

# TRADES & ENGINEER RECRUITMENT

Automation : Elevators : Manufacturing : Material Handling : Supply Chain : Warehouse

## **SYDNEY MAINTENANCE ELECTRICIAN / SUPERVISOR – DAY OR AFTERNOON SHIFT - \$55 per hour + Super**

30 years Maintenance Electrician / Team Leader. Strong Electrical, PLC and Telecommunications skills and experienced with installs, fault finding, repair, service and maintenance of Industrial Automation Equipment, Plant and Production Lines for the Bakery, Food, Laundry, Meat and Consumer Goods Manufacturing Sectors.

Experienced at quickly resolving Electrical, PLC , VSD, Telecommunications and production equipment faults and malfunctions and conducting reactive and preventative maintenance to optimise production output and minimise lost production time.

### **Qualifications / Education**

- Licenced Electrician
- Bachelor of Science in Electrical Engineering (1986) Technological Institute of the Philippine
- Certificate on Electrical Wiring and Basic PLC (2001) TAFE – Ultimo

### **Skills Summary**

1. Managed his own business for installation and maintenance of industrial machines and electrical and telecommunication services.
2. Supervised a team of engineering and maintenance personnel in a manufacturing company.
3. Able to read and interpret schematic diagrams and electrical circuitry.
4. Experienced fault finding and repair of industrial electrical circuits and machinery including air-compressors, hydraulic pumps, air-conditioning and refrigeration, bakery and catering equipment, industrial ovens and heating equipment and state of the art industrial washing machineries.
5. Fault find and repair of PLC controlled automated machines, production lines and variable speed drives - Allen Bradley, Siemens, and Omron.
6. Experienced working as Maintenance Electrician On-board a Merchant ship.
7. Have worked mostly on Food processing facility looking after equipment such as Multivac, Mondini. Ulma and the like.

## **Career Summary**

### **1/ Maintenance Electrician - Food Manufacturing**

Repair machinery breakdown in the production and effect repairs as necessary in a minimal downtime and perform programmed maintenance on processing and packaging equipment in a fresh food processing facility.

As Team Leader I ensure that issues of the equipment and of the people in my Team is being looked after and planning and performing of preventative maintenance activities being carried out in time.

### **2/ Maintenance Electrician – Meat**

Afternoon shift electrician to attend to breakdown calls, optimise production output and minimise a minimal downtime.

Perform scheduled preventative maintenance works according to plan. Installation works for lights and power points, variable speed drives, and machine upgrades.

### **3/ Shift Supervisor - Brewery**

Supervise and run the afternoon shift of seven people team in the filling and packaging section and the maintenance of the brewing machineries.

### **4/ Maintenance Electrician – Linen**

1. Dayshift electrician doing monitoring of the performance of industrial washing machineries, conveyors and super tracks and effect repair of any malfunction of the PLC and automations.
2. Respond to breakdown calls of productions machines and effects immediate repair to minimise downtime in the production and disruption of operation.
3. Cabling and installation of lighting and machinery power circuits.
4. Perform scheduled and routine preventative maintenance on machineries

### **5/ Optus Contractor / Telecommunication Field Technician**

Installation and maintenance of telephony, cable television and cable Internet services from the signal distribution unit at the pole to the end user equipment inside the house.

#### **AUTOMATION RECRUITMENT / LABOUR HIRE CONSULTANTS**

*We place experienced Trades, Engineers, IT, Sales, and Leaders into Automation Elevator, Manufacturing, Materials Handling, Ports, Warehouse / Logistics Jobs*

**Call John Hunt 0412 266 770 E: [john@automationrecruitment.com](mailto:john@automationrecruitment.com) .au**

## **6/ Maintenance Electrician – Snackfoods**

1. Dayshift electrician reporting directly to the Service and automation Manager, doing visual monitoring of the performance of every automated packaging machineries, conveyors and effect repair of any malfunctioning PLC or liaise to the engineering and maintenance section.
2. Respond to breakdown calls of productions machines and effects immediate repair to minimise disruption of production operation.
3. Operation and monitoring of the waste water treatment facility.
4. Cabling and installation of lighting and machinery power circuits

## **7/ Maintenance Electrician – Bakery**

1. Perform preventative electrical maintenance of bread production machine which includes industrial dough mixer and divider, proover and industrial and commercial ovens in a bread factory.
2. Monitor and maintain refrigeration temperature of cool storage room and freezers
3. Respond to breakdown calls of production machines.

## **8/ Plant Engineer Travel Master Manufacturing**

1. Supervised a team of engineering crew and a team of maintenance technician ensuring minimal technical and mechanical stoppage of production.
2. Maintained a safe and minimised equipment damage risk
3. Keeping records of repairs and programmed maintenance of production machineries and engineering equipment.

## **9/ Ship Electrical Officer**

1. Perform preventative programmed maintenance of all electrical equipment and machineries including automation and controls for Air-condition and refrigeration system, hydraulic system, and pneumatic system, and navigational system of the merchant ship.
2. Respond to duty call of operational failure of navigational equipment and machineries on-board.
3. Effect troubleshooting and repair of overhead cargo crane when it fails during cargo loading and unloading operation.
4. Monitoring the temperature of refrigerated cargo containers and repair if necessary to maintain required temperature.

### **AUTOMATION RECRUITMENT / LABOUR HIRE CONSULTANTS**

*We place experienced Trades, Engineers, IT, Sales, and Leaders into Automation Elevator, Manufacturing, Materials Handling, Ports, Warehouse / Logistics Jobs*
