Active Silver Additive

Interior Only

Interior Products

ACTIVE Silver Additive reduce bacterial growth by 99% and more.

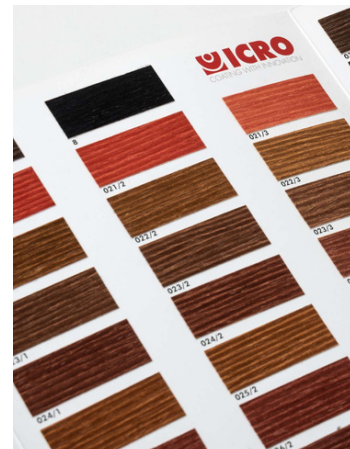

- × Active ingredients are incorporated into the polymer structure during the production process.
- × The antibacterial protection is evenly distributed in the product matrix.
- × The active ingredients provide protection over the entire surface, even in the hard-to-reach corners.
- × The active ingredients are not washed away and do not diminish their effectiveness over time, but last for the entire life of the product.

STAINCOLORMIX 2.0

TINTOMETRIC SYSTEM FOR STAINS - STAINCOLORMIX 2.0

Extremely user-friendly, the system enables generating 197 stains and colorants for wood by mixing 3 out of the 8 basic dye concentrates, selecting the color tone variations according to the dilution percentage and choosing the concentration tailored to the needs. Note: The stains colors can be produced by working both by weight and by volume, always obtaining the same final result. The shades shown in the chart are achievable using standard diluents, thinners or water.

- TTSC2000-- 2000 GIALLO LIMONE BLIM / YELLOW LEMON CONCENTRATE
- TTSC2000-- 2000 GIALLO MEDIO BM / MEDIUM YELLOW CONCENTRATE
- TTSC2000--2000 ARANCIO D / ORANGE CONCENTRATE
- TTSC2000--2000 ROSSO E / RED CONCENTRATE
- TTSC2000--2000 BORDEAUX G / BORDEAUX CONCENTRATE
- TTSC2000--2000 BLU I / BLUE CONCENTRATE
- TTSC2000--2000 NERO L / BLACK CONCENTRATE
- TTSC2000--2000 BRUNO NO / BROWN-BRUNO
