5239 BC (-1344 AM): 7344 Before Armageddon/ 3000 Before Flood/ 1 Anunnaki Chronology. This year begins the Great Year system of 600 year periods so popular among ancient chron-iclers. It represents the beginning of Earth's geometrical timelines, the start of Anunnaki Chronology, counting 2448 years three times over (7344 years) until the Anunnaki are destroyed in 2106 AD by the Chief Cornerstone at Armageddon when their power over mankind is broken. In 5239 BC the original solar system is a differential binary system with a bright and smaller luminary, two stars with the smaller orbiting the larger. The smaller star was known as the Daystar, having a series of planets orbiting it. These were a gigantic planet known to the Sumerians as NIBIRU, a planet called Phoenix by ancient civilizations and our own world, Earth. There may have been more. During this period the other luminary, a bright star at night because of the extreme distance between the sister stars, provided a soft blue illumination at night and also had orbiting it the planets we are familiar with today, planets that have never ceased orbiting it: Mercury, Venus, Mars, Electra (now the Astroid Belt), Jupiter, Saturn, Uranus and Neptune. Our planet Earth was not a part of this luminary's system until later, the result of a solar system cataclysm. The two suns served as "...the greater light to serve the day and the lesser light to serve the night," as found in Genesis though this ancient fragment incorporated into the later Genesis writings has been mistaken with that of the moon. By this time the world we call Earth is very old with the heavens filled with brilliant stars attesting to its antiquity. Starlight is an image of prehistoric heaven, not an accurate visual representation of our Universe extant in real time. On Earth prehistoric flora and fauna flourish under pristine biospheric conditions. The Anunnaki are the Builders, co-creators with the Eternal One, also called Watchers, Sons of God, Angels and they are appointed to act as teachers and guardians over a sentient race of beings that they had made, a civilization antedating the creation of homo sapiens; humanity. In this year the Anunnaki sealed their fate in planning or starting designs deemed as rebellious to the Eternal One.

"He who fears the Anunnaki will lengthen his days." (1)

1. Babylonian inscription in Religion of Egypt and Assyria p. 389 cited in Sargon the Magnificent 104

4687 BC (-792 AM): 6792 Before Armageddon/ 2448 Before Flood/ 552 Anunnaki Chronology. The Anunnaki Homeworld is called NIBIRU, an immense planet orbiting both stars. The calendrics for this year denote that something momentous occurred on NIBIRU within Anunnaki society. The space-time periods of disaster align in this year. NIBIRU's orbit is 792 years and this year is 6000+792 years before Armageddon. This is 2448 years before the Great Flood, the number 2448 being the ancient Egyptian sum representing disaster, cataclysm, as will be seen in this chronology. This is the year 552 of the Anunnaki Chronology, 552 years being a Phoenix Cycle known to the ancients as a period of time between catastrophies. NIBIRU and planet Phoenix both orbit the Daystar and travel along its ecliptic toward the other luminary four billion miles away. They approach from the south of the system where Mercury and the other planet orbit along their own ecliptic path. These differential ecliptic planes (solar equators) formed an ecliptic cross that intersects exactly where Earth orbits this star today. The Daystar, NIBIRU, Phoenix and Earth were in deep southern space underneath the solar system we call home today. This region of space to the south was known to the Sumerians as APSU, the Abyss or Deep. The original six signs of the Zodiac were viewed from this vantage point when Earth travelled a completely different ecliptic around the sun's ancient sister star, formerly aligned with the Galactic Plane. The star patterns of the Zodiac do not fit their symbolic counterparts because the origin of the Zodiac antedates Earth's present position. Because NIBIRU orbited both suns it was called by the Sumerians as The Ferry and the Planet of the Crossing. Interestingly, the width of the Subterranean Chamber below the Great Pyramid is exactly 552 Pyramid Inches.

4639 BC (-744 AM): 6744 Before Armageddon/ 2400 Before Flood/ 600 Anunnaki Chronology. The Eternal One permitted the Anunnaki access to the Records of Heaven, known also as the Tablets of Destinies or Tables of Heaven, archives concerning ancient heaven and the annals of the future, but they were admonished that they would be responsible for all they knew. The wise among the angelic hosts chose obedience and life, seeking no more than what they were inspired to learn. But others by diligent research into the future discovered that the Godhead would one day create His own ~~xxx~~ human, not by the agency of divine fire as were made the Anunnaki, but out of inferior clay. A third of the hosts of the Anunnaki took offense when they further discovered that this newer being~~s~~ made of mundane materials would actually play host to the Eternal Spirit of the Living God, than Man would become repositories of the Holy Spirit, the spiritual image of God. As the first beings created, the first born, the offended Anunnaki initiated the Daystar Rebellion and quit their services to their own PreAdamic creations. The insurgents now blasphemously required themselves to be worshipped and began teaching their creations forbidden knowledge~~s~~ and the sciences of hybridization, arcane secrets that were to remain only within the order of the Watchers. The Anunnaki Homeworld fomented war between the planets of the Daystar. NIBIRU and Earth participated in this war but if other worlds were involved is not known. The Daystar planetary system began to lose its order and the brilliance of the Daystar began to wane. The sophisticated civilizations built by the Anunnaki for their creations were ruined and cities used advanced weapons against one another. As the Anunnaki readied themselves for a great war colonies of PreAdamites were sent out to mine materials from other planets uninhabited and moons. It was their intent to prepare for the coming of Man so they could eliminate the threat as soon as mankind emerged. As this year is precisely 744 years prior to the beginning of mankind's 6000 years of banishment that began in 3895 BC, this year reflects the existence of the old Daystar in the Genesis text where we find the passage "...two great lights," being 744, their gematrical value. (1)

1. Stones and the Scarlet Thread 36

4309 BC (-414 AM): 6414 Before Armageddon/ 2070 Before Flood/ 930 Anunnaki Chronology/
1 Phoenix Chronology.

After 330 years of revolt and war the 33.3% of the Anunnaki who rebelled and enslaved the Pre-Adamites were pronounced guilty by the Word known to the Builders as the Chief Corner-Stone, excommunicated from their divine appointments. Their ranks and stations in the heavens [Government of the Eternal One] were left abandoned but their sentence was postponed, judgement delayed and was only to be executed once the number of their fallen positions were filled by those they sought to unjustly slay...mankind. The Daystar went out, the luminary becoming dark after exploding and folding in on itself as a compressed star, or frozen star. In astronomical parlance it became a Dark Star. Those planets nearest it were obliterated and have since filled the Kuiper Belt with detritus, the origin of those mysterious anomalies of rock and ice and dust we call comets. The outer world were hurled through space toward the surviving luminary, the star we call our sun. NIBIRU drifted into a 792 year orbit, 732 years below the ecliptic and 60 years above the ecliptic plane, an orbit that would continue perfectly until 2106 AD, the year of Armageddon. Phoenix was totally destroyed and entered into a 138 year orbit over the sun, spending much of its journey far out in the Kuiper Belt. ~~a~~ Earth in this year began drifting toward the sun and would not enter its present orbit for 270 years, the Earth completely frozen, the oceans solid ice. This lifeless drift is found in the Babylonian Enuma Elish text as "...long were the days, years were added."

The outer layers of the Daystar were ejected out into space to bombard its own planetary system and then heavily damage the planets and moons of our current solar system. After the initial explosion the internal core imploded and collapsed, this phenomenon changing it to become something between a black hole and a neutron star. (1) Astrophysicists assert that after a star explodes and loses much of its mass its gravitational influence

plummets and the system loses its outer planets which are hurled into space. (2)

The Babylonian Enuma Elish texts, copied from older Sumerian documents, read that Earth was originally from the Deep (Abyss: south of present position orbiting sun). (3) This early cosmological text records an ancient solar system cataclysm involving destruction of planets and their rearrangement. The Earth and its orbit, motion, constellations of the Zodiac (ecliptic plane) as now seen from Earth were not established until the Fifth Tablet, when the moon began orbiting Earth and it was ordained to "determine the days." (4) Amazingly, planet Phoenix's 45th visitation through the inner solar system was in 1902 AD when immense dust clouds and mud rained all over the world, the same year when the Babylonian cuneiform Enuma Elish records were translated into English and published with full photos of the ancient texts in an exhaustive work by L.K. King at London by Luzac & Co.

The Gnostic text On the Origin of the World discovered in 1945 AD reads that Phoenix was a witness against the powers of darkness, against the angels, and that it would endure until the Consummation [the End]. Phoenix was a witness in the heavens just as are the sun and moon (identifying it as a celestial body). The Phoenix appears as a sign of what will occur in the end times when the sun will darken and moon cease shining, the oceans become agitated and chaos erupt. (5) This refers to the Sixth Seal of Revelation when planet Phoenix transits darkening the sun initiating a poleshift in the year 2040 AD.

This 4309 BC cataclysm reflected in the Gnostic text Trimorphic Protennoia which shows that the gods [Anunnaki] were made fearful because their body of ascent [planet] was destroyed by a thunder in the Deep [southern space] caused by a great fire that overturned their Thrones [planets called Thrones by the ancients]. These Archons [Lords of Time: planetary motion] said, "...our entire habitation has been shaken, and the entire circuit of our path of ascent [orbit] has been met with destruction, and the path upon which we go." (6) This text depicts an orbit altered.

Mystic traditions published in The Holy Tablets which cite thousands of references to Sumerian and ancient Near East texts claim that the world was inhabited before Adam but was destroyed when a dust cloud hid the sun and meteorites fell upon the Earth. This ruination is why Genesis reads, "And there was darkness over the face ~~of~~ of the Deep." (7)

At this time in 4309 BC most of the Anunnaki were trapped upon their own homeworld, NIBIRU, but others were trapped upon a lunar body called the Dark Satellite. Both NIBIRU and the Dark Satellite will directly bear upon the course of human history as they near the Earth and the Anunnaki are able travel between the two for short periods. The entire inter-planetary civilization built by the Anunnaki is destroyed, including the animals they had made that we refer to as dinosaurs, gigantic reptilliam and amphibian lifeforms that flourished on Earth when Earth orbited the Daystar. Frozen solid and flooded, the entire planet became a fossil and the Eternal One cursed the Anunnaki to assume the physical forms of their own creations. When the Anunnaki appear on Earth they appear as reptilliam or amphibian with large eyes and sickly bodies

The calendrics for this year are intriguing. As this is 930 Anunnaki Chronology it parallels the age of Adam who died in his 930th year. 930 is the product of 792 and 138, the orbital periods of NIBIRU and Phoenix.

Folklorist Else Christensen studied ancient European calendrical systems and determined that the year 4311 BC began a calendar, the Zodiacal Age of the Bull. (8) This is a very amazing finding, for 4311 BC is only 2 years variance from 4309 BC. In context of over 63 centuries Christensen's calculation is virtually precise.

4291 BC (-396 AM): 6396 Before Armageddon/ 2052 Before Flood/ 948 Anunnaki Chronology/
18 Phoenix Chronology
NIBIRU enters the inner ~~sk~~ solar system 18 years after destruction of Daystar and binary system in 4309 BC. NIBIRU, over 8 times the mass of Earth, catapults the frozen Earth toward the sun, which it will begin to orbit in 252 years, positioned between the orbits of Venus and Mars. This year ~~is~~ is 396 years before Man's banishment in 3895 BC, 396 being half the orbit of NIBIRU's 792 years. Later the Anunnaki will descend and rule over mankind but this dynasty will end violently 2052 years later at the Great Flood, mirroring the future year of 2052 AD when the Anunnaki Seven Kings begin their rulership of post-apocalyptic Earth. 4291 BC is 6336 years (792×8) before the Anunnaki Invasion in 2046 AD as described in the Revelation text. This year is 4320 years (1080×4) before the start of the ~~Cym~~ Chief Cornerstone's ministry in 30 AD, the one who is called Christ. NIBIRU ascends out of the Deep, passes over the sun's ecliptic and begins its 60 year journey north of the sun.

~~4231000000~~

4236 BC (-341 AM)

This is the scholarly-accepted start-date for the Egyptian Long-Chronology. (1) This is only 73 years after the PreAdamic destruction of Earth.

1. Civilization or Barbarism? 281

4231 BC (-336 AM) 6336 Before Armageddon/ 1992 Before Flood/ 1008 Anunnaki Chronology/
78 Phoenix Chronology

NIBIRU exits the inner ~~sk~~ solar system after 60 years ~~north~~ north of the ecliptic on a highly elliptical orbit. This is 6336 years (792×8) before the Chief Cornerstone vanquishes the Anunnaki in 2106 AD at Armageddon.

4171 BC (-276 AM): 6276 Before Armageddon/ 1932 Before Flood/ 1068 Anunnaki Chronology/
138 Phoenix Chronology

Planet Phoenix enters the inner system completing its 138 year orbit passing through the system on its way back to the Kuiper Belt. Earth is not yet orbiting the sun, but is still lost in space and 132 years away from assuming an orbit between Venus and Mars.

4104 BC (-209 AM)

In 222 AD Diogenes Laertius wrote that the Egyptians claimed that their histories spanned back 48,863 "years" from Alexander the Great. (1) This is a lunar code that is interpreted by dividing this ~~sum~~ sum by 13 lunar months. Counting from 345 BC this places the start date at 4104 BC, but counting from 331 BC when Alexander defeated the Persians then the date would be 4089 BC.

1. Secret Cities of Old South America 56)

4039 BC (-144 AM): 6144 Before Armageddon/ 1800 Before Flood/ 1200 Anunnaki Chronology/
270 Phoenix Chronology/ 1 orbital Chronology

Planet Earth drifts into the solar system after 270 years frozen ~~sk~~ solid, free of the Dark Star's gravitational hold. Earth begins to orbit the sun tucked unusually between the orbits of Venus and Mars which disrupts the equidistant mathematical distribution of the planets as measured from the surface of the sun, revealed in the Titius-Bode Law. Earth's distance from the sun reveals that it is an intruder planet. The planets already orbiting the sun were priorly damaged by detritus from the explosion of the Daystar. At this time there are Anunnaki on Earth and they participate in Earth's renovation.

Ancient Akkadian cosmology has the moon preexisting the sun. (1) This is confirmed in the Egyptian Turin Papyrus (2) and Mexican traditions claim that Venus existed before the sun. (3) The earliest known Sumerian tablets (circa 3500 BC) recall that when the gods called the Anunnaki came to Earth they ~~did~~ found it covered in a dense cloud cover—"Daylight did not shine, moonlight had not emerged." (4) Amazingly, according to the Vedic Rig-Veda the proximity of a heat-source to a water-covered world was what brought Earth back to life. (5) once in orbit around the hot sun the Earth began to roll, what we term at rotational spin on its axis as found in Genesis 1 where "...the evening and the morning were the first day." This spinning begins the rapid renovation of Earth as it thaws out. Billions of marine, amphibian and reptilian lifeforms emerge from their dormant stasis after the world had been quick-frozen 270 years earleir.

The Anunnaki create humankind at the end of a 600 year period according to the writings in The Holy Tablets. (6) This conforms nicely to the 600 year periods of the Anunnaki Chronology. In fact, it was long ago taught that a "divine man" would arise every 600 years throughout world history. (7) As will be shown, several famous figures throughout history were born at these intervals. Mankind according to the Enuma Elish was created in the Sixth Tablet (8), just as in Genesis humans were made in the sixth day.

The start of Man in this year is encoded in the first verse of Genesis, which reads, "In the beginning," the word "beginning" derived from a root (kedem) which has the gematrical value of 144, carrying with it the idea of eternalness. (9) This year of 4039 BC is 144 years before Mankind is banished from paradise (Walled Enclosure), called Eden, in 3895 BC, which begins a 6000 year timeline to Man's Redemption in 2106 AD with the return of the Chief Cornerstone. Homo sapiens sapiens is a genetically-improved creation by the Anunnaki from preexisting lifeforms made extinct in the cataclysm of 4309 BC. But this time the Eternal One through His Word intervned and breathed the Spirit into mankind thus making humanity in the image of God, thus taking away the total control of the Anunnaki who sought to create a planetary slave race of workers. For this reason the Anunnaki, as Watchers, have regarded their own Maker, the Eternal One, as a ~~king~~ thief. Humanity would have the knowledges necessary to discern between good and evil. The only command given to humanity is "...be fruitful, and multiply and replenish the Earth." It is this statement that that reveals that Earth was formerly inhabited. Man's creation in 6th day denotes his appearance after a period of 144 hours (6 days). The units of measurement known as the day, the month and the year are measurements of mechanical time, the axial rotation of the Earth, the revolution of the moon around the Earth and that of the Earth around the sun. But the period called the week was by divine appointment not represented by mechanical time. Seven days.

The Great Pyramid's surface sloping angle with its casing blocks in place was precisely 51'51" which matches geometrically the true length of the year in sabbaths (7 day periods). The year is 51.51 weeks at this time, being 360 days. The year will remain 360 days in length until another disaster in 713 BC which alters Earth's orbit to 365.25 days. This year of 4039 BC begins Earth's Orbital Chronology, a timeline of our planet discovered by David Davidson in the geometrical measurements between the Great Pyramid's four cornerstones and published in his enormous book, The Great Pyramid: Its Divine Message, published in 1924 AD. Davidson declares that the astronomical chronology in the Great Pyramid's measurements began in 4040 BC and ends in 2045 AD, which would be the end of a timeline involving our planet. He is only 1 year off (4039 BC & 2046 AD). Davidson knew nothing about NIBIRU or about Earth being an intruder planet. As will be found in this research, in 2046 AD Earth will be moved away from its current orbital path around the sun and this transposition will alter the length of the day and year. The Great Pyramid's Orbital Chronology measures the 6084 years between 4039 BC and 2046 AD that Earth remains in a stable orbit along the sun's ecliptic. It will not remain here.

4033 BC (-138 AM): 6138 Before Armageddon/ 1794 Before Flood/ 1206 Anunnaki Chronology/
276 Phoenix Chronology

Planet Phoenix enters the inner system completing its 138 year orbit passing through the system on its way back out to the Kuiper Belt. This was 6 years (72 months) after the appearance of Man, counting 1656 months (414x4) or 138 years to Man's Banishment from Eden in 3895 BC.

6000 Years of Man's Banishment

3895 BC (1 AM): 6000 Before Armageddon/ 1656 Before Flood/ 1344 Anunnaki Chronology/
414 Phoenix Chronology/ 144 Orbital Chronology

In Man's 144th year in the Walled Enclosure (Paradise) a chief among the Anunnaki Watchers, a Seeing One, or Interpreter called a serpent in Genesis, misleads mankind into doubting the Word of the Eternal One. Humanity in Eden had been given the discretion to live free from doubt and constraints, but by listening to the Interpreter, mankind fell under the power of those that defined for them good and evil. Once ~~xxx~~ mankind's eyes were opened (sinister intent of the Anunnaki), humanity was no longer beyond good and evil and was from that point onward a slave to their own conscienciousness. Now his conscience his guide, mankind is cursed to condemn himself. With their eyes opened, according to a Gnostic text, the first humans "...saw their makers, they loathed them since they were beastly forms." (1) This supports the finding that the Anunnaki were changed by the Eternal One to mirror their original creations, the reptiles and amphibians of the pre-historic period. Man is cursed and sent out into the Earth for 6000 years until the return of the Chief Cornerstone Who the Builders (Anunnaki) rejected. The 6000 years will be reconfirmed in several astonishing ways in this research. The 6000th year is 2106 AD, the exact year that NIBIRU, the Anunnaki homeworld, will pass close to Earth on its way back out of the inner solar system.

Banished into the wild, mankind attempts to go back to the Walled Enclosure but the appearance of a "fiery flaming sword," prevents this, held by an angelic guardian. The account has promoted much confusion. Celestial bodies like comets and unknown planets that gave off tails in the sky were referred to as swords as seen in Scripture, in the writings of Josephus and Pliny. (2) In this year planet Phoenix entered the inner solar system completing its 138 year orbit passing through the system on its way back to the Kuiper Belt. It is the visual appearance of planet Phoenix that signalled the start of the 6000 year timeline and set in stone the association in antiquity between comets and celestial bodies and JUDGEMENT ON EARTH which will culminate until Phoenix initiates an apocalyptic event darkening the sun in 2040 AD and initiating a poleshift disaster that is referred in Revelation as the Sixth Seal. Another name for Phoenix was Typhon, a name preserving [Phoen]ix as seen in Ty[phon]. Plutarch relates that Typhon was reddish and Massey wrote that the ancients wrote a lot about a celestial body with a red tail. (3)

The palm tree long ago was a symbol of the reckoning of time, and in Hebrew the palm is phenice, with ancient roots resolving to fo en ix, or One Great Fire. ~~xxx~~ (4) The palm branch was a symbol for time and periodicity. Horappollo wrote that it was adopted as a symbol for the month. ~~xxx~~ Time was reckoned by plucking off the shoots on a palm branch. (5) In Assyria the palm tree was the Tree of Life, also identifiable as a flaming column and it is found often encoiled by a serpent. The palm [Phoenix] merges all of these concepts. (6) Phoenix is the planet of chronology.

That Adam was 144 years old when banished is reflected in the Kabbalistic tradition, and he is assigned the number ~~1444~~ 144. (7) Adam in Hebrew is ADM. The A has a value of 1, the D is 4 and M is 40, but zero has no value. The sum of ADM is thus 1.4.4. (8) In old Assyrian and Akkadian tablets the word ADAM is found used as a proper name. (9) The Curse humanity suffers is elaborated on by the prophet Ezekiel who wrote that the Four Judgements God employs against mankind to curb sin and rebellion throughout world history are SWORD, FAMINE, PLAGUE and WILD BEASTS. (10)

This year begins a 1948 year countdown to the birth of Abraham, who will father many nations. This 1947 BC birth counts another 1948 years to 1 AD, the start of a whole different calendrical system. In the 1948th year of this new Anno Domini calendar the nation of Israel will be reestablished. Additionally, this is the year 1344 Anunnaki Chronology, 1344 a product of 792 and 552. NIBIRU's orbit is 792 years and Phoenix Cycles dreaded in antiquity were 552 years, or 4 orbits of 138 years each. In the year 1860 AD W. Morgan calculated the Druid precessional system which began when the equinox occurred in the first point of Taurus, his calculation being 3903 BC. (11) This is an amazing feat, for in over ~~57~~ 57½ centuries Morgan was only 8 years off. After extensive research of the biblical records, the Book of Jasher and Assyrian Eponyms, chronologist Stephen Jones in his Secrets of Time published that this year, 3895 BC, was Year One so highly regarded by the Ancient World. This 6000 year timeline had NOTHING to do with the Creation, but is a fixed astronomical chronology that began with the appearance of planet Phoenix in 3895 BC, the first time humans witnessed it, and ends in 2106 AD when planet NIBIRU exits the solar system. The geometrical framework of world history unfolds within the perimeters of the visitations of these two intruder planets.

3880 BC (15 AM): 5985 Before Armageddon/ 1641 Before Flood/ 1359 Anunnaki Chronology/ 429 Phoenix Chronology/ 159 Orbital Chronology

According to the ancient Book of Jasher Cain and Abel were twins, Cain slaying Abel when they were 15 years of age. This story immortalized the worldwide legends of the Twins always at war with another. By this time Chevah (Eve) had two or three more children, daughters. Abel was the firstborn and first murdered ~~the~~ human, foreshadowing the atonement of the Messiah in the person of Christ, also called Shiloh. This was 3880 years to the start of the Anno ~~Domini~~ Domini calendar (Year of the Lord) and the gematrical value for Shiloh comes is 3880.

3765 BC (130 AM): 5870 Before Armageddon/ 1526 Before Flood/ 1474 Anunnaki Chronology/ 544 Phoenix Chronology/ 274 Orbital Chronology

As humankind rapidly multiplies Seth is born, chosen by God to carry on the Messianic bloodline and be the future patriarch of the Sethites who construct the Great Pyramid complex at Achuzan (Giza). Adam and Eve had many other children. (1)

3757 BC (138 AM): 5862 Before Armageddon/ 1518 Before Flood/ 1482 Anunnaki Chronology/ 552 Phoenix Chronology/ 282 Orbital Chronology

Planet Phoenix passes through the inner solar system on its 138 year orbit of the sun on its way back to the Kuiper Belt.☐

3725 BC (170 AM): 5830 Before Armageddon/ 1486 Before Flood/ 1514 Anunnaki Chronology/
584 Phoenix Chronology/ 314 Orbital Chronology

At 40 years old Seth begins ruling over the Adamites, establishing a kingdom. The early Egyptians venerated him as Set and only late in Egyptian antiquity as newer gods came in vogue was Set (Seth) demonized, falling into disrepute. The Sethite kingdom and center of preflood civilization was in Egypt.

3671 BC (224 AM): 5776 Before Armageddon/ 1432 Before Flood/ 1568 Anunnaki Chronology/
638 Phoenix Chronology/ 368 Orbital Chronology/ 1 Jewish Calendar

The Jewish Calendar begins from "...the years that have passed since the counting of years began." (1) This was the 54th year of the reign of Seth. This calculation could be the result of rabbinical error or Seth could have instituted a calendar in his 54th year. There is calendrical evidence that this begin-date for a timeline was intentional.

1. Flying Serpents and Dragons 103

3619 BC (276 AM): 5724 Before Armageddon/ 1380 Before Flood/ 1620 Anunnaki Chronology/
690 Phoenix Chronology/ 420 Orbital Chronology/ 52 Jewish Calendar

Planet Phoenix passes through the inner solar system on its 138 years orbit on its way back out to the Kuiper Belt.

3615 BC (280 AM): 5720 Before Armageddon/ 1376 Before Flood/ 1624 Anunnaki Chronology/
694 Phoenix Chronology/ 424 Orbital Chronology/ 56 Jewish Calendar

Mankind begins falling away from the teaching of Seth and Adam, beginning to worship the creation rather than the Creator. This completes 7 generations, a generation being 40 years. Prior to this time there was virtually no strife or crime and this period is remembered in the Japanese Way of the Gods traditions. The account is recorded by Josephus in Antiquities.

3530 BC (365 AM): 5635 Before Armageddon/ 1291 Before Flood/ 1709 Anunnaki Chronology/
779 Phoenix Chronology/ 509 Orbital Chronology

Cainan, son of Enosh, begins ruling the Adamites at age 40, ending Seth's reign of 195 years. Cainan is wise and knowledgeable, famous for his power over spirits and demons. He was troubled by premonitions of a future disaster, the drowning of the entire world. (1)

1. Jasher 2:11

3499 BC (396 AM): 5604 Before Armageddon/ 1260 Before Flood/ 1740 Anunnaki Chronology/
810 Phoenix Chronology/ 540 Orbital Chronology

The Anunnaki planet NIBIRU enters the inner solar system for the first time in human memory, emerging from southern space to begin its 60 year pass north of the ecliptic plane to finish its 792 year orbit. NIBIRU is inhabited.

3481 BC (414 AM): 5586 Before Armageddon/ 1242 Before Flood/ 1758 Anunnaki Chronology/
828 Phoenix Chronology/ 558 Orbital Chronology/ 190 Jewish Calendar

Planet Phoenix passes through the inner system 18 years after NIBIRU passed over the ecliptic in the inner system. Both planets travel along the Dark Star's ecliptic between Venus and Earth. Phoenix continues on its 138 year orbit back into the Kuiper Belt. This is the 49th year of the reign of Cainan.

3468 BC (427 AM)

Chinese traditional date of the birth of a prophet named Fuh-Ke who foretold of the coming of a Savior. (1) This anachronism may refer to Enoch who is born 195 years later.

1. The Secret Doctrine 68

3439 BC (456 AM): 5544 Before Armageddon/ 1200 Before Flood/ 1800 Anunnaki Chronology/ 870 Phoenix Chronology/ 600 Orbital Chronology
 NIBIRU completes its 792 year orbit after passing for 60 years over the ecliptic, north of the sun's position, and passes dangerously close to Earth. The Jasher records reads, "And in the days of Enosh...the Lord caused the waters of the Gihon to overwhelm them, and He destroyed and consumed them, and He destroyed a third part of the earth...and there was no food for the sons of men and the famine was very great in those days." (1) Hebrew tradition hold that there was many earthquakes, drought and famine in the days of Enosh (2) and in the Jewish Haggadoth text we find that this flood in Enosh's day occurred before the famous Flood of Noah. (3) The Yezidis of Asia preserve traditions of a flooding more ancient than Noah's, stating that the world was flooded twice, the second flood by far the worse. (4)

Moses Maimonides wrote that in the days of Enosh men began to build temples to the host of heaven, venerating the stars as deities and the Old One, the Creator, over time, was forgotten. (5) The worship of the Anunnaki from the stars, called Watchers, is the theme of the older portions of the Book of Enoch. The Greeks remembered the Anunnaki as Annedoti who were believed to have descended to Earth at 4 different times long ago interacting with men. (6) The Holy Tablets, fragments borrowed from Sumerian and Babylonian texts, indicate that the Anunnaki were imprisoned on NIBIRU, but were able to get to Earth after a 60 year period. (7) In the Book of Enoch it was 200 Watchers that came down to Earth (8) and their leader, Azazyel, was guilty of "...disclosing to the world all the secret things which are done in the heavens." (9)

Zechariah Sitchin remarks in his The Wars of Gods and Men that Sumerian texts over and over refer to a starting point in the chronicles of the Anunnaki that began 432,000 "years" before the Deluge. Sitchin cites a text excavated from the ruins of ~~Sumer~~ Sumer concerning the descent of a god ~~named~~ named EN.KI to Earth at that time which reads, "When I ~~approached~~ approached Earth, there was much flooding..." (10) Sitchin's research confirm this 3439 BC date as the descent of the Anunnaki to Earth. In his End of Days book he relates that the Sumerian writings claim that the Anunnaki appeared on Earth when NIBIRU orbited close to our planet 432,000 "years" ~~before~~ before the Great Flood. (11) But this 432,000 years is a mistranslation commonly done with ancient Near East ~~texts~~ texts, for these are not 432,000 years but 432,000 days. Precisely 1200 years of 360 days each, as seen in this chronology, the Great Flood date is fixed by the Phoenix orbit and is exactly 1200 years before this descent ~~in~~ of the Anunnaki in 3439 BC. In Hamlet's Mill by Giorgio de Santillana and Hertha von Dechend we see that the number 432,000 seems to be where science and myth merge, this number significant in the mythological systems around the world. (12)

The architecture of the Great Pyramid demonstrates this date of 3439 BC. Astronomer Royal for Scotland, Charles Piazzi Smyth, in the 1870s during his research on site at the Great Pyramid, determined for unknown reasons that the Descendant passage of the structure which goes all the way below the pyramid pointed directly at Alpha Draconis (the Eye of the Dragon) in 3440 BC, the pre-flood pole star. (13) This is only a 1 year variance from 3439 BC. This assessment was later reconfirmed by Davidson in his mammoth book in 1924, The Great Pyramid: Its Divine Message. ~~(14)~~

The Anunnaki bound themselves with a mutual curse, accepting that they were adding more judgements upon themselves when they planned to teach mankind all the forbidden knowledges and sciences. When they appear among men they are rejected by the Sethite survivors but are taken in by the Cainites who give them their daughters in exchange for their aid and knowledges. The Watchers taught mankind herbalism, sorcery, incantations, power over evil spirits (ghosts of preAdamic people) and the Watchers fathered hybrids that grew to astonishing sizes, great giants called the Nephilim. Mankind learned forbidden practices against animals, metallurgy, weaponsmithing, how to craft killing machines, the creation of jewelry and feminine cosmetics, stellar and lunar astronomy and astrology. (14) Their
