

MAVAS™

Audio & Visual Combine

CLARITY IN COMMUNICATONS

MAVAS™ - Mass Audio Visual Alerting System brings the world of Mass Communications to control both audio & visual channels, providing fast delivery using our cloud-based, enterprise managed eco-system. Using the Web Portal, or Mobile App, users can create and initiate custom templates for critical, emergency, or testing purposes.

WEBHOOK INTEGRATION

Displays change to show Alert Status

Our range of streaming devices and EDGE servers offer a scalable solution for fast integration with existing access-control, audio PAVA systems, digital signage and links to Body Cams & CCTV. Full system reporting and logging for compliance.

Dynamic Alerts direct people to safety

This Connected World enables us to integrate using IP over wired and wireless infrastructure, bluetooth, etc. With our gateway API's to link with access control devices, displays, mobiles, PC's and streamers, alerts are instantly issued locally within 1 second.
