

COUNSELING REQUIREMENTS

1. Therapeutic interventions will be implemented by a Master's level Therapist, Registered Mental Health Intern, or Licensed Mental Health Counselor. All unlicensed clinicians will complete case reviews with a Licensed Mental Health Counselor.
2. Position is on a contract basis. You would be a 1099 contractor. This means you are legally in business for yourself. We offer the opportunity for you to be assigned cases we receive. You will be responsible for tracking your own deductions and paying taxes if needed. You also decide which cases you want :)
3. We pay on a monthly basis. Generally documents are due the 1st of the month or the 22th of the month depending on the referral source. We then pay by the 28th of the following month.
4. You will have to make yourself contract eligible with us. Since this is a paid position, you will have to complete an application process that will require background checks (\$67 cost to you), online DCF training, etc. This may be waived if you are already in the state's system. After completion and clean records are confirmed, you will then be eligible to sign a contract with us.
5. The population we work with ranges from ages 5-17. Most are children in foster care or behavioral children living at home. Hours approved differ from referring sources. Each one has their own documentation that you will be responsible for. Remember, documentation is important.
6. You are responsible for weekly and monthly documentation to be submitted online or to our office.
7. Rates- This varies per referral source, licensure and experience. Rates range from \$35 to \$50 per hour. You are paid for only client face to face contact.
