LAKE CREEK POOLS

HAPPY SEPTEMBER!

Summer is winding down; time really does fly! We hope you enjoyed plenty of relaxing days in your pools and spas this summer.

Water-Saving Tips Every Pool Owner Should Know

Have you noticed your water bill creeping up compared to past years? Your pool might be the reason! The good news is, there are simple ways to cut costs and conserve water while still enjoying your backyard oasis.

1. Cover Your Pool

Pool covers are a game-changer. They reduce evaporation, keep heat from escaping, and even cut back on chemical use. With a high-quality cover (many with easy-to-use rollers), you'll save both water and energy while keeping your pool warm and inviting.

2. Optimize Your Pump Use

Running your pump 10 hours a day is a good starting point—but you may not need it that much year-round. If your water stays clear, try cutting back. If it gets cloudy, increase the run time. Using a timer and matching your pool size to the right pump can also reduce wasted energy and water.

3. Maintain the Right Water Level

Keep your pool filled only halfway up the skimmer opening. This ensures efficient skimming and prevents overfilling, which wastes gallons of water. It's a small habit that makes a big difference.

These easy tips will help you save water, energy, and money—without sacrificing the fun.

And remember, we've got everything you need to keep your pool or spa in top shape: covers, pumps, filters, heaters, and more!
