PROJECT NAME: _____

Current Technology Experience

What technology do you currently use or have used in past homes? (Examples: Smart lighting, surround sound, security cameras, streaming devices, intercom systems, etc.)

Have you ever experienced a home with integrated technology that impressed you? If so, what stood out?

Initial Technology Priorities

Below are some of the most common technology enhancements we design for luxury homes. Imagine how each could elevate your comfort, security, and convenience—especially if this is a second or seasonal home.

Technology Category	Interested?	Imagine if...
Lighting & Shades	<input type="checkbox"/> Yes <input type="checkbox"/> No	...your home welcomed you with the perfect lighting at sunset.
Whole-Home Music	<input type="checkbox"/> Yes <input type="checkbox"/> No	...your playlist followed you seamlessly indoors and out.
TV & Entertainment	<input type="checkbox"/> Yes <input type="checkbox"/> No	...movie night felt like your own private theater.
Security & Remote Access	<input type="checkbox"/> Yes <input type="checkbox"/> No	...you could check doors, gates, and cameras from anywhere in the world.
Wi-Fi & Connectivity	<input type="checkbox"/> Yes <input type="checkbox"/> No	...everyone had fast, reliable internet—everywhere, including the lanai.
Home Control & Voice	<input type="checkbox"/> Yes <input type="checkbox"/> No	...you could say "Goodnight" and your house handled the rest.
Climate & Energy Management	<input type="checkbox"/> Yes <input type="checkbox"/> No	...each zone stayed comfortable while saving energy when you're away.

Note: If unsure, leave blank—we'll walk through these together.

Lighting & Shades

- Which rooms would benefit from smart lighting or automated shades?

- Are there any art collections, architectural features, or design elements where thoughtful lighting would enhance the space?

- Are there areas you'd like to manage more easily while away (e.g., simulate occupancy, reduce heat)?

- Priority spaces for Lighting & Shades:

Whole-Home Music

- Where would you love built-in music—kitchen, pool, bedroom, shower?

- Do you entertain or host guests during the season?

- Key music zones:

TV & Entertainment

- Which spaces will be used for watching movies, sports, or casual TV?

- Would you prefer to keep technology hidden when not in use?

- Viewing areas to consider:

Security & Remote Access

- What areas need camera coverage (gates, driveways, dock, exterior doors)?

- Do you want alerts for visitors, deliveries, or unexpected activity?

- Do you need access control for guests, housekeepers, or vendors while you're away?

- Security priorities:

Wi-Fi & Connectivity

- Which rooms and outdoor areas must have flawless connectivity?

- Do you host guests or use remote work/video conferencing in-season?

- Connectivity must-haves:

Home Control & Voice Integration

- What routines would you like to automate (e.g., Welcome, Away, Entertain)?

- Do you typically use Apple or Android devices?

- Are you currently using voice assistants like Alexa, Siri, or Google Assistant in your home?

- Would voice control be useful in certain areas like the kitchen or bedroom?

- Scenes or rooms to automate:

Climate & Energy Management

- Are there rooms with special sun exposure or higher cooling needs?

- Do you want the ability to adjust or monitor your home's temperature remotely?

- Would you like to track energy usage or automate energy-saving modes when away?

- Zones with energy concerns or comfort needs:

Your Vision

- What matters most in your seasonal or family retreat? (Comfort, security, simplicity, style?)

- What little annoyances do you hope to eliminate in this new home?

- Have you seen any technology (in another home, online, or while traveling) that inspired you?
