

Summer Camp 2020 Protocol

General Summer Camp Precautions

- Campers will remain with their group throughout the day to minimize any crossover in student interactions
- All children will have their temperatures taken at the start of the day
- Handwashing will be a required step before a child engages in the snack portion of the day. This is especially important in Primary camp and Toddler school.
- All staff members will be screened each morning upon arriving to campus.

If a camper becomes ill

- Camper will be sent home immediately and not allowed to return to campus until they have been cleared by a medical professional. If temporary isolation is needed, it will take place in the office in Building 2.
- All camps will be notified of sick campers.
- Potential areas of contamination will be noted to be sanitized by Vanguard Cleaning Systems.

Isolation Protocol

- If a camper or staff member falls ill while on campus they must contact the Director of Health & Safety. In the event she is unavailable, the Director of Facilities will assume her functions.
- The community member will then be escorted to the office in Building 2 where they will remain until they are able to be picked up.
- Procedure
 1. Once the suspected infected individual arrives at the office in Building 2, they will be provided with a disposable mask and gloves
 2. The Director of Health & Safety will complete a Suspected COVID-19 Case Form
 3. Anyone working with the suspected infected person will wear a mask and gloves
 4. Direct the student or staff member to go home
 - o If the staff member is well enough to drive their own vehicle they will
 - o If the staff member is not well enough to drive their own vehicle they will call someone to pick them up and leave their car on campus
 - o The Director of Health & Safety will call a unwell student's parents or other emergency contacts to pick them up
 5. The Director of Health & Safety will identify any people who the infected person might have come into contact with. They will be informed that they may have come into contact with someone who has COVID-19. They will be asked to conduct a self screening each morning for 2 weeks and reach out to the Director of Health & Safety if they begin to exhibit any symptoms.
 6. Any surfaces that the unwell individual came into contact with must be disinfected. All PPE must be disposed of properly.

Social Distancing Protocol

Social distancing is a simple and effective mechanism to stop the spread of disease. At Discovery, social distancing will take a number of different forms.

Employees who are not in their classroom or office, should try to remain 6 feet apart from one another. When this is not feasible, in the teacher work room for example, teachers should wear masks, and wash their hands after they have left the space. In person meetings should be kept to a minimum. When an in person meeting is absolutely necessary, chairs should be positioned so that there are at least three feet between each participant.

During phases 2 and 3 of reopening the state of Florida, children will remain in static groupings. The same children and teachers will occupy the same classrooms on a daily basis. There will be no field trips, classroom volunteers or mixing between classes.

In the Toddler Program classes will have 8 children and 2 adults. In the Primary Program classes will have 15 children and 2 adults. Any campus run by outside vendors have a maximum of 15 children per camp.

Nappers will nap in their classrooms. Nap mats should be spaced out so that they are six feet apart. When it is not possible to space mats six feet apart, children should sleep in a head/toe sleeping configuration.

Each playground will only be used by one group of children per week. On Friday the playground will be disinfected. Toddler classrooms may utilize slightly different outdoor spaces, or have restricted outdoor times. Toddler 1 could use the toddler garden. Toddler 4 could use its front yard. Toddler 2 & 3 will need to coordinate times so that children are unable to interact between the fences.

Screening Protocol

Anyone visiting campus will need to be screened for COVID-19 symptoms. Adults will utilize the sign in sheets found in Building 4 along with the provided thermometer. Adults will be asked to record their temperature, as well as self-identify if they are experiencing any of the symptoms of COVID-19. The symptoms are listed at the top of the sign in sheet for easy reference.

Parents will be expected to self-screen their children for symptoms of COVID-19 in the morning. When the children arrive at school, they will have their temperature taken using a no-touch thermometer.

Any person with a temperature over 100 degrees, or presenting with cough, shortness of breath, fever, chills, muscle pain, sore throat, or new loss of taste or smell will be asked to leave campus immediately.

Faculty members will either drive themselves home or call someone to pick them up. Students will be escorted to the office in Building 2 for isolation while they wait for a parent, guardian or emergency contact to pick them up.

The Discovery Schools know that children are susceptible to a variety of illnesses that are not coronavirus. However, during this time we must remain vigilant to keep all members of our community safe. In order for your child to return to campus after they have experienced the symptoms outlined above, they must be cleared by a medical professional. Faculty members experiencing the above symptoms must obtain a negative coronavirus test and share the results with the Director of Health & Safety.
