

FNSKU Label Recycler Privacy Policy

Effective Date: October 23, 2025

This Privacy Policy applies to the FNSKU Label Recycler Chrome Extension ("the Extension") provided by Shoal Creek Solutions, LLC.

We take your privacy seriously. This document outlines the Extension's approach to data handling.

1. Data Collection and Storage

The FNSKU Label Recycler Extension is designed as a local, private utility and DOES NOT collect, transmit, or store any personal user information.

Non-Personal Data Storage (Local Only)

The Extension performs the following temporary, local data storage solely for its functionality:

- **FNSKU Image Data:** When a user uploads an Amazon FNSKU PDF, the Extension extracts the FNSKU barcode image and stores it temporarily as a Base64 string in **Chrome's local storage (chrome.storage.local)**. This data is non-personal and is used only to populate the printing grid.
- **Grid Selection State:** The Extension may temporarily store the user's last selected grid configuration locally in Chrome storage to improve usability.

2. Data Transmission and Payment Processing

The Extension requires communication with an external server solely for license verification.

- **External Communication:** The Extension communicates with the third-party payment server for initial purchase verification and periodic subscription status checks only.
- **Third-Party Payment Services:** We use ExtensionPay (a service built on Stripe) to manage the subscription and process all payments.
- **Personal Data Handling by Third-Party:** When you click to purchase the subscription, you are redirected to a secure, external payment page. Any personal information you provide there (Name, Email, Billing Information, Credit Card details)

is collected and secured exclusively by ExtensionPay and Stripe. Shoal Creek Solutions, LLC never receives or stores your sensitive financial data.

We strongly encourage users to review the privacy policies of these third-party partners for complete details on their data handling practices.

3. Third-Party Libraries

The Extension uses local, offline copies of the following open-source libraries to function. These libraries do not transmit data to external servers:

- **jsPDF (PDF generation)**
 - **pdf.js (PDF parsing)**
 - **Tailwind CSS (Styling)**
-

4. Policy Changes & Contact

- **Policy Changes:** We reserve the right to modify this privacy policy. Any changes will be posted on this page with an updated effective date.
- **Contact Information:** If you have any questions or concerns regarding this Privacy Policy or your subscription data, please contact us at: support@shoalcreeksolutions.com.
