Summary

Ms. Johnson has over 15 years of progressive Speech-Language Pathology and rehabilitation experience. She has provided speech-language services in a wide variety of settings such as her own private practice, public and private schools, acute care hospitals, rehabilitation hospitals, outpatient clinics, Head Start, developmental centers, skilled nursing facilities and home care.

Professional Experience

- Provided speech, language and hearing screenings to preschool children at local day care facilities
- Evaluated and provided speech therapy for speech and language delayed pre-school children at Headstart
- Provided remediation for complex pediatric articulation and phonologic disorders including childhood Apraxia
- Provided contract speech-language services to school districts (speech and language testing/evaluation and treatment, ARP attendance, IEP development)
- Evaluated and provided speech-language services to complex speech and language impaired pre-school children, adult stroke patients and oncology patients at a self-owned Medicare certified private practice
- Provided language therapy for Autistic school-age children
- Fitted children with computerized augmentative communication devices to supplement speech intelligibility; secured funding from private sources
- Developed a total communication program (sign language, speech, augmentative devices) for children with severely impaired articulation
- Provided accent modification for adults seeking to modify or change their accent
- Served as lead Speech-Language Pathologist for a craniofacial team at an academic medical center evaluating speech and language competency of children with cleft lip and palate and other craniofacial anomalies

- Managed an Audiology and Hearing Aid Center at an acute care community hospital
- Provided home health speech and language therapy to patients with neurologic conditions
- Provided speech rehabilitation to head and neck cancer patients
