

## Typical cases

## Photovoltaic power station

### 35MW ground distributed photovoltaic project in Gaomi Development Zone

- Inspur makes full use of the photovoltaic resources in Gaomi Development Zone and streets to develop a new energy project with a total scale of 200MW, and the first phase is 35MW invested and developed by Inspur. The annual power generation is about 42 million kwh, and the annual reduction of CO2 emissions is about 50,000 tons.

### Linyi Yihe New District 30MW industrial and commercial photovoltaic project

- Inspur, in cooperation with Linyi Industrial Park, plans to develop a capacity of 50MW and 3.746805 MW in the first phase. The project creates economic value for customers with an annual income of RMB3 million; The annual power generation is about 4.8 million kwh, and the annual reduction of CO2 emissions is about 0.56 million tons.
