

❄️ Protect Your Pool from Freeze Damage ❄️

Freeze damage can get expensive! Here's a quick checklist to help keep your pool safe!

Please note: this list is only a recommendation, not a guarantee.

Keep Water Moving

- Run the pump continuously or confirm freeze protection is working.
- It is normal for "freeze protect" to alternate between pool and spa mode.
- Make sure valves are open and water is circulating through all lines.

Check Water Level

- Keep it mid-skimmer to prevent the pump from sucking air.

Clear Baskets

- Empty skimmer and pump baskets for proper flow.

Protect Equipment

- Cover pump and heater (don't block airflow).
- Store cleaners and hoses indoors.

If Power Goes Out or Your System is Down

- Turn off breakers to pool equipment.
- Remove drain plugs from pump, filter, and heater.
- Open valves and cover exposed pipes with towels or blankets.
