

# Enbridge Gas ENERGY STAR® Builder Workshops

We invite you to take part in an engaging and informative "town hall" style builder workshop, focused on the advantages of building to the ENERGY STAR® for New Homes (ESNH) standard.

This event is set up to help the local building industry find a direct path between building code changes, high-performance buildings, and municipal sustainability requirements.

### What to Expect

This will be a NO COST half-day workshop (four hours) with expert presentations, experiential panels, breakout sessions and an opportunity for one-on-one conversations with the industry experts (Energy Advisors or Facilitators).

## **Key Takeaways**

- ✓ Update on how Ontario is adopting the harmonized NBC
- ✓ Overview of advanced building science
- ✓ ESNH Technical Specifications
- ✓ ESNH Sales & Marketing
- ✓ Benefits of energy efficient design and construction
- ✓ Strategies for cost-effective high-performance building practices
- ✓ Selling and marketing advantages of high-performance homes
- ✓ How using voluntary programs like ESNH can be used as a tool to achieve carbon reduction goals and address affordability
- ✓ Barriers and challenges that prevent builders from building high-performance homes

#### **Who Should Attend**

- New home builders
- Energy advisors
- Site Supervisors
- Trades
- Contractors
- Sustainability Managers

#### **Enbridge Support**

For nearly 20 years, Enbridge Gas has provided builders with tools and expertise to help improve energy performance and build new construction projects for a sustainable and resilient future.
