

The Smuggler Strata 620 / 660 / 700 Amphibious range combined with Orion S25 system is made from our 23 degree deep vee hull, with a comfortable, safe ride and great performance on the water. On land this craft is perky and responsive, with its powerful S25 system giving you greater manoeuvrability in tight areas or on steeper terrain. Getting on and off the beach is a breeze, no waiting around at the boat ramp, no trailer, easy as. Wheels retract into a recessed bow, and aft into D-tube so that when underway the wheels are hidden from sight giving you a safer, drier ride, plus a streamlined looking hull. With 3 lengths to choose from in this range, we can make the boat for your requirements. Lifting points can be added for tenders.

Experience Excellence!
