Stoops Buick-GMC Inc, Plainfield, IN
Stoops Automotive Group, Inc., Muncie, IN

YOUR CONTINUED SUPPORT OF NATHAN'S BATTLE FOUNDATION IS HELPING MAKE HISTORY

Come play in the 20th Annual Nathan's Battle Invitational at Dye's Walk Country Club and hear first-hand how you are making history. NBF has continued our aggressive "not-for-profit" approach and has successfully advanced research toward therapeutic applications.

What was once thought untreatable is now being treated. Human clinical trials have begun at Cornell University to treat children with Late Infantile Batten Disease. Children from all around the world are being treated with this potentially life saving therapy. With your continued support we will save lives.

NBF is funding actual human clinical trials. A second generation advanced drug has been developed for a second clinical trial. The trial has begun but more funding is needed to treat additional children with this potentially lifesaving therapy. Your support makes a difference in the lives of these children and in the lives of future generations of children with this disease.
