

ORYXFLOW – Integrated Solutions

ORYXFLOW is a leading provider of integrated industrial solutions, specialising in general trading, supply of industrial spare parts, tools and equipment, technical support, and engineering services. Headquartered in Cairo, Egypt, we proudly serve clients across Egypt and the Gulf markets, delivering exceptional value, reliability, and performance across multiple industrial sectors.

With over two decades of hands-on experience in the oil & gas, power generation, chemical, petrochemical, and water industries, ORYXFLOW's founding team brings deep technical expertise and a proven track record of success. Our extensive industry knowledge and enduring relationships with leading multinational companies underscore our commitment to excellence, innovation, and superior service delivery.

Our Mission :

Delivering Excellence Through Partnership

To provide our clients with innovative, reliable, and cost-effective industrial solutions that enhance operational efficiency and sustainability, whilst building long-term partnerships founded on trust, integrity, technical excellence, and high-quality products and services.

Our Vision :

Regional Leadership

To be recognized as a regional leader and trusted partner in industrial supply and engineering solutions, continuously expanding our capabilities, expertise, and market presence across Egypt and the Gulf region.

Expand Capabilities

Continuously broaden our service offerings and technical expertise to meet evolving industry needs.

Deepen Expertise

Invest in continuous learning and development to maintain our leading edge in industrial solutions.

Grow Market Presence

Strategically expand our reach and influence across key markets in the region.

Comprehensive & Specialized Industrial Supply Solutions

ORYXFLOW supplies a comprehensive range of high-quality industrial products, materials, and components to support the power, oil & gas, and chemical industries. Our extensive inventory ensures rapid response to critical procurement needs whilst maintaining the highest quality standards.

Measuring Instruments

Micrometers, vernier callipers, feeler gauges, dial gauges with magnetic bases, pressure gauges, temperature measurement devices, vibration measurement devices, flowmeter devices, and other precision tools.

Raw Materials

Stainless steel (SS 304, 316, 316L, SDSS, bronze, carbon steel, and other special materials) for fabrication requirements.

Mechanical Components

Shafts, sleeves, wear rings, throat bushing, throttle bushing, couplings and other rotating equipment components engineered for demanding applications

Sealing Solutions

Soft packing, mechanical seals, O-rings, oil seals, and gaskets for critical sealing applications.

Bearings

White metal journal and thrust bearings, Thordon bearings, cutlass bearings, bronze bearings, and rolling element bearings.

Fasteners & Adhesives

Bolts, nuts, and Loctite products including thread lockers, anti-seize compounds, and specialised adhesives.

Lubrication Solutions

Molykote products (silicone greases, greases, oils, pastes, coatings,.....etc), Klüber products (Unisilicon, Altemp,etc.), high-performance oils, and specialized greases for extreme operating conditions.

Special & Standard Tools

We supply special and standard tools for various industrial applications.

Safety Equipment

We supply a wide range of safety equipment including harnesses, coveralls, gloves, helmets, and safety shoes to ensure workplace safety.

Comprehensive Technical & Engineering Solutions

ORYXFLOW delivers a comprehensive portfolio of technical and engineering solutions focused on enhancing equipment performance, operational efficiency, and reliability. Our experienced teams offer specialist support, troubleshooting, and engineering consultancy to optimize plant operations and reduce downtime, supported by thorough inspection records, root cause analysis, and detailed service and final reports that ensure full transparency, traceability, and quality assurance.

- **Specialised Training Programmes:** Specialised technical and safety training programmes designed to enhance workforce skills, efficiency, and awareness in industrial environments, empowering your teams with knowledge and best practices.
- **Dynamic Balancing:** Precision balancing services for rotating equipment to eliminate vibration and extend component life.
- **Performance Testing:** Flowrate measurement and comprehensive performance testing for hydraulic systems and pumps.
- **Laser Alignment:** High-precision laser alignment services for coupled machinery ensuring optimal performance.
- **Vibration Measurement and Analysis:** Advanced vibration measurement and analysis to detect faults and prevent catastrophic failures.
- **Reverse Engineering:** Reverse-engineering-based spare parts fabrication for obsolete or hard-to-source components.
- **Mechanical Seals repair :** Precision inspection, refurbishment, and testing to restore sealing integrity and extend equipment service life.

Our Regional Market Presence

ORYXFLOW operates extensively within Egypt and across the Gulf Cooperation Council (GCC) countries.

Our strong regional presence and deep understanding of local and international market dynamics enable us to deliver tailored, high-quality solutions that meet the most demanding global standards.

Our Competitive Strengths

20+ Years Experience

Over two decades of professional experience across multiple industrial sectors

Full Documentation

Complete technical documentation and reporting for all provided services

Technical Excellence

Comprehensive technical capabilities in industrial supply, engineering, and field services

Client Collaboration

Working closely with customers to deliver efficient, cost-effective, and sustainable solutions

Global Partnerships

Strong partnerships with globally recognized manufacturers and engineering firms

Quality Commitment

Unwavering commitment to quality, reliability, and customer satisfaction

"ORYXFLOW combines technical expertise with genuine partnership, delivering solutions that consistently exceed expectations whilst maintaining the highest standards of quality and reliability."

Connect With ORYXFLOW

Ready to Partner With Us?

Contact our team today to discover how ORYXFLOW can support your industrial operations with world-class solutions, technical expertise, and unwavering commitment to excellence.
