

## SKUNK 1

*Sativa Dominant Hybrid - 65% Sativa / 35% Indica*

*THC: 16.3%*

Skunk No.1 is a slightly Sativa dominant hybrid (65% Sativa/35% Indica) strain created through crossing the classic Afghani X Acapulco Gold X Colombian Gold strains. With its classic parentage and high 24.1% THC level, Skunk No.1 is one bud you'll need to add to your must-try list. Skunk No.1 has a sweet and super skunky flavor that takes a sour pungent turn on exhale that can leave you cringing if you're not ready. The stench is heavy and permeating with pungent skunky smells that are sour and spicy and near overwhelming. This bud has large and dense minty green nugs with shades of purple and a coating of tiny minty green crystal trichomes. The Skunk No.1 is everything you'd expect from a classic hybrid, with both head and body effects that are perfect for any level of user. You'll experience a feeling of euphoria first accompanied by an increase in mental clarity and focus. Your clear-headedness won't last for too long – it will be quickly replaced by a haziness that's pleasant and relaxing. Your body will fall into this hazy feeling as well, lulling itself into a state of calm. These effects make Skunk No.1 perfect for treating chronic pain, depression, chronic fatigue, and stress.

Skunk 1 helps with:

- Stress
- Anxiety
- Depression
- Energizing
