

how do you eliminate these pests?

HARGGETT
MATERIALS
INCORPORATED

F.O.G. is the *Innovative Solution* for your Fruit & Drain Fly Problem

- ⇒ Fly infestations are serious- flies carry more diseases than roaches and can easily transfer these diseases within seconds.
- ⇒ FOG consists of organic microbes specifically formulated to degrade Fat, Oil, Grease, and other food byproducts in drains, grease traps, floors and equipment.
- ⇒ FOG promotes separation of water from fat, oil, and grease increasing efficacy of drains and grease traps: less build up = less pests.
- ⇒ FOG is able to eliminate harborage and breeding in these areas for insects such as drain flies and moths, fruit flies, gnats and roaches.
- ⇒ FOG is eco-friendly & readily biodegradable

BEFORE: Dirty Grease Trap

AFTER: Clean Grease Trap

F.O.G's application specific bacterial package was selected for its accelerated degradation capabilities of organic compounds.
