never compromise

in its commitment to detail.

Antique

古竹

Our Antique Bamboo panels have been carefully created to reproduce the seasoned appearance of aged bamboo, which would usually take many years to achieve. In comparison to Yellow Bamboo, Antique Bamboo adds an extra depth of flavour to create a highly dignified space of understated beauty.

あじろ Ajiro

Distinctive yet delicate young bamboo shoots have been woven together to create beautiful shadows that resonate with depth of colour. From whichever angle you view the panels, the three dimensional shape of the carefully wickered bamboo emits soft shadows and subtly changing colours, to create a feeling of unique elegance and luxury. Our Ajiro panels are a faithful reproduction of this ornate pattern with all its subtleties.

Natural colours

The variety of colour tones is faithfully made to match different types of bamboo. Surfaces aged by wind and weather can also be reproduced, as can bamboo that has been refined using traditional methods.

Realistic surfaces

The bamboo structure is shaped with great attention to detail and precision, following nature's example. Three-dimensional and hand-painted details create the special natural impression of the EVER BAMBOO® series.

Classic themes

With a wide range of traditional patterns, EVER BAMBOO® panels offer numerous design options for classic or also modern Japanese-style gardens.

EVER BAMBOO®

EVER BAMBOO® MATERIAL

Beautiful natural appearance

A bamboo fence is an essential part of any traditional Japanese garden. However, it can be difficult to preserve the beauty of real bamboo. To overcome these difficulties, we have developed our EVER BAMBOO® product range, which meets all requirements while offering good resistance to mould, corrosion and discolouration and therefore preserves its beauty permanently.

Subtle 3D contours

The three-dimensional textures create fine contours that set beautiful accents on the surface of the bamboo fence that change with the movement of the light.

Realistic section knots

The unique texture and surface of natural bamboo is carefully reproduced to faithfully reflect the fine grain and characteristics. Each individual piece of bamboo embodies its own rich expression, representing sophisticated emotion and harmony.

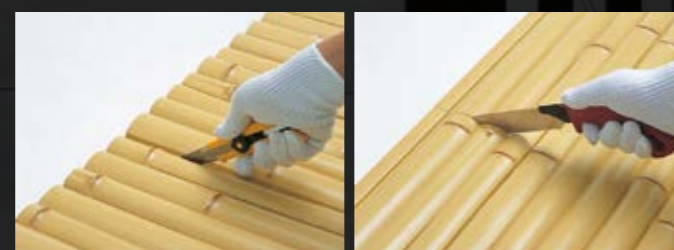

Durable and sustainable

EVER BAMBOO® incorporates recyclable special reinforced ASA resin as a raw material, which is friendly to the global environment. This special material is durable against rain and sunlight, giving resistance to corrosion and discolouration, and features a proven longevity.

Highly workable

Extremely robust and at the same time pliable and flexible for easy handling and processing.

EVER BAMBOO® MATERIAL

With the excellent material properties of our sticks, unique fences are completely freely constructible, just like with natural bamboo.

Premium Details

Each sectioned knot is uniquely different to deliver a beautiful, natural appearance. Choose from our highest-quality DELUXE **ARTISAN BAMBOO** with hand-painted section joints, our DELUXE **ECO BAMBOO**, also with finely crafted section joints, or our Standard **ECO BAMBOO**, which delivers excellent cost performance.

Superior technique

Three-dimensional surfaces of the sticks create subtle shadows. The ASA and ABS resins used make the material strong, light and durable at the same time. Our products are also environmentally friendly as they contain no polyvinyl chloride (PVC).

Highly realistic

The beautiful texture and feel of natural bamboo has been carefully perfected to faithfully reproduce every fine grain and characteristic.

EVER BAMBOO®

We have carried on the timeless techniques of tradition Kyoto craftsmen to create elegant product solutions that replicate the look of the natural bamboo fences and decorations.

EVER BAMBOO® SET

EVER BAMBOO®

We have carried on the timeless techniques of tradition Kyoto craftsmen to create elegant product solutions that replicate the look of the natural bamboo fences and decorations.

All inclusive assembly kit

All components needed to create a fantastic bamboo fence are processed and packed as a set.

Modular system

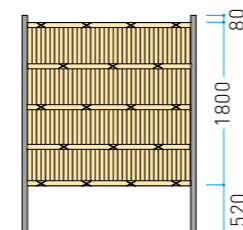

Depending on your needs, mounting sets are available for two different module types: The 'base' type, with two posts, is suitable for installation as a free stand-alone fence element, while the 'extension' type is used to expand your fence to the desired length. We offer a choice of single or double panelled versions for the modules. Select the type that best suits your design.

Visible & covered posts

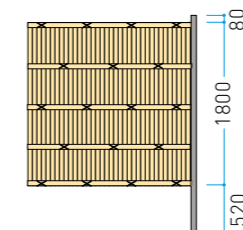

Select from either visible posts or covered posts in accordance with the spatial clarity and continuity of your fence design.

TAKE GAKI PRODUCT SERIES

TAKE GAKI

Traditional techniques and craftsmanship create individual products of unique beauty from natural bamboo.

The fusion of carefully selected natural materials and traditional craftsmanship produces products of unique beauty in premium quality.

The noble surface with its special expressiveness is created piece by piece in meticulous manual work by our craftsmen in Japan.

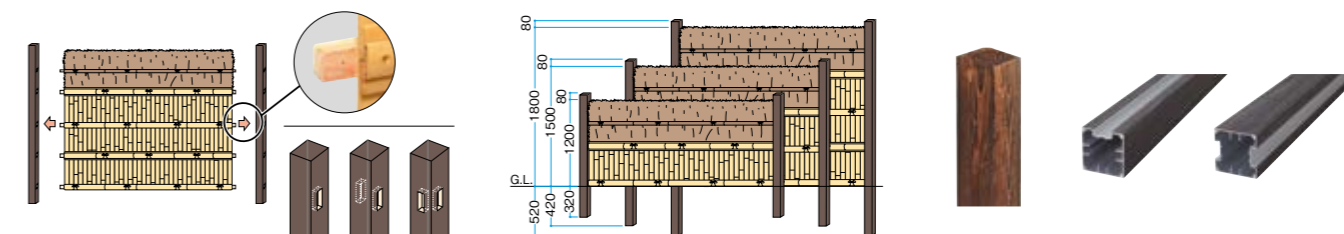

Already single modules are perfectly suitable as accents in the landscape of your garden. All TAKE GAKI products can be ordered from just one unit, while configurations according to your wishes are always possible.

Material and colours

Colour variance and deviations may occur

Modular system

Modular construction for easy assembly

The panels, which are prefabricated by hand, can be simply attached to the end, connecting or corner posts required in each case.

Available in 3 standard heights

With the three available versions in 1200, 1500 and 1800 mm, the fence can be optimally adapted to the surroundings.

Posts made of natural wood or aluminium

The material should be chosen to complement the atmosphere of the property and the surroundings.

Individual dimensions are also possible on request.

Posts and frames are made of very durable and weather-resistant aluminium with a natural bamboo texture.

There are numerous grains and colours to choose from for the textures.

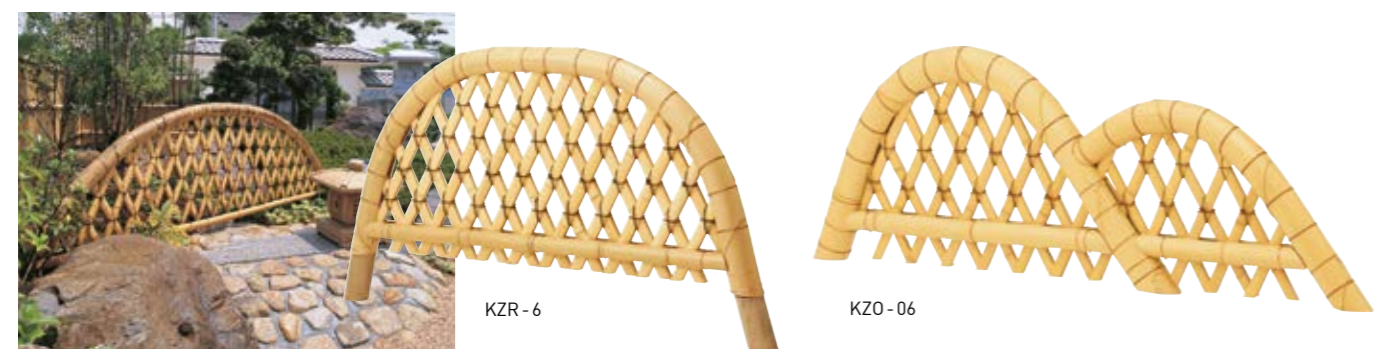

TAKE GAKI PRODUCT SERIES

Natural Koetsuji fence

Exact dimensions on request.

Natural Kuzuryu fence

Natural Kuzuryu-fence

Default dimensions: W 1800 - 3000 x H 800 - 1300 mm
Exact dimensions and individual sizes available on request.

Kuzuryu-fence (parent and child type) with embedding

Default dimensions: W 1800 - 3000 x H 600 - 1000 mm
Exact dimensions and individual sizes available on request.

Bamboo & Wood Garden Doors

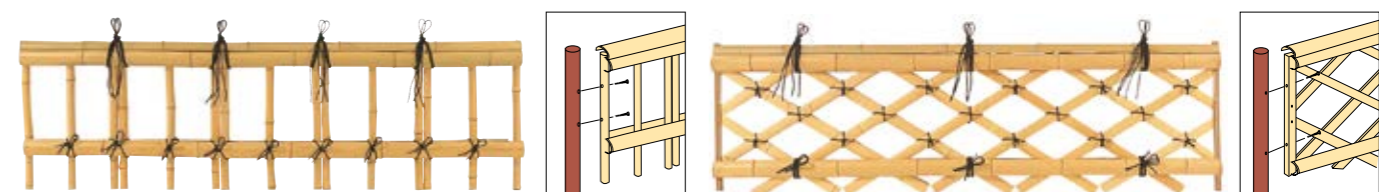

Bamboo branch garden doors

Default dimensions: W 600 - 750 x H 1050 mm
Exact dimensions and individual sizes available on request.

Bamboo and wood garden doors

Default dimensions: W 600 - 750 x H 900 - 1300 mm
Exact dimensions and individual sizes available on request.

Low garden fences

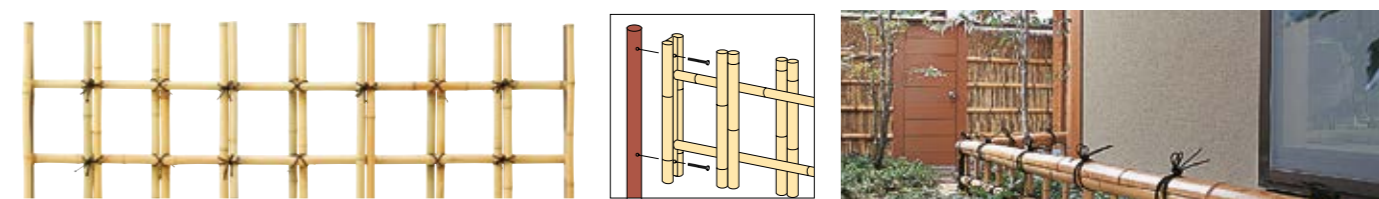

Natural Kinkakuji fence

Default dimensions: W 1800 x H 600/900 mm

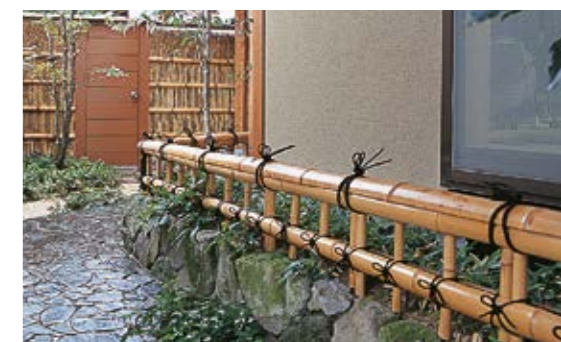

Natural Ryoanji fence

Default dimensions: W 1800 x H 600/900 mm

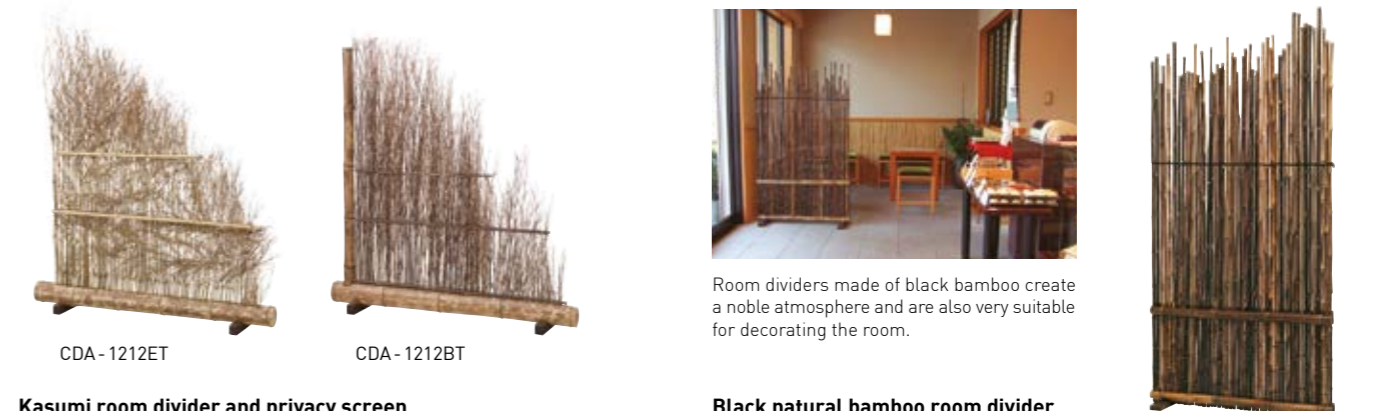

Natural Yotsume fence

Default dimensions: W 1800 x H 600/900 mm

Room dividers

Kasumi room divider and privacy screen

Default dimensions: W 1200 x H 1200 x D 200 mm
Individual dimensions available on request.

Black natural bamboo room divider

Default dimensions: W 900 x H 1500 x D 300 mm
Individual dimensions available on request.

ECO BAMBOO realistically reproduces the structures of natural bamboo, making it ideal for interior design in the modern Japanese style.

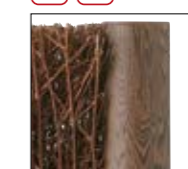

ECO BAMBOO room divider

Default dimensions: W 900 x H 1500 x D 300 mm
Individual dimensions available on request.

WUT-30

The combination of aluminium with natural products ensures durability and gives a natural impression.

Room divider made of natural bamboo twigs with aluminium frame

Default dimensions: W 900 x H 1200 x D 250 mm
Individual dimensions available on request.

WUT-31

SUKIYA MON PRODUCT SERIES

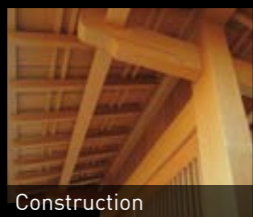

SUKIYA MON

Majestic beauty created by the finest materials and craftsmanship

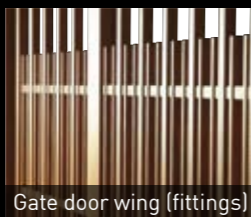

Roof

Refined with copper or coloured steel sheet. Brick tops provide an elegant look.

Construction

Materials of the highest quality and the design with invisible fittings give the gates their authentic character.

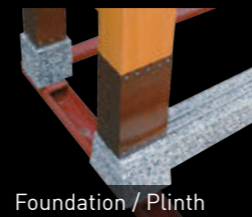

Gate door wing (fittings)

The fine latticework in particular reflects the sophisticated technique and beauty of traditional Japanese architecture.

Thresholds and pillars

Polished natural granite convey a feeling of high value and give the door a prestigious impression.

Foundation / Plinth

The height adjustment facility integrated into the foundation ensures easy installation and alignment of the base.

Sukiya Gate Type 1 Basic Version

Fabricated on client's request

To this day, the sukiya-zukuri are made from carefully selected natural wood using traditional techniques. With balanced shapes and proven methods, impressive structures are created by master craftsmen in the style of classical Japanese architecture.

The front is made in a special way so that large bolts and connecting fittings are not visible. This elaborate construction makes each gate a gem of form, function and durability.

Only red cedar wood of exquisite quality without knotholes is used for the construction of the pillars, gate wings and frames, which ensures that the material will not crack or twist. This provides each gate with a structure that is resistant to the influences of the weather.

Customised manufacturing based on your wishes

SKY-1BK-DM

Sukiya Gate, Type 1 with 2 wings

Wood: Japanese red cedar | Roof: copper sheet and tiles
Gate door wings: Kiriko bars with lattice | Pedestal: natural granite

SKY-1BK-D

Sukiya Gate Type 1 with 1 wing

Wood: Japanese red cedar
Pedestal: natural granite
Roof: copper sheet and tiles
Gate door wings: Kiriko rods with lattice

SKY-1BK-D

Sukiya Gate Type 2

Roof & ridge: coloured copper plate
Gate door wings: Senbon lattice with ribbon

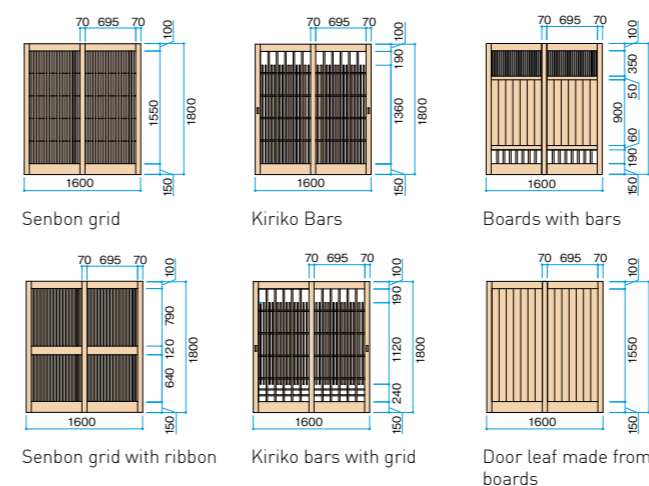

Sukiya Gate Type 2

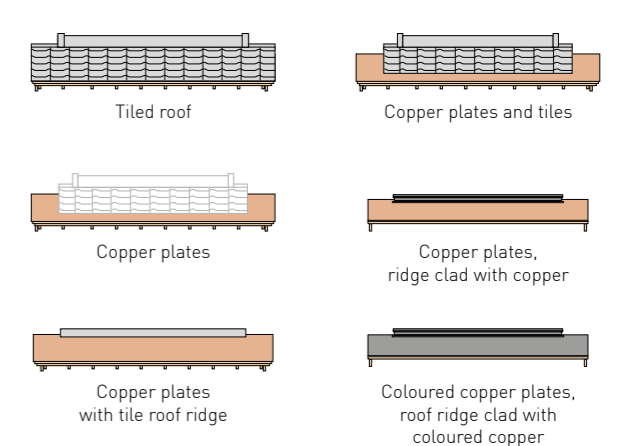

Each Sukiya gate is unique in its own way and is crafted with care and skill by the hands of a master craftsman. In the process the conditions of the location and individual wishes are taken into account. So you can choose the size, the design of the roof, the type of gate wings as well as the colour of the wood for your specimen, according to your imagination.

Dimensions and styles

Door wing options

Options for roofs

Colours

There is a choice of two colour tones for the material.

As a standard colour, red cedar brings out the original character of the wood best.

The traditional Mingei colour has a dark wood tone with a calm aura.

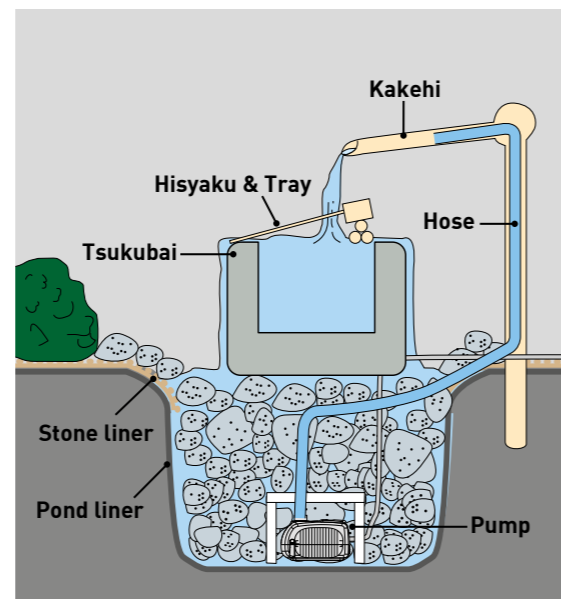

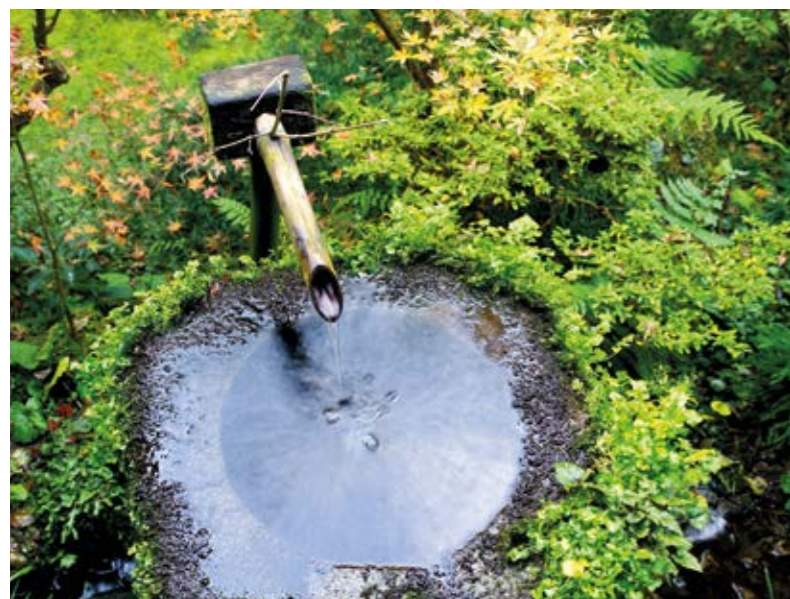

Default: Red cedar

Traditional: Mingei

EVER BAMBOO® DECORATION

Kakehi

Just like all EVER BAMBOO® products, our Kakehi made of SAN resin are particularly durable and resistant to weathering or discolouration.

EVER BAMBOO® DECORATION

FRP Stones & Rocks (replicas made of fibre-reinforced plastic)

Landscape stones

The FRP stones are particularly well suited for interiors or for green roofs, where low weight is important. Of course, they are also particularly resistant to weathering.

Code	Size (mm)	Weight (kg)

EVER ART BOARD® MATERIAL

EVER ART BOARD®

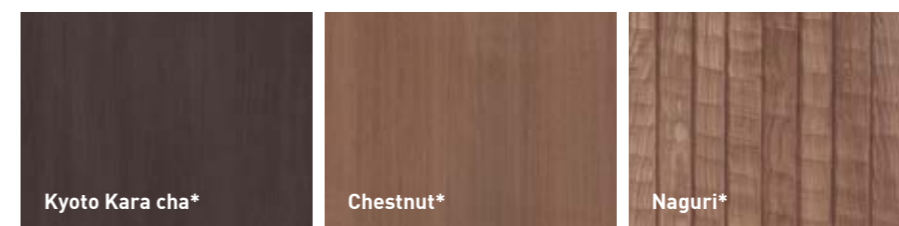

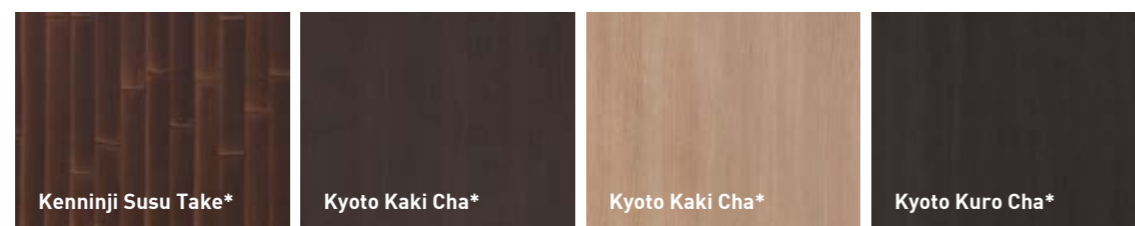

Create an atmosphere where you feel comfortable and want to spend time. Perfectly balanced concepts and elegant solutions for home and garden with the EVER series products.

Aluminium composite panels with Japanese textures

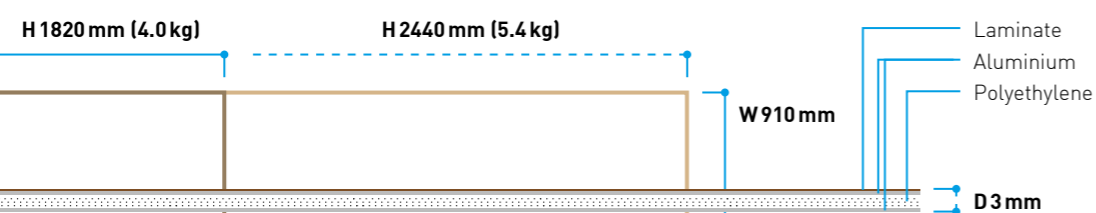

Our EVER ART BOARD® is made with a high quality laminate that ensures high weather resistance to rain and sun, preventing corrosion or fading of colours. The easy handling during processing and assembly make the aluminium composite panels the ideal material for flexible and individual projects indoors and outdoors.

Natural touch surface (embossing texture)

*With their detailed surface texture, the décors of the product series with natural touch coating are particularly close to nature.

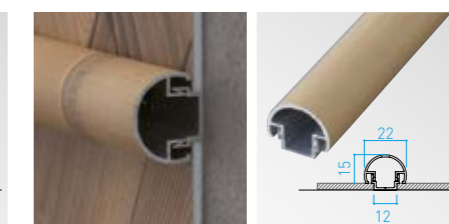

Default Dimensions

End cover strip 22 × 15 × 3650 mm

Centre cover strip 22 × 15 × 3650 mm

Available profile types

An overview of all profile types and décors can be found in the EVER ART BOARD® product catalogue.

PHOTOREALISTIC LAMINATED ALUMINIUM PROFILES

Nature-like décors replicate wood surfaces true to the original and offer numerous design options for elegant projects in and around the building.

JAPANESE LIGHTING

Materials and designs that harmonize with nature and soft light create a comfortable rhythm in the darkness, by creating a taste of the oriental garden.
