VCH (vertical clit hood)	2-6 weeks
Outer labia	2-3 months
Inner labia	4-6 months
All Surface	around 6 months

Please note that healing times are based upon the average times experienced by most clients. Expect some piercings to take up to 1 year healing time, this includes nipple & some cartilage piercings such as industrial & nose, etc. Tongue piercings are most difficult for the first couple of weeks. Everyone is different & the rate at which your piercing(s) heal will differ for each individual.

Don't worry if your piercing heals quicker or slower than the guide given - if you have ANY queries about the healing of your piercing then please don't hesitate to contact us on [01698 451391](tel:01698451391)

Remember there is no such thing as a "stupid question". You can never be too careful when it comes to your body!
