

# PHX Installation Guide

## First Time

Please follow the below steps to install your PHX indicators the **FIRST TIME**:

### Step 1

1. Click on the **Link 1** in the email
2. Download the zip by clicking on the download button (upper right) 
3. Be sure that the PHX\_SUITEv1.0 is saved to your Download folder
4. If NinjaTrader 8 is not yet open, open it. In Control Center > Tools > Import > Ninjascript Addon
5. Navigate to the download folder, click Open on PHX\_SUITEv1.0 If the following dialog shows:

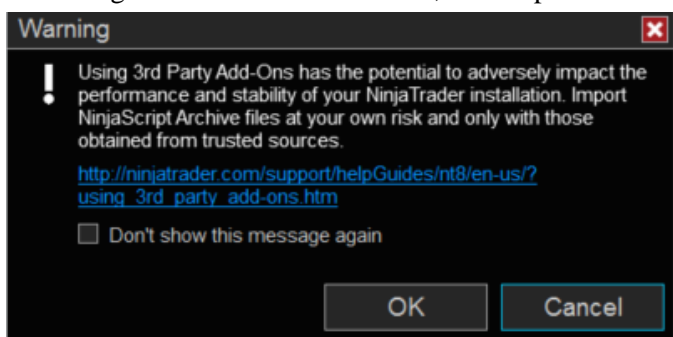

simply click Ok.

6. If Ninja asks you to replace existing indicators you can say yes.
7. This installation may take a minute or two depending on your machine

### Step 2

1. Click on the **Link 2** in the email
2. Download the zip by clicking on the download button (upper right) 
3. Be sure that the PHX\_TargetLine.zip is saved to your Download folder
4. If NinjaTrader 8 is not yet open, open it. In Control Center > Tools > Import > Ninjascript Addon
5. Navigate to the download folder, click Open on PHX\_SUITEv1.0 If the following dialog shows:

simply click Ok.

6. If Ninja asks you to replace existing indicators you can say yes.
7. This installation may take a minute or two depending on your machine

Once the import is complete, open the PHX\_DEFAULT\_RTY workspace using Control Center > Workspaces. This can take a couple of minutes again depending on the speed of your machine. On the initial load all charts will show on your primary monitor.

Please arrange the charts as instructed during class and then use Control Center > Workspaces, Save As To save your custom layout workspace using a name of your choice.

## Subsequent Time

If for whatever reason your installation is compromised, you may install the PHX indicators again as long as you remove the existing installation first.

## Removing PHX Installation

1. Control Center > Tools > Remove Ninjascript Assembly
2. Choose PHX\_SUITEv1.1 and click Remove
3. Close NinjaTrader
4. Launch NinjaTrader
5. Follow the First Time instructions above
6. When prompted to overwrite templates, say Yes

Kind regards,

Phoenix Traders Team
