

## Hyper Glue

*Hybrid - 40% Sativa / 60% Indica*

*THC: 30+%*

### **HYPER GLUE**

#### **Hyper Glue**

This strain was developed by crossing the very potent and aromatic Super Glue with a carefully selected, extremely fruity Apple Fritter. This strain that is exceptionally potent and has a rich terpene profile, it has an excessive resin production and a massive balanced high. The buds are dense, heavy and covered with a thick glittering layer of resin. The aroma is fruity, a bit woody and reminds us of apples and red berries.

The effects of Hyper Glue are extremely powerful, very long-lasting and incredibly versatile. The high sets in quickly and begins with a feeling of lightness and euphoria, which is accompanied by an increasingly physical relaxation and a feeling of well-being. The high is well balanced between body and mind and even more impressive than the flavor. It moves through waves of physical and cerebral effects, that give you an unforgettable experience and a deep feeling of happiness.

Hyper Glue helps with:

- Anxiety
- Depression
- Stress
