

ASIGA®

Super**WAX**™

The first 3D printing photopolymer that melts like wax.

www.asiga.com

SuperWAX™ for Asiga 3D Printers

Melts like Wax

Casts like Wax

SuperWAX is Wax

SuperWAX melts just like real wax

Parts built in Asiga SuperWAX liquefy at 50 degrees Celsius.

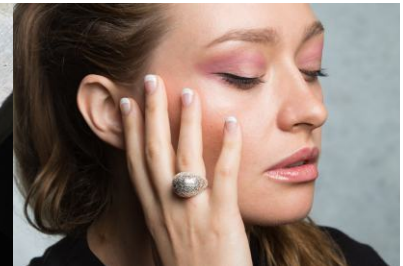

Extraordinary Surface Resolution and Smoothness

Precision parts without the need for excessive finishing.

From printer to tree in less than 5 minutes

Simple and efficient post-processing techniques. No post-curing necessary.

Platinum, Gold & Silver casting

Compatible with both Gypsum and Phosphate bonded investments. No special burnout required.
