

COVRGRAFX

PATTERN SOFTWARE

COVR GRAFX is our exciting state of the art software program which provides an ever growing database of vehicle patterns, all created using cutting edge 3D scanning technology, combined with the more traditional methods, perfected through years of experience, to ensure perfect coverage everytime.

The user friendly software platform comes packed with advanced features including the ability to 'AutoNest' saving valuable time in processing along with reduced material wastage. The 'AutoWrap' function also gives you the ability to add more material onto any edge of the pattern - especially useful if greater coverage is needed for custom installs or when doing matte conversions.

With direct access to our experienced patterning team, you will always be ahead of the field with the latest updates, plus give you the chance to make special vehicle requests for your customers, if and when necessary.

COVRGARD GLOS

With outstanding clarity and a superior depth of shine coupled to a highly resistant top coat, you can be assured that treated vehicles will remain in 'showroom' condition for years to come.

Stone chip and abrasion resistant, offering a highly durable finish with self-healing and hydrophobic attributes.

COVRGARD MATT

Matte painted surfaces are particularly difficult to maintain so why not take away that headache by installing our superb matte protection film. Made to protect and preserve that vulnerable finish.

COVRGARD LITE

An innovative smoked TPU film for custom application on headlights and taillights to give that high end tinted appearance, whilst providing the ultimate in protection.

COVRGARD BLAK

Whether you are looking for some custom styling or merely to refresh tired 'piano black' surfaces - the gloss levels are 'off the charts' on this beautiful black PPF.

Why **COVRGARD**[®] Paint Protection Film?

COVRGARD[®] Paint Protection Film (PPF) is the best solution in protecting your vehicle from the rigours of everyday driving. Keeping your vehicle in that 'showroom' condition for longer.

1

Paintwork Protection

Modern automotive paintwork is very vulnerable to stone chips and minor scratches from simple everyday usage, by fitting COVRGARD[®] Paint Protection film you can keep it looking 'as good as new' for longer, whilst making maintenance even easier.

2

Self-Healing and Hydrophobic

The innovative clear coat technology used on COVRGARD[®] PPF products provide both self-healing and super hydrophobic surface benefits whilst maintaining that high gloss finish.

3

Protect your Investment

Applying COVRGARD[®] Paint Protection films can enhance the resale value of your vehicle at time of change, whilst demonstrating to prospective purchasers how you have cared for your vehicle from new by applying PPF.

4

Virtually Invisible

'If you look for it, you will find it – If you don't know it's there you will never see it!' COVRGARD[®] Paint Protection Films protect your vehicle whilst remaining virtually invisible, enhancing the high gloss finish of all painted surfaces.

GLOS

With outstanding clarity and a superior depth of shine coupled to a highly resistant top coat, you can be assured that treated vehicles will remain in 'showroom' condition for years to come.

MATT

Matte painted surfaces are particularly difficult to maintain so why not take away that headache by installing our superb matte protection film. Made to protect and preserve that vulnerable finish.

BLAK

Whether you are looking for some custom styling or merely to refresh tired 'piano black' surfaces - the gloss levels are 'off the charts' on this beautiful black PPF.

LITE

An innovative smoked TPU film for custom application on headlights and taillights to give that high end tinted appearance, whilst providing the ultimate in protection.
