

## Pink Ink

*Hybrid - 40% Sativa / 60% Indica*

*THC: 30+%*

### **PINK INK**

#### **Pink Ink**

Pink Ink, as coveted as its [OG Kush](#) relative, is an indica-dominant hybrid with powerful body-focused effects. In its exceptional variations, pink hairs burst from bright green buds barely visible under a blanket of sugar-like trichomes, with traces of a sweet vanilla and candy perfume. The potency of this strain could be considered overpowering, and even small doses are known to eliminate pain, insomnia, and appetite loss.

Pink Ink helps with:

- Pain
- Insomnia
- Appetite Loss
- Stress
