

IAESC Procurement invites you to join us on Wednesday 2/26/20 at 1:00 PM EST or Thursday 2/27/20 at 2:00 PM EST for a demonstration of the EDCLICK School Safety Manager software.

It is recommend that School Safety Manager be used with the CSTAG (Comprehensive School Threat Assessment Guidelines founded by Dr. Dewey Cornell) threat assessment process but it can be used with other threat assessment processes.

This software can assist in:

1. Anticipating and defusing threats.

Know what to look for. Know who to ask.

2. Threat assessment.

Are students just fooling around or planning and preparing for violence?

3. Interventions and progress monitoring.

Once a plan for violence is discovered, what do you do?
Immediately and over the long term?

4. Ultimate prevention: change the school culture.

How to set expectations of safety, eliminate the code of silence and develop teacher skills for safety. Students should both be safe and feel safe.

Register for this free presentation at www.wesc.k12.in.us. Instructions for joining via WebEx will be sent following registration.
