Color Bars have the following options:

Natural – Up bars use Bull Color, Down bars use Bear color

Indicator – The Oddsmaker determines the bar color

None – the bar color is not modified in any way by this indicator.

Match Data Width checked forces the Oddsmaker bars to be the same width as the price bars.

Levels are dependent on chart type. Be sure to select the correct chart type. For example, a PHX 8 chart requires the selection 'c8'.

Scaling Line Anchor determines the default max/min scaling of the level lines.

Levels can be adjusted for color, width, opacity and style.
