

# Why **COVRGARD**<sup>®</sup> Ceramic Window Tint?

CovrGard Window Films offer top-of-the-line sun control and UV protection.

Our range of advanced ceramic films are designed to block IR rays. When you choose CovrGard, you can count on getting a high-quality, durable, and easy-to-install film. Protect yourself and your vehicle's interior from the harmful effects of the sun with CovrGard automotive films.

## **High heat rejection:**

Ceramic tint is highly effective at blocking infrared (IR) radiation, which is the main cause of heat buildup inside a car. This means that ceramic tint can help keep the interior of your vehicle cool, even on hot days.

## **UV protection:**

In addition to blocking IR radiation, ceramic tint also blocks a significant amount of ultraviolet (UV) radiation. This can help protect your skin and the interior of your car from the harmful effects of the sun's rays.

## **Sleek, modern look:**

Ceramic window film provides a sleek, modern look for your car, and is available in a range of shades to suit your personal style and preferences.

## **Durable and long-lasting:**

Ceramic window film is highly resistant to scratching, peeling, and fading, which makes it a long-lasting choice for protecting the windows of your car.

## **Easy to clean and maintain:**

Ceramic window film is easy to clean and maintain, and can be removed without damaging the car's windows.

## **Privacy:**

Darker window films can provide privacy by making it difficult for people to see into the car.

## **Impact resistance:**

Our window films are designed to be impact resistant, meaning they can help to hold the glass together in the event of an accident or break-in attempt.

Protect your Investment

# Experience the ultimate in comfort and protection with ceramic window tint.

CovrGard Ceramic Tint provides the ultimate protection against heat and UV rays, blocking over 99% of UV rays and over 80% of infrared heat. This can help to keep you, your passengers, and the interior of your car comfortable and protected.

In addition, our ceramic window tint is made with clear optical polyester and has no metal elements, so you won't have to worry about interference with electronic devices. With CovrGard Ceramic Tint, you can enjoy a more confident ride knowing that you and your family are well-protected.

## Ceramic CL series

Ceramic CL (Classic) is a range of automotive ceramic window film that offers high-quality performance at an affordable price. This film is made from a durable ceramic material that blocks a large proportion of heat, making it an effective choice for keeping your car cool and comfortable on hot days.
