

Energetic Uplevel - Week 4

Susie Mooratoff 2025

The Third “Triad of Consciousness”

This week we cover the third “Triad of Consciousness,” exploring the higher centers of chakras 7, 8 and 9, and DNA Strands 7, 8 and 9, whilst moving into the antiparticle layers of the 8th and 9th chakras.

Focussing on the virtues of Humility, Devotion and Discipline.

The Third Triad is called the “Oversoul or Monadic Matrix”, and at this level we begin to understand and embody even more levels of our multidimensional self and soul extensions. This is like a family of consciousness that are existing simultaneously in other dimensional timelines that begin to merge with our ego personality and physical self.

We attune to 7D Earth consciousness also called Gaia.

We become aware of our own planetary service and working with the grids if we so choose, and can experience holographic architecture within the grids as reality.

At this level we are freed from the cycle of reincarnation into liberation and freedom of the soul as we raise our frequency to align with expanded consciousness realms.

Beginning to embody our “higher mind consciousness” and the capacity of the observer mind to stay in neutral, fully aware, and in control of the nervous system. Allowing our higher evolution in consciousness possible.

7th Chakra, The Crown Center

Colour violet, contains a violet crystal seed, and connected to the 7th DNA strand.

This is the first layer of the third “Triad of Consciousness” and is also called the “Ketheric Mind” or “Planetary Mind”. It is where we start to have sensations and awareness of potential interaction with collective consciousness and our oversoul or monad.

Located in the pineal gland, in the centre of the brain. The crown chakra energy radiates upwards from the crown of the head.

Main attributes: awareness of collective consciousness and the planetary logos (the collective body of the earths blueprint- the entire planetary histories) unity and oneness, connection to the Divine, enlightenment, spiritual wisdom gateway, increased levels of HSP, serenity, deep sense of inner peace, deeper understanding and clarity of our multidimensional life, self realization. It is where we start to access the Cosmic Christ mind.

Connected into the 9th chakra and the 6 chakra. Our 7th chakra is connected to the left wing portal on the feminine side.

This is when we start to move into what's called oversoul or monadic embodiment

And once this starts to activate more we begin the balancing merge of the Divine Feminine and Divine Masculine within as a heirogamic union. The Holy Mother and Holy Father union within.

Also understanding that at this point of ascension and monadic integration, spiritual warfare is radically increased, so we must be diligent with protection, commanding your space, and knowing that you have consent over your entire being, sovereign and free, child of God.

Imbalances in the crown can manifest as feeling spiritually lost and disconnected from oneself and essentially God. The inability to believe or connect to a higher Divine energy - one can be cynical.

To overcome imbalances, one can meditate on the crown as a violet or white thousand-petal lotus flower, visualizing opening the petals of the lotus to unveil a crystal seed within, allowing streams of light to flow in and consciously intending for your crown chakra to be balanced, radiant and vibrant.

We intend to work with and embody the Virtue of Humility.

How does it feel when we are humble? We dismantle the negative ego construct of self-importance, pride, self-justification which allows us to admit to and learn from our mistakes.

Creator Ben Goode

We don't lose our self worth or personal perspective, we align ourselves to be of highest spiritual service of our highest expression.

We are all equal in the love of God, no one is spiritually superior or judged better than another. We realise our place in the universe and the wonderfully unique and individual role each one of us plays, all is part of the God source.

Not needing competition, recognising the limitations of our abilities and as well recognising the abilities and talents of others without envy.

We call in the Spirit of humility to align us with the Christ Spirit.

8th Chakra, The High Heart Center

Colour: gold becoming azure/aqua blue as the monad and Amoraean flame activate, we focus on the crystal seed in the center as an aqua blue crystal, and you may see flecks of gold in the center. Connected to the 8th DNA strand, and Layer two of the third “Triad of Consciousness” called the “Monad Mind”.

This is where we move into the antiparticle chakras, also called morphogenetic chakras and where the chakras start to merge into one central column of light. Your pillar of light, your temple of light.

Located between the 4th heart chakra and the 5th throat chakra and directly connected to the thymus gland.

The thymus is a gland that produces certain hormones and T blood cells and directly impacts the immune system. Activating the high heart can have positive effects on our immune system responses.

The high heart center is the seat of the Inner Holy Spirit and the Amoraean flame, the permanent seed atom which is also called The Christ Seed and links into the zero point.

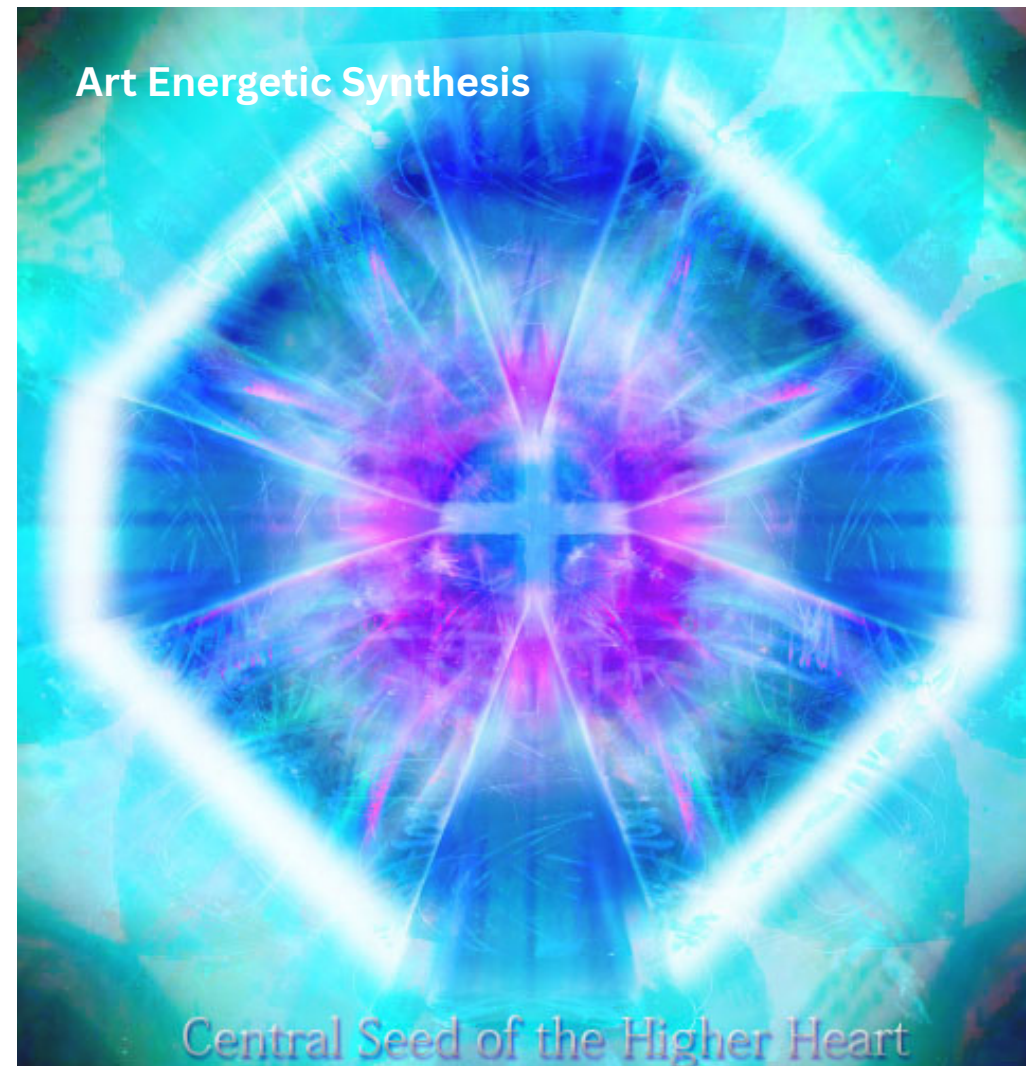

The Christ seed is our inner Christos which holds our blueprint for Christ Consciousness. When we consciously choose to ignite the permanent seed atom we are activating our Diamond Sun DNA 12 strand template not only elevating one's own frequency, it ripples out into the planet to planetary grid system. If we can hold this frequency, we are able to hold safe zones within your own space and in the grid, you become a harmoniser of a space, your home.

Main attributes: Compassion, Divine Love, purity, our desire to be of service to God and all of life becomes the higher purpose and aligns us with our soul missions. Galactic awareness comes online.

The Holy Mother/mother arc frequencies. The seat of our devotion and connected into the kidney points.

As the higher heart center activates more of the Amoraean flame and our devotional template, it creates a connection with the 4th Heart center to form the heart complex and sacred crystal heart.

Activation and awareness of the monadic mind, our soul family, the extension of our soul self.
We can become conscious of galactic war histories and how that has impacted us.
Through the 8th High Heart Center we align with Spirit of Devotion

Spirit and Virtue of Devotion

Devotion to God and the path to our higher consciousness evolution. Devotion to be of service.

When we choose devotion we align ourselves to our true path.

Lack of commitment and care, abandoning what we were once committed to (in a spiritual sense), dishonoring of ourselves and others are some emotions and feelings that can arise if we feel the flame of our devotion beginning to waiver. Call devotion into every cell of your being as you clear anywhere you feel these emotions.

The Devotional Template

One of the key templates that begins to activate, once we choose to engage with the inner calling to step into the path of spiritual unfoldment, evolution, and quantum transformation is the Devotional Template.

This template serves as a safeguard and an anchor point. It ensures that our energy, intentions, and creations are aligned with God Source in Truth and Purity, and directed in service to others, rather than subtly distorted by unconscious service-to-self agendas.

Maybe you can relate in some spiritual groups, as it's not uncommon to encounter energies of egoic distortion—where false light, spiritual bypassing, or hidden agendas can take hold.

The Devotional Template acts as a frequency stabilizer, keeping us in integrity, heart-centered humility & Divine Love.

When the Devotional Template is consciously activated within us:

- We become pillars of purity, devotion, and service.
- Our gifts unfold in harmony with Divine Will, not ego.
- Our path becomes less about “what we get” and more about “what we are here to give, share, and restore.”
- We are protected from subtle distortions and remain attuned to Truth, even when illusions arise, our discernment senses become more refined.
- Our energy field emits the resonance of Sacred Service, attracting only what is in alignment with our higher mission.
- You will magnetise your true soul desires which are also God's soul desires for you, they are one in the same.

When we activate our devotion it becomes our Soul Fire, our burning desire, from our own free will, to return home to God. To unite with all our Soul parts, to return to Heaven on Earth, within and without. It is not only the desire to immerse in bliss. It is our willingness to stand for not just Love but also Truth. It is our willingness to collapse all false light, false love, false solutions, and false safety through our devotion to know Truth. Love and truth combined really is true love.

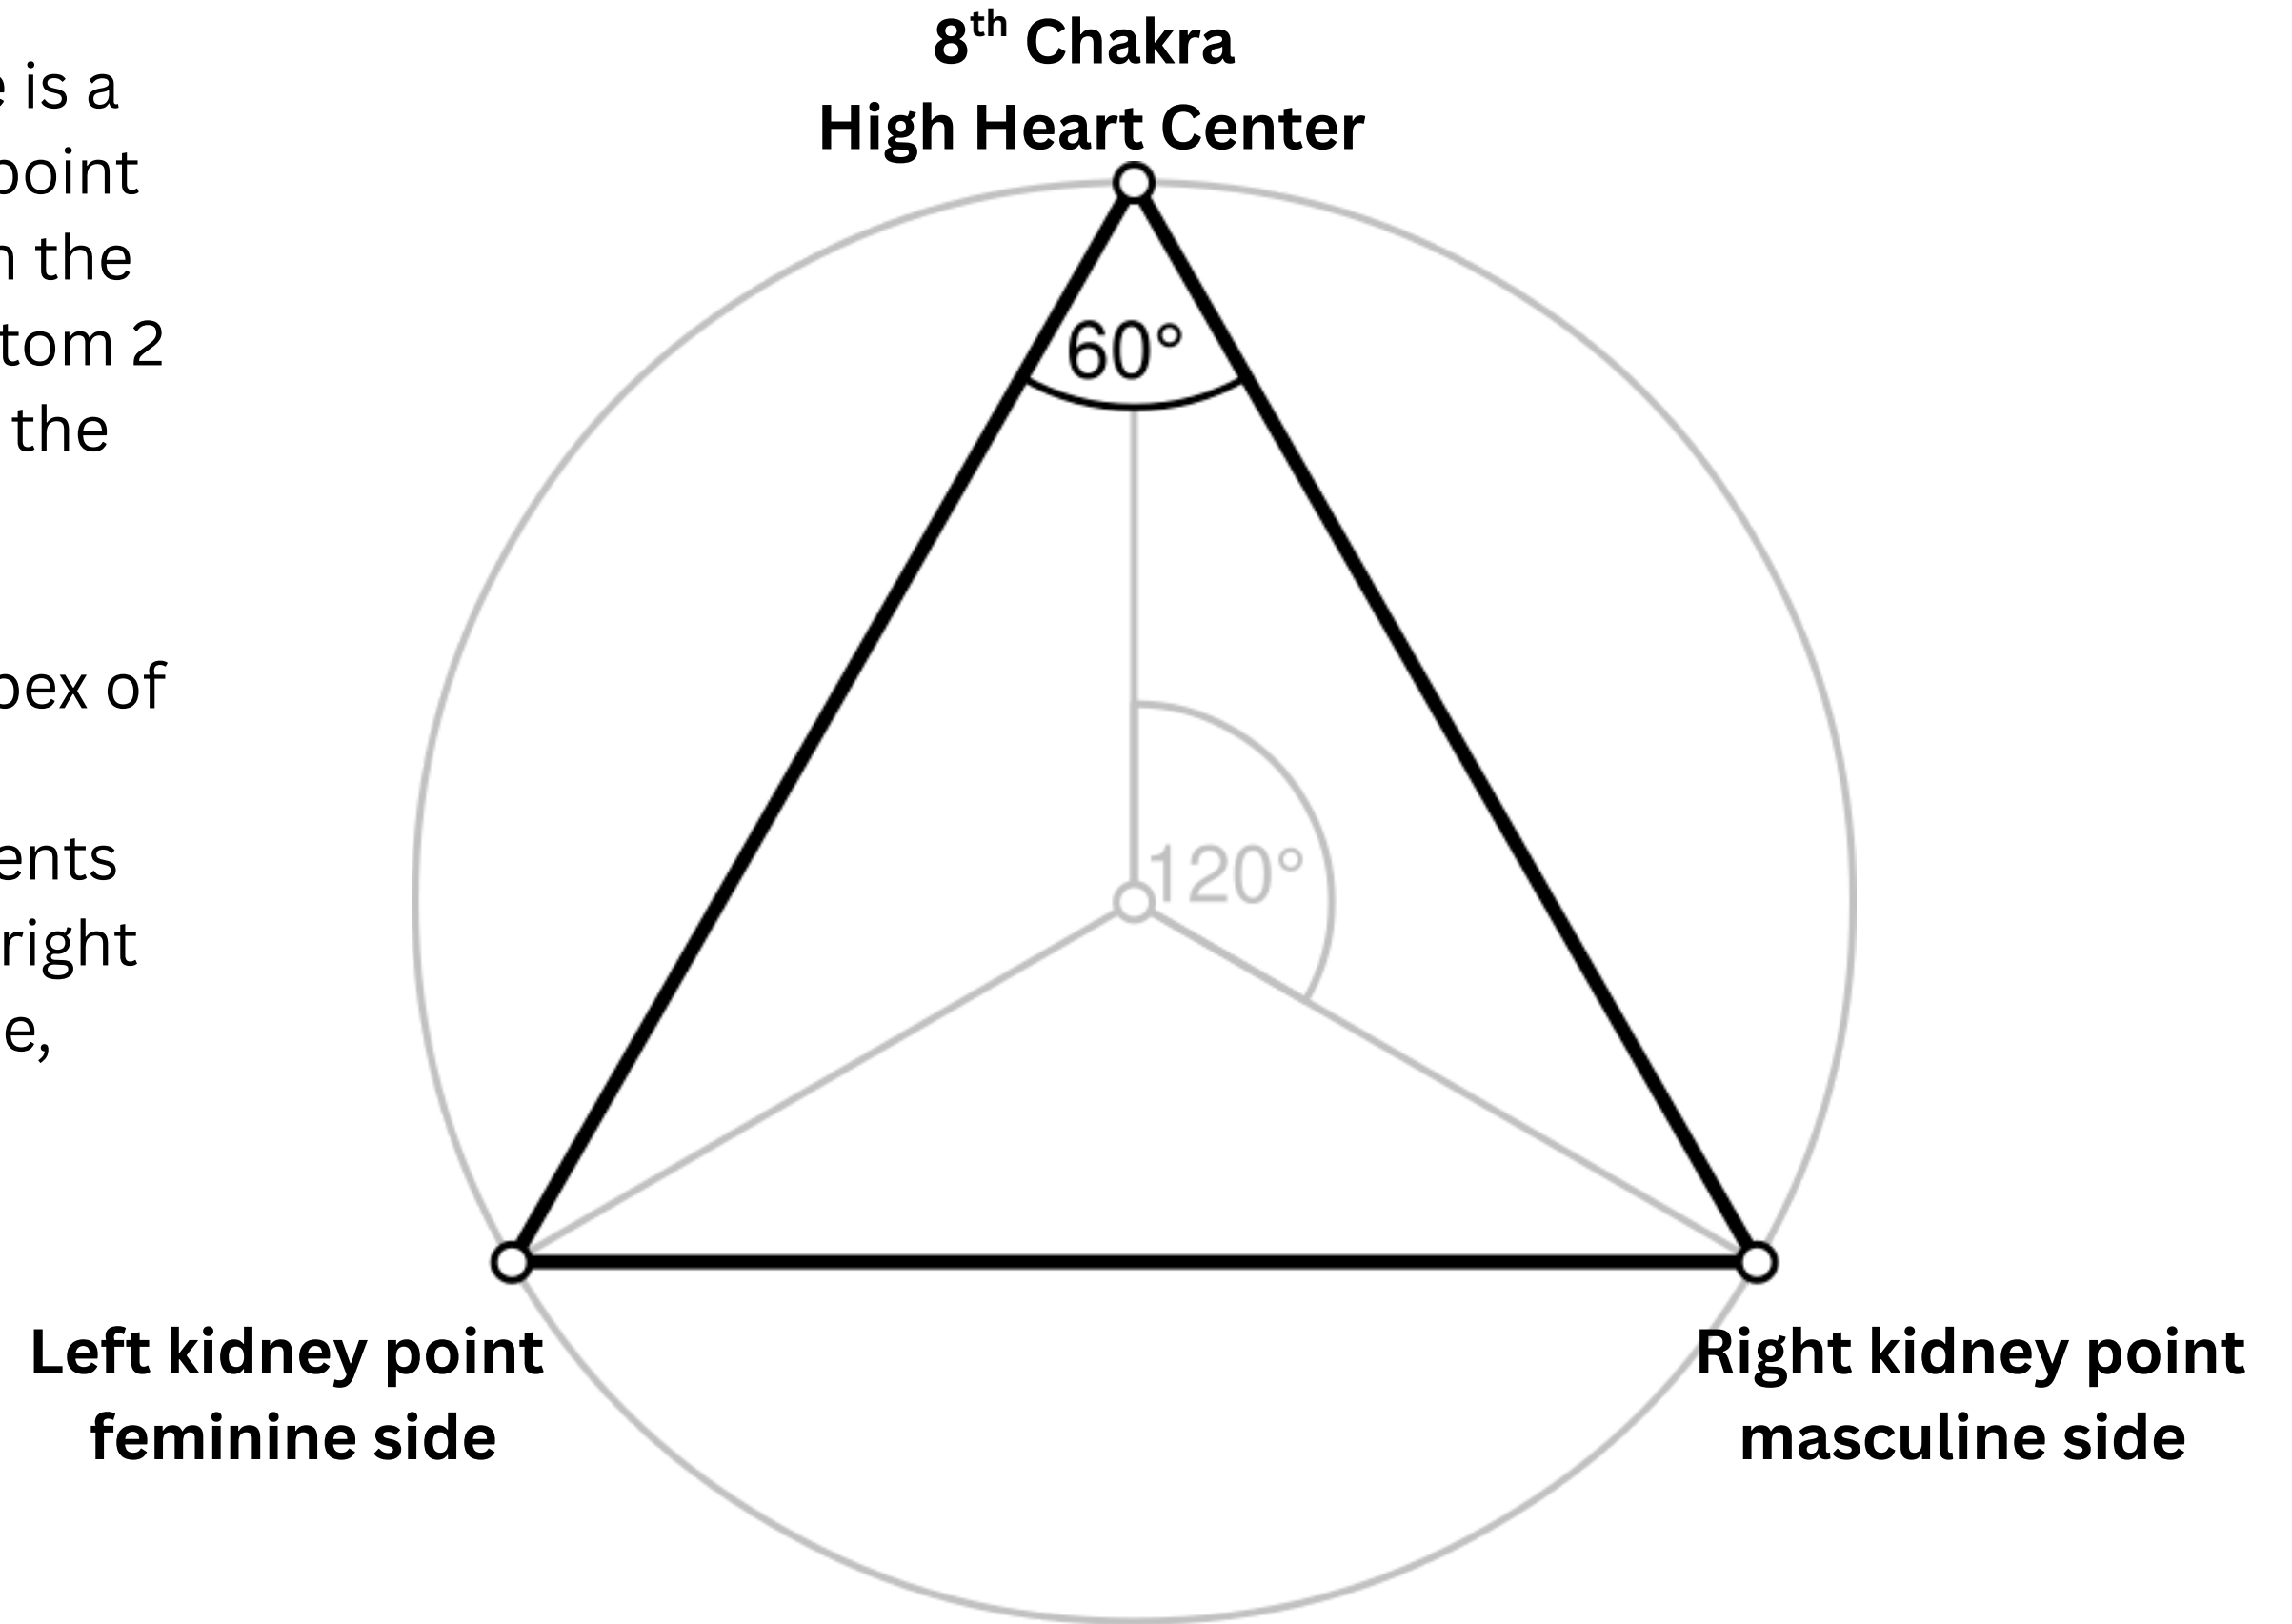

Pure Devotion is so powerful that it compels us to illuminate all unconscious illusions in order to return to Truth no matter how uncomfortable it may be. It is our willingness to dismantle all familiar illusions and blocks that give a false sense of safety, but in reality, keep us trapped. It invites us to shed every layer of our lower ego identity, those aspects of self that may feel like our personality but are actually protective mechanisms rooted in trauma and not aligned with our highest good.

Through our free will, we choose to let go of what is not our true soul essence, to allow what is false to be released and dissolved, so that we may be reborn as our authentic Soul Self. It is consciously choosing to sacrifice the false in order to protect and restore what is truly sacred, rather than protecting the false and sacrificing the sacred. This is our Purity and Innocence, our truest nature. Miraculous breakthroughs become possible when our Devotion is pure and strong. The purer our Devotion, the more powerful and instantaneous are the Quantum shifts that unfold.

This devotional architecture is a trinity triangle, with the top point of this triangle at the point in the high heart center and the bottom 2 points connect into each of the kidney points.

The intention is to place God/Source/ Creator at the apex of this trinity triangle.

The left kidney point represents the feminine aspect and the right kidney point the masculine, together uniting.

The activation and alignment of the Devotional Template in the High Heart centre (8th Chakra, thymus gland) is one of the most powerful activations within our Lightbody.

It restores the Sacred Vow of Inner Marriage between our Soul and God, through fully giving ourselves back to God, and through our own free will and trust, placing God once again on the throne of our Devotional Heart. This restoration realigns the sacred geometrical architecture of the Trinity, the Triangle formed between the two kidney points (right side masculine and left side feminine) and the High Heart, shifting it from a collapsed loop of inner war between masculine and feminine into its exalted form, with God at the apex or throne of our heart.

This activation ignites the aqua blue Amoraean Flame of the Holy Spirit, strengthening and purifying our Devotion to serve God, to return to Heaven on Earth within and without.

It burns through blocks, victim–victimiser consciousness of the distorted feminine (Dark Mother) and distorted masculine (Dark Tyrannical Father), healing trauma, and overriding false parent archetypes, and anchoring and merging the true mother and father principle of creation.

Once this Flame is activated and continually purified and strengthened, it naturally spreads throughout our cells, accelerating both healing and ascension.

It clears all that is inorganic, creating space for the embodiment of our true Soul essence, our Higher Self, our God Self to anchor into the body.

This aligns us with our deepest, truest soul desires, in direct proportion to the strength and purity of our Devotion.

The Amoraea Flame

The Amoraea Flame is an aqua blue and white flame (you can sometimes sense flecks of gold) that resides within our high heart - the 8th Chakra. It ignites in the center heart of the Permanent seed atom.

At its center is the aqua blue crystal seed of the high heart.

The 8th chakra portal or vortex magnetically draws in the Holy Spirit, the aqua blue Amoraea flame, the Soul fire of Pure Devotion that radiates from our Higher Self.

Activating the inner Holy Spirit, Holy Mother and Holy Father God united within our heart and encompasses the Holy Mother Arc.

It is our Soul co-creating together with God Source

9th Chakra, The Mouth of God or Goddess Center

Colour Silver with a silver crystal seed, connected to the 9th DNA strand.

Layer three of the third “Triad of Consciousness” - the “Keriatric Mind” and an antiparticle chakra.

Located at the back of the neck where the skull lays on top of the spine, at the medula oblongata which is part of the brain stem. It is connected to the Thalamus complex. It's called the Mouth of God, the golden chalice or occipital cup that contains our higher universal spirit wisdom and access to higher layers and levels of cosmic intelligence or universal knowledge.

Where we can access another layer of divine downloads.

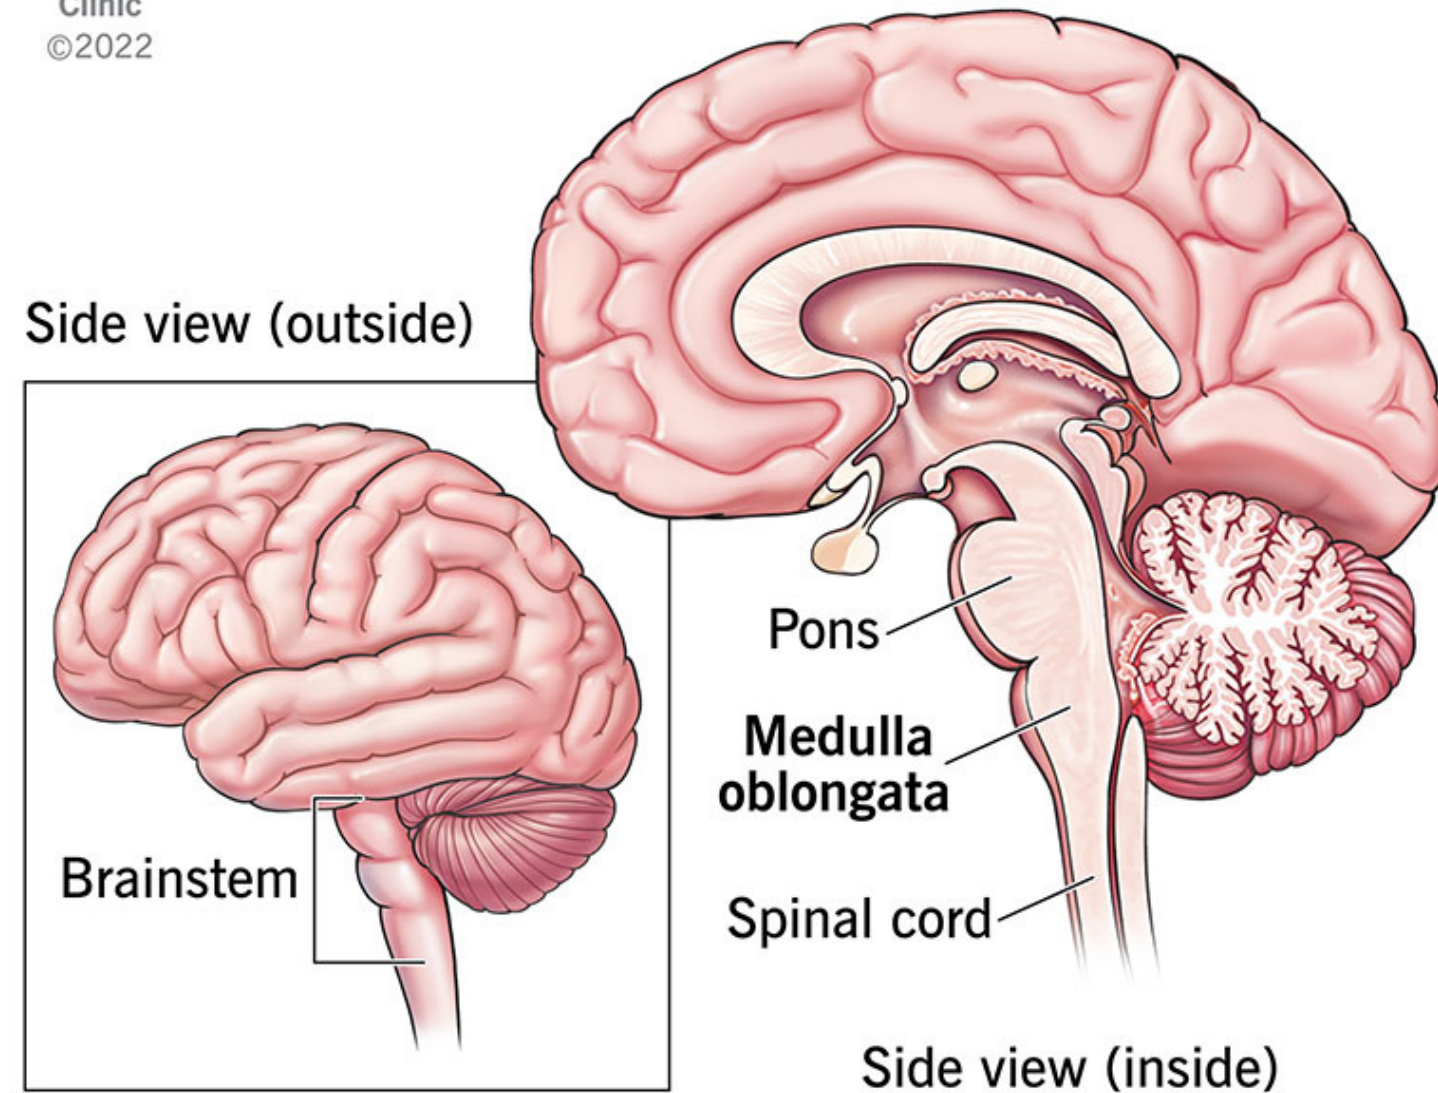

Main attributes: higher brain function, higher wisdom, the voice of God, a higher level of access to knowledge that we may not fully understand yet.

Where Pure and true light language is organically activated.

We have 3 main energy centers or glands within the brain complex, the hypothalamus, the pineal and pituitary, the intention is to link these three glands, which will allow communication frequencies of our monadic consciousness to then translate our spiritual blueprint into spoken word through our throat center and through the higher heart.

Our monad anchors more into the soul. Our soul mission and divine purpose will actualise

Medulla oblongata

Note: In severe cases of addiction/obsession and possession, as well as many implants within the 2nd chakra, there will be extra layers of implants within the medulla oblongata (as this is directly connected to the brain glands and nervous system) to further create emotional and mental instability, spiraling the person into deeper states of despair and self-destruction.

Also, understanding that this will be due to soul fragmentation of unhealed trauma. And sometimes bloodline origins.

Spirit and Virtue of Discipline

When referring to the virtue of discipline, we are not intending to connect with the disciplinary measures i'm sure most of us can relate to through our childhood experiences, but rather the higher mind mental discipline we can cultivate over lower ego mind.

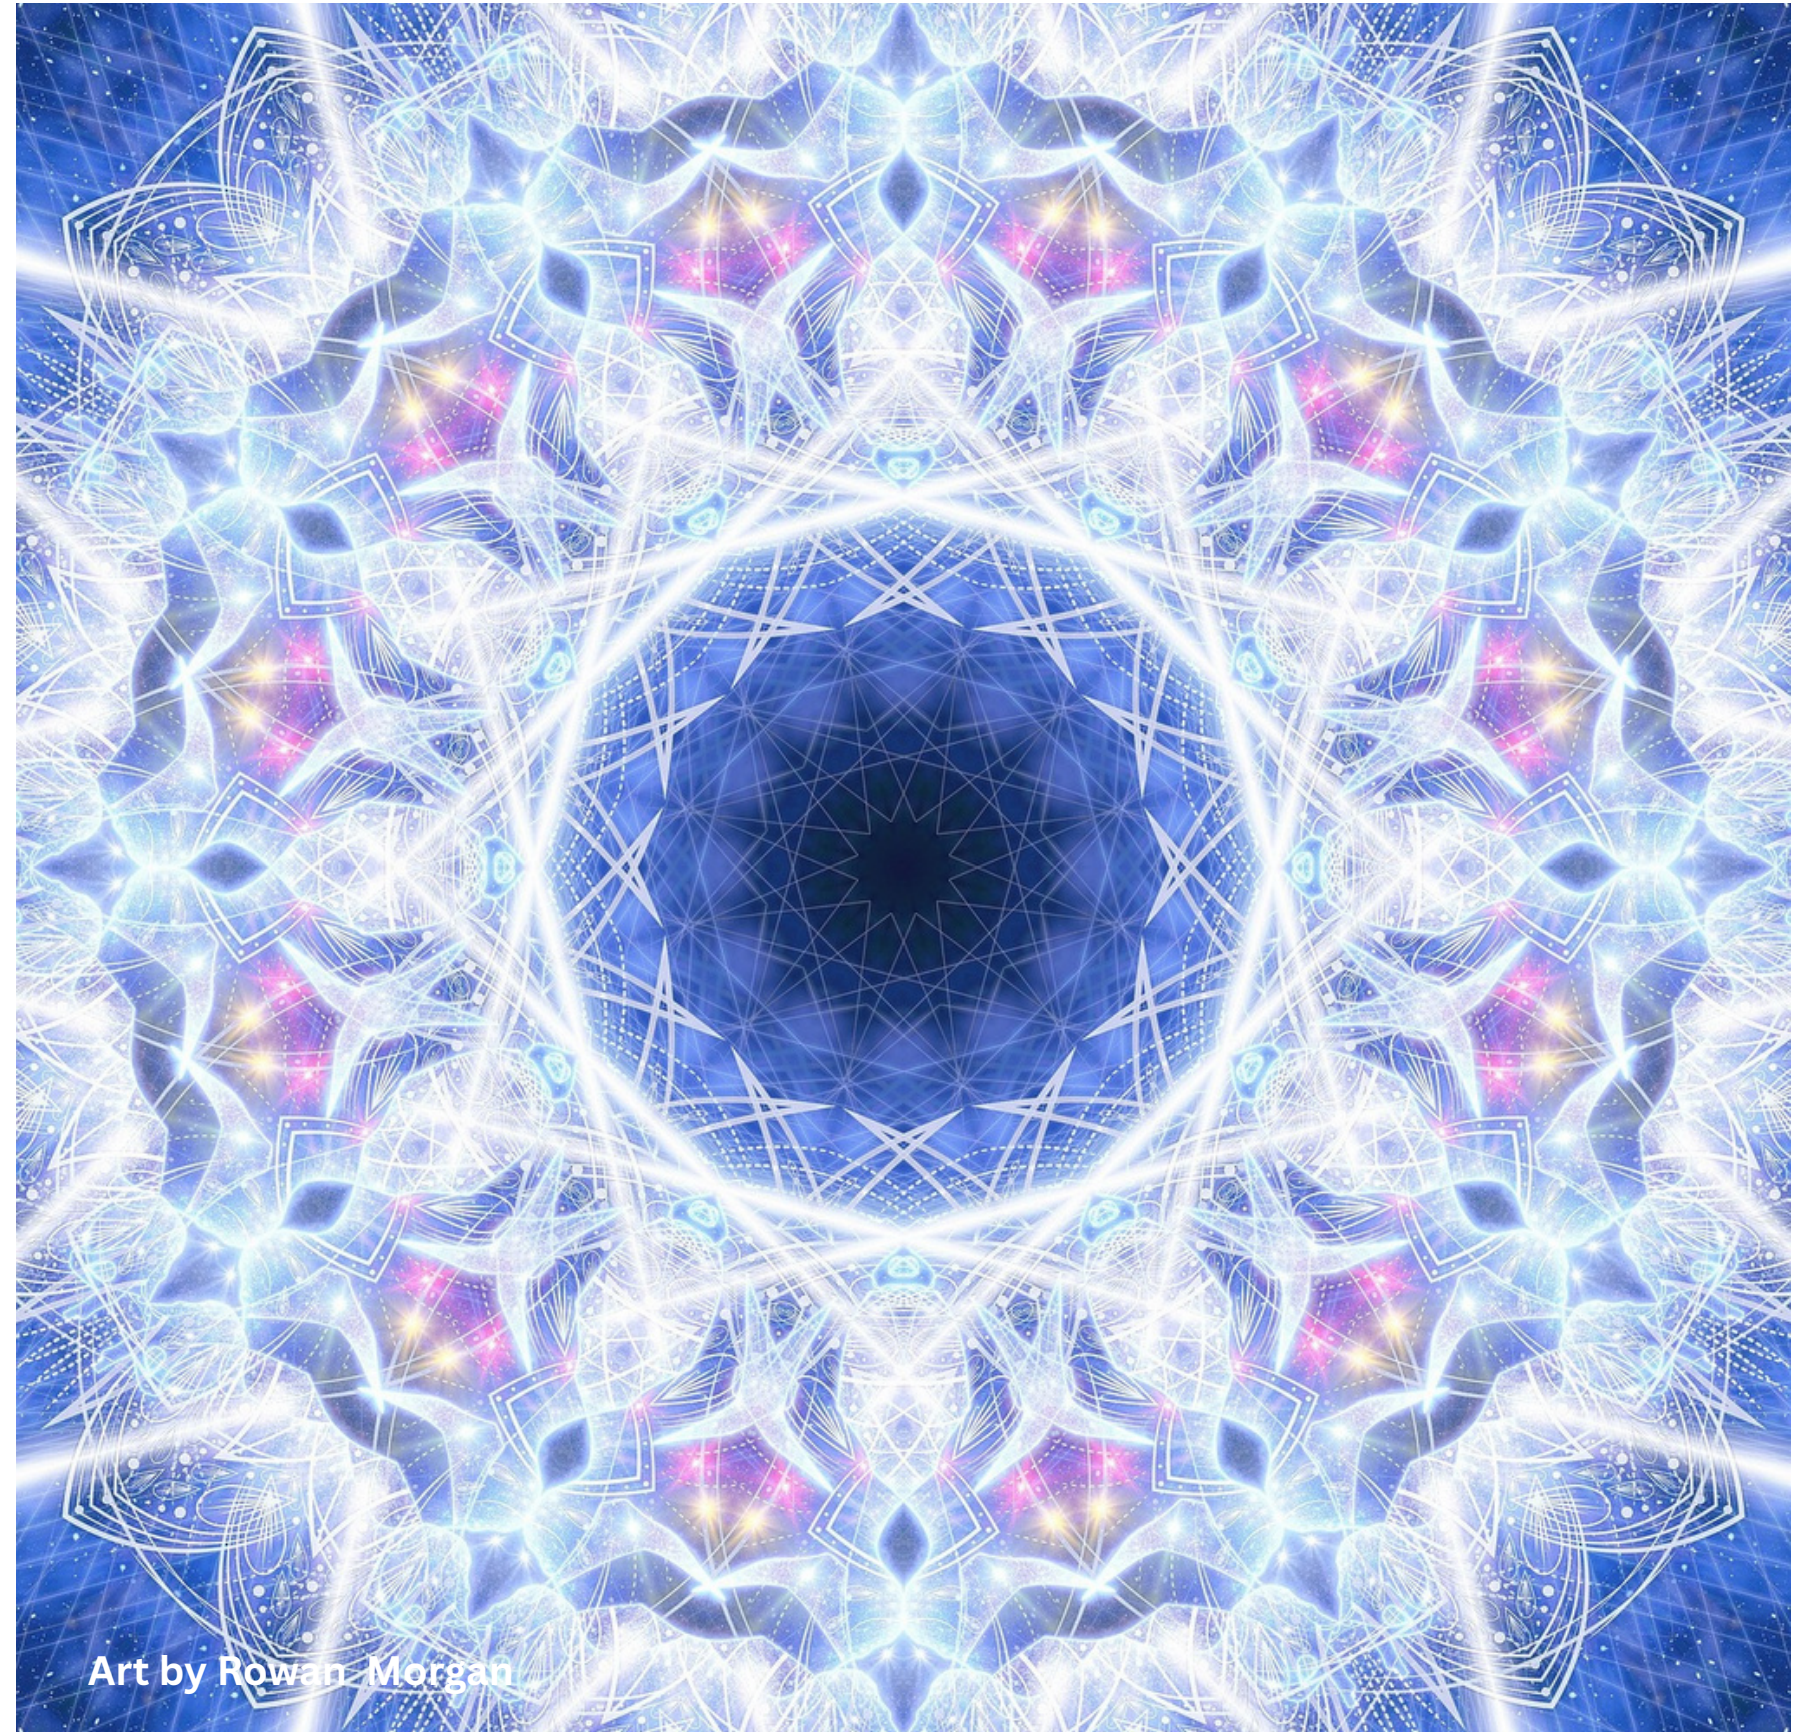

Focused discipline requires an awareness to clear any programming, mind manipulation, negative patterns, and their attachments and to take back control. We intend to have discipline over any impulsive and/or destructive thoughts or actions.

And to harness the aligned use of one's time and life force energy, without the negative ego distractions of mental interference or disruptive thoughts that are so present in this 3D world, all of which are designed to scatter our clarity and land us in mental and emotional chaos.

We call in discipline to enable effective direction and focus of our personal time and energy with clarity in all of life's circumstances.

Knowing when is the appropriate time to conserve our life force energy and discerning the right use of action. Understanding that conserving our energy and not engaging in emotional dramas doesn't allow dark forces to create more chaos between people, which can scatter our energy.

When we choose conscious discipline over our lower ego mind, we gain greater self-awareness and wisdom. Our focus becomes more efficient and creative, and our ability to align with higher consciousness is significantly elevated.
