Tattoo Aftercare Advice

How to use CrocLite & CrocWash

CrocWash

CrocWash is formulated to clean freshly tattooed skin.

- Apply CrocWash gently to the tattooed area. DO NOT RUB INTO THE SKIN, a thin layer covering the tattoo is all that's required.
- Once CrocWash is applied, rinse off with water and PAT DRY with a disposable towel. DO NOT RUB DRY.

CrocLite

CrocLite rapid repair cream quickly cools, soothes and heals fresh tattoos. It is formulated to spread easily and gently across freshly tattooed skin.

- Use sparingly, as a little goes a long way. A thin layer 2/3 times daily should be more than sufficient.
- Absorbs into the skin in a few minutes and creates a bacteriostatic barrier.

Always ensure your hands are clean before applying either product to your skin

Tattoo Aftercare Advice

Congrats! You have just received a new tattoo from Phoenix Tattoo. In order for your new tattoo to heal in the best possible manner, we recommend that you follow only these instructions;

Leave that bandage/cover alone -

Your artist took care to cover your new tattoo for a good reason, as pretty as your tattoo is, it is still an open wound and open flesh is a breeding ground for bacteria and infection. Leave the bandage/cover alone for a minimum of two hours.

Washing and Treatment -

After you remove your bandage/cover you're going to need to wash your tattoo using luke-warm water and use Croc Wash soap substitute, to remove any excess ink and blood. Alternatively, a mild, non-scented soap – something like a Simple or Sanex, can be used.

DO NOT use a wash cloth or anything abrasive on your new tattoo, a clean hand is the best tool to use in this case. Pat the area with a dry disposable kitchen towel and then applying a very thin layer of tattoo aftercare. **WE ONLY RECOMMEND USING CROCLITE TATTOO AFTERCARE AND CROC WASH**

(we do not recommend any other aftercare ** - see opposite)

Use the Croc Lite Tattoo Aftercare very sparingly, a little goes a long way. Apply a thin layer only 2/3 times per day, your tattoo needs to be able to breath. Please ensure you allow air to circulate around it!

Scabbing and Peeling -

After a few days you will notice that the skin around the tattoo will start to peel and flake perhaps even scab. **DO NOT SCRATCH, PICK OR PEEL AT YOUR NEW TATTOO!** By this time your tattoo is almost done healing, now is not the time to ruin it by scratching or picking it.

Baths, Showers and Pools -

Yes, you can (and should) shower with a new tattoo, it is okay to get your new tattoo wet. However, do not submerge your tattoo underwater for the first 2-3 weeks. We recommend short showers for the first week or so. Baths, hot tubs and pools can cause serious damage to your new tattoo and should be avoided.

Jewellery

DO NOT let jewelry come into contact with the tattooed area until the area is healed. Jewellery can irritate the area, slow the healing process and potentially cause infection.

Protection from the sun -

Do not sunbathe or use sunbeds whilst your tattoo is healing or for up to 6 weeks after your tattoo was done. Afterwards you will need to always protect it from the sun's ultraviolet rays. The sun will fade a brilliant tattoo very quickly. Protect your tattoo with a minimum of 30 SPF sunblock.

Following these simple steps will keep your tattoo and investment looking bold and vibrant for many years to come. Please do not listen to friends, family, co-workers etc. on how to care for your new tattoo, our artists are the experts and their advice should be listened to.

FREE OF CHARGE RETOUCHES OF YOUR TATTOO

CrocLite is nature's finest tattoo aftercare. We not only use this product, during completing your tattoo but we also recommend it for healing because we know how this range heals and protects your skin. Because of this **WE ONLY RECOMMEND THIS PRODUCT FOR AFTERCARE.**

In our experience we have seen many tattoos not heal well because of bad aftercare ... people use ranges of lotions and potions on their skin because the friend of their Great Aunt, who's never had a tattoo recommends something! We know about the inks and colours used during the tattoo process and how the skin heals, please take our advice.

Therefore, we are not responsible for a badly healed tattoo because you have not followed our advice. **WE ARE NOT ABLE TO OFFER FREE OF CHARGE RETOUCHES IF YOU CHOOSE ANY OTHER AFTERCARE PRODUCTS OTHER THAN THOSE PRESCRIBED BY THIS STUDIO.**
