# SPRING CLEANING

*Filter Cleaning and Pool Draining are great ways to ensure your water is Fresh and Clean for Spring!*

**Filter Cleaning:** It's essential to clean your filters **every 4-6 months** to ensure your pool water is filtering properly and staying crystal clear.

**Pool Draining:** Draining your pool **every 7 years** helps prevent the buildup of **Total Dissolved Solids (TDS)** and **Cyanuric Acid**, which can negatively impact water quality and reduce the effectiveness of pool chemicals.

Let us help keep your pool in perfect condition—**contact us today!**
