

MASTPLOT

ENHANCING **SAFETY AT SEA**

SeaSight by *MastPlot* is an integrated dashboard platform for safety of navigation at sea. Shipped in a SeaBox containing a processing unit loaded with MastPlot's proprietary algorithms, SeaSight is designed to work with existing shipboard sensors or bundled with standalone sensors to provide value added data analytics.

sea trial reports in **1 minute**

understand all your **vessel's performance parameters** (turning diameter, stopping distance, etc.) immediately after a manoeuvring sea trial with an **automatically generated sea trial report**

incident reporting in **1 source**

get an **instantaneous turn by turn sequence of events** for incident root cause and accountability analysis

situational awareness in **1 glance**

enhanced collision detection over a dead reckoning system by **augmenting course prediction with stored manoeuvrability data** from manoeuvring sea trials to **understand your best course of action**
