

## PADI Specialty Dives

Gain more experience with PADI Specialty's. Build your knowledge to continue diving past recreational limits, try new types of diving in new environments. Whether that would be Night Diving, Ice diving, Wreck Diving, or even Enriched Air Diver.

Aqua Dive and Watersports offers a lot of different specialty's. All courses include discount on rental gear if needed, diver manuals if required, and the specialty card at the end. Some specialty's require pool time as well.

# Aqua Dive and Watersports

Where family, friends, and fun come together.

The Advanced course is a great step in your PADI training. It is designed to advance your diving to the next level right after your Open Water training. It will help expand your skills and build your confidence through different adventure dives. You get the chance to try different specialties while gaining experience with your PADI Instructor.

## Advanced Open Water Diver \$240

What you learn:

You will start planning your Advanced training with your instructor and fellow classmates by choosing from a list of Adventure dives. There are 2 required dives –Deep and Underwater Navigation– and you choose the other 3 for a total of 5 dives. Other common dives to choose from are Drysuit Diver, Altitude Diver, and Peak Performance Buoyancy.

- If you chose to do Drysuit as one of the Adventure dives, there is 1 pool session before the dives in which you will be in the pool working on how to use a Drysuit and practicing your skills.
- There is also 1 classroom session in which we will go over which dives we will be doing at the lake, a review of the Advanced manual and Knowledge Reviews for those dives and to go over any paperwork
- You will then meet your Instructor at the lake for all 5 of the dives over 2 days.

What's included you ask:

- Your Advanced Diver Manual.
- Discount on any rental gear you need.
- 20% off regular priced mask, snorkel, fins and boots.
- Special pricing on a purchase of a dive computer

Due to health requirements it is required that you have your own Mask and Snorkel. As well as your own personal mouthpiece for the rental regulator.

## Add on Drysuit Specialty \$95

Diving in a Drysuit in cold water is a real benefit to both your experience and fun underwater. If you plan on diving locally in the lakes or even out on the coast you will need your Drysuit Diver Specialty card. This will give you the tools on how to properly use a Drysuit and the different buoyancy characteristics and will also allow you to rent one on dive trips. If you add on the Drysuit Specialty with your Advanced course you will get one extra dive in the lake to demonstrate your Drysuit skills and the Drysuit specialty card.

What's included you ask:

- Drysuit Diver manual.
- 1 pool session within the Advanced course.
- Discount on rental gear.
- 1 extra dive in the Advanced course.

Prior to any course starting there is a medical form that is required to be filled out. If you answer "YES" to any question on this form then you must see your Doctor before continuing on the course. Links to the form can be found on our website.
