

EXCLUSIVE DISTRIBUTOR

## MASTER FLO

TEXAS, LOUISIANA AND THE COUNTIES OF LEA, EDDY, CHAVES, ROOSEVELT, CURRY, AND OTERO, NEW MEXICO.

## Produced Water Back Pressure Control Valve

Master Flo choke valves are relied on worldwide to provide reliable flow control in all service types. With over 100,000 choke valves manufactured, VanZandt/Eagle has the expertise in choke valve sizing, custom trim and material selection for your specific application, custom engineering, and the life-of-field services to help you optimize production and lower costs.

### Back Pressure Control Valves

The perfect valve to keep your pump in its curve! Disc chokes are commonly used to maintain back pressure on pumps, but are prone to failure caused by cavitation and erosion due to poor pressure recovery. Master Flo chokes can mitigate or eliminate the effects of cavitation and erosion that can severely damage your critical equipment and piping systems.

Less downtime  
Less maintenance  
Best in class performance

### OUR COMMITMENT

## The Best Automated Wellhead Choke Valve in the Industry

### **GOT SAND?**

#### **Wellhead Choke Control Valve**

- From the North Atlantic Sea, to the Northern Delaware Basin, Master Flo is field tested & field proven to be the industry leader in choke technology.
- Master Flo's Chokes have been optimized to offer the most precise controllability & highest rated CV's of any external sleeve & cage choke on the market.
- Built to last using patented 5CB tungsten carbide, Master Flo is proven to be the most erosion resistant production choke in the world. Hands down!
- Designed with actuation in mind, Master Flo chokes can be equipped with pressure balanced trim which allows for drastically lower operating torques than traditional non-balanced trim designs.
- When paired with field automation, actuated Master Flo chokes have been proven to reduce downtime, increase operating efficiency by over 900%, & curtail costly flaring by up to 95%.
- All VanZandt customers can count on free training, full product support with highly capable field services, & industry leading engineered solutions to their toughest choke challenges.
