not 65 million years ago and the scientific testing of radioactive materials and their decay-rates does not take into account the contamination of radioactivity that occurred in 4309, 2239 BC and other disasters of interplanetary origin.

Prior to the Great Flood the planet was more spherical than it is today. The crust of the planet was not fractured into plates as it is today. The Earth was literally broken at the Flood and the equatorial bulge was formed from the immense stress and pressure. The 7920 mile diameter of the planet became 7925 miles and the planet no longer spun around a perfect 90° axis as do the other planets closer to the sun. Earth's axis was tilted at 23° inclined toward the ecliptic. Intriguingly, this 23° tilt reflects the history of the Earth's precessional motion. Because the ~~retrogression~~ retrogression of the precession of the equinox is 1 degree every 72 years, in the year 2239 BC (1656 AM) the Earth has gone backward a total of 23° (1656 years) since man's banishment from paradise in 3895 BC. The tilt of the earth now supports the maintenance of the polar caps and is the reason the world experiences seasonal changes, a fact unknown to the preflood greenhouse.

The Genesis record of the Great Flood provides us another source of proof that the years in the antediluvian world were reckoned at 360 days. We are told therein that the Flood lasted five months and that these five months were 150 days. (22). This reveals a 30-day month, 12 of which would be a year (360 days).

More amazing archeological and scientific proof of the Deluge will be found throughout this research.

The Great Flood over, water covering the entire world for almost a year, the planet baptised. The Ark comes to rest at the summit of Mount Ararat in ~~the~~ modern Turkey at over 12,000 ft. elevation today. Through the course of human history men will visit the secluded site and see the herculean structure many times. The structure is encased in a solid glacial cap, has been studied, photographed and even been the subject of U.S. Intelligence reports. These details will be found throughout this research.

The waters of the Deluge were dried up "...in the ~~sixth~~ six hundredth and first year, the first ~~of~~ months, the first day of the month," the very moment another Great Year of 600 years began. (1) Enoch had been told by God long before that there would be survivors of the Flood, that "All the sons of men shall not perish in consequence of every secret by which the Watchers have destroyed, and which they have taught, their offspring." (2) Every human survivors was a descendant of Enoch. Noah was the great grandson of Enoch through Methuselah and Lamech. Naamah, Noah's wife was the daughter of Enoch. The three sons of Noah were married to the three daughters of Eliakim, son of Methusalem, son of Enoch.

By this time Noah was growing grapes and making wine. In this year the youngest son of Noah and Naamah when Noah is drunk and asleep, Ham, enters the bedchamber. It is not related if he too was drunk. Ham, captivated by the beauty of his mother, Naamah, lies with her. Japheth and Shem are made aware of the trespass and they cover Naamah's nakedness by walking backwards with a blanket so as not to view her body. In antiquity it was a curse to see your father's nakedness, which was the unclothed flesh of his wife. When two sexually unite in marriage they become one flesh. Even in later Israelite law the nakedness of one's father concerned the bodies of his wife or concubines. Naamah is impregnated and the matter is discovered to Noah. When Canaan is born Noah curses him through the sexual deviancy of Ham. That Ham was not cursed indicates that Naamah's participation was either consensual or she had opened an occasion for her son Ham to believe she was willing. (1)

Ham would later become the king over all humanity in 2012 AD but after 65 years of reign he would be deposed by Nimrod and castrated. In Greek mythology Ham is remembered as Cronus. His son Canaan through Naamah would father seven nations that would later intermarry with giants and ~~s~~ assume the curses against the Nephilim and Anunnaki. This is the 868th year of the Kali Yuga, or Black Age timeline, 868 being 434x2. The period of 434 years is a Judged Time epoch. Interestingly, this year is also 4340 years (434x10) to Armageddon when the curse will be lifted and mankind redeemed by the Chief Cornerstone. Calendrically we see here how the Vedic timeline of India is related to ~~MM~~ Ham, thus the population of ancient India were also his descendants, prior to the Aryan invasions.

The historian and childhood friend of Alexander the Great of Macedon was Calisthenes. They were related to one another and both had been students of the famous ~~Axxx~~ Aristotle. Calisthenes studied the ancient records of Babylon when the Macedonian occupied the city to determine the nation's antiquity. This was performed in 330 BC and Calisthenes concluded that Babylon's astronomical records spanned back 1903 years (targeting 2233 BC). This is only 6 years off from the Flood year of 2239 BC.

Naamah is 700 years old, Noah 618. She is still youthful and very beautiful and the oldest human alive. Scattered traditions from distant antiquity, for example, the stories of Bochica, an ancient American Noah, have his wife as a very sexually promiscuous and wicked woman who continually stresses out her holy husband. By this time she has given birth to other sons of Noah, among them one named Arba, the father of the world-famous Anak. This was the 120th year of their marriage since 2341 BC.

2200 BC (1695 AM)

The Roman historian Marcus Varro estimated that this was the year of the Flood. (1) This is only 39 years off. The Deluge traditions also concern planet Phoenix and the Phoenix Cycles of 552. As we will see, Varro was somewhat knowledgeable about this connection as will be seen in 1687 BC.

Ancient Frisian text called the Oera Linde Manuscript provides a very graphic description of the Flood and attendant disasters. The date of its last composition was 1256 AD, but even then it was admitted that the text was already very old. The copyist wrote that they made their own copy of it 3449 years after the Flood. (1) This is only 45 years off.

2179 BC (1716 AM)

The Toltec Water Sun Age ends with a terrible Flood according to the Spanish-Aztec historian Ixtlilxochitl in the year 1716 of the ancestor's timeline. (1) This is simply a chronological error of the part of early American historiographers. The Toltecs knew that the Flood occurred in the 33rd generation, which the pre-flood generations were 50 years, being equal with the later Hebrew jubilees. The Flood happened 33.3 jubilees into the Antediluvian World's calendar (Annus Mundi), or 1656 years. But the early Americans from whom the Toltecs received their calendars reckoned generations as 52 years, like those of the Mayan Long-Count, the Olmec and the Maya Itza Temple of the Cross calendars. The date 1716 was obtained by multiplying 33x52 to get 1716. In fact, they got carried away with this method of dating as found in that the early Americans dated the Tower of Babel incident at 104 years (52+52) after the Flood at the site of Anahuac in archaic Mexico, though the events were really 340 years apart (2239-1899 BC). These early chronologists further wrote that they arrived in the Americas 520 years (52x10) after the Tower dispersion, long after their ancestors survived the Flood in a box. Intriguingly, they settled in a place called Huanaco (Hu Anak) (2), a place named in commemoration of the Anunnaki.

The Ancient Earth-Killer Comet Group passes over the ecliptic ~~at~~ after 66 years (792 motns) north of the ecliptic on its elliptical orbit, the detritus of NIBIRU, completing its 396 year orbit. The calendrics for this year are intriguing. This was the 1200th year of the Olmec Calendar, or 432,000 days, and 930 of the Vedic, or ~~792+138~~ 792+138, the orbital periods of NIBIRU and Phoenix combined.

~~Chinese records indicate that the sun darkened in this year during Emperor Chang's reign and his astrologers were executed for not having predicted it. (1) Because of the slight disparities in the dating of other close events before and after the Flood by the early Chinese it is a good possibility that this sun darkening occurred in the year 2101 BC, the exact year Phoenix appeared for the first time since the Great Flood. From this time forward throughout the Old Bronze Age and the Late Bronze Age the ancients were terrified of Phoenix. That the darkening of the sun was expected to be predicted lends credit to the later evidence seen in 1135 BC and 583 BC that the precise orbit of Phoenix was known to astronomers long ago. The theory that these sun darkenings concerned eclipses does not merit our attention in regards to Phoenix. At this early date eclipse prediction was nonexistent.~~

Since the mid-19th century AD researchers of the unique alignments of the Great Pyramid have noted that the scored lines of the Descendant Passage point at the star Al Cyone at about the year 2141 BC. (1) This was cited by E. Raymond Capt, and many decades later it was again calculated at 2141 BC by others. (2) The star Al Cyone is in Taurus, the Bull constellation, and Al Cyone means The Center. This is of epic importance. John Landseer, reporting for the Royal Institute of Great Britain, Society of Antiquarians reported in 1822 AD that Chaldean astronomical revelations convey that a conjunction of planet Jupiter and the sun occurred at the boundary between the zodiacal houses of Taurus and Aries happened in about 2141 BC, marking the end of the Age of the Bull and start of the Ram Age. (3)

The actual date in 2 years later, in 2139 BC, as borne out in the calendrics. As Al Cyone marks the Center, we see that this year is the Epicentral Year for an amazing Isometric Projection. This year was 2170 years after the Phoenix Chronology began with the total destruction of the PreAdamic World in 4309 BC by the appearance of God executing judgement. Counting 2170 years after this central year identified in the chronometry of the Great Pyramid was 32 AD, which marks the appearance of God again on Earth. Confirming this amazing timeline is the fact that 2170+2170 years is exactly 4340 years, or ten Judged Time periods of 434 years each. Judged Time epochs are the subject of the compelling research of biblical chronologist Stephen Jones in his Secrets of Time. In 4309 BC the Chief Cornerstone that the Builders (Anunnaki) rejected destroyed the world of their creation, and 4340 years later He appeared on Earth among men to finalize His work of judgement.

Chinese records indicate that the sun darkened in this year during Emperor Chang's reign and his astrologers were executed for not having predicted it. (1) Because of the slight disparities in the dating of other events before and after the Flood by the early Chinese, who described the same events, it is a good possibility that this sun darkening occurred in 2101 BC, the exact year Phoenix appeared for the first time after the Deluge. From this time forward throughout the Old Bronze Age and Late Bronze Age the ancient were terrified of Phoenix and the reappearance of this celestial object that immersed with the sun was predicted several times through history (see 1135 BC and 583 BC). Eclipses prediction was too sophisticated at this early date.

Naamah is 800 years old, beautiful and regarded by those after the Flood as a Mothergoddess, known to be the oldest living human. By this time she has given birth to Semiramis, destined to be remembered as the most famous and sexually promiscuous woman of Babylonian antiquity. By this time ~~s~~ Naamah has scorned Noah. Her death is not known but Enoch's progeny lived on average between 930 and 969 years.

Cainan went out and discovered a monument of some kind from before the Deluge covered in inscriptions left behind by the Anunnaki, their offspring, the giants. Cainan translated these writings and learned that they concerned the motion of celestial bodies but he hid

this knowledge and discovery from Noah at the time because Noah preached against the knowledges and science of the Watchers. This date has calendrics aligned perfectly with other Anunnaki and Nephilim timelines. This is the 720th year of the Anunnaki Dynasty that began at Noah's birth, the year of the Oppression over the Sethites. That was the year 1056 Annus Mundi, and the discovery of the antediluvian knowledges on astronomy is exactly 4224 years before Armageddon when the Anunnaki are defeated, or 1056x4. This was 1320 years after the descent of the Anunnaki in 3439 BC, or 15,840 months (7920+7920). This year is a beginning as suggested by the year 1776 Annus Mundi, 120 years after the Flood, 120 years being 1440 months. Cainan was a son of Arphaxad, who was the son of Shem. (1)

Planet Phoenix makes its first reappearance in the inner solar system after the Flood finishing its 138 year orbit on its way back out to the Kuiper Belt. This may have been recorded by the ancient Chinese. see 2137 BC. This is 2208 years, or 552x4 after the destruction of the PreAdamic World. From this date on Phoenix will be observed only in late April and May.

Scholars are in agreement that reliable dating of events in the Near East begin at this period, research conducted from the study of Sumero-Babylonian King-Lists, Assyrian Limmu-lists, astronomical records, Egyptian papyri and monumental evidence. The Sumerian King-List reveals that after the Flood the First Dynasty of Kish was 23 kings ruling 24,510 shars (evenings and mornings), or 68 years on the old 360-day count year. This means that these kings each took turns ruling over the people for 1080 days, or 3 years, with a 24th king ruling for 30 days before being "cut off." The shar is translated as "a perfect circle," or ~~completed circle~~ "completed circle." (1)

In this year Ham became king over humanity, 226 years after the floodwaters had dried up. The families of Ham, Jepheth, Shem and the other sons and daughters of Noah and Naamah were becoming populous. Ham is remembered as Belus, Chem, Cronus, Amon, Ammon and Anam would rule for 65 years until violently deposed in 1947 BC by Nimrod, who was known in antiquity at Sumer at AMAR.UDA.AK and later Babylonian as Marodak, or Marduk. Nimrod is the grandson of Ham. This year beginning his kingship was 223 years after he violated Naamah in 2235 BC, 223 years being 80,280 days, encoding the Cursed Earth sum of 414, which is found twice in 828. This 80,280 days (828) reflects the curse of Canaan for Ham's sexual trespass, and further demonstrating the curse is the fact that when Ham violated Naamah it began a 828 year countdown to 1407 BC when the Israelites would slaughter the seven nations of Canaan and occupy the Land of Promise. According to the early Greeks the reign of Cronus was a Golden Age of peace and prosperity when people never grew old. (1) This is paralleled in the genealogies of Genesis and Jasher. People born ~~and~~ after the Flood lived for at the most four hundred years, with human longevity declining rapidly afterward.

Cush, the son of Ham the king (25th year of reign) took a new wife, one of the beautiful

and tall daughters of Noah and Naamah born after the flood named Semiramis. By this time after the cataclysm 252 years earlier there were thousands of people, this 252 years paralleling the 2052 years Earth had been orbiting the present sun since 4039 BC. Semiramis gave birth to Nimrod. (1) Her brothers would go on to become famous because of their huge size and pedigree. These were the offspring of Arba, a son of Noah after the Flood, who fathered the famous Anak from which the Anakim got their name. These were considered giants because they grew taller and bigger than, having been born directly from Naamah and Noah, not their sons Japheth, Ham and Shem. The biblical records of the Old Testament record many passages concerning the Anakim, a name attributed to them because of the known histories of the gigantic pre-flood Anunnaki. Anak was named in this fashion. By all accounts humans prior to the Flood not only lived longer, but were much taller and larger than today. The Anakim as sons of Noah enjoyed this antediluvian genetic pedigree. This accounts for how Nimrod was himself described as a giant, much larger than the other people of the earth, except the giants.

Nimrod is 20 years old when he received a relic from his father Cush. Earlier Cush had stolen the ~~kan~~ lambskin artifact hidden by Noah, an artifact that had been passed down through the Sethite lineage from Adam himself. It was said to be a lambskin from an animal God Himself slew to cover Adam's nakedness. (1) This is the origin of the legendary aegis of Greek mythology, the goatskin of power that was a divine shield. Nimrod is by now known as a mighty hunter and the Epic of Gilgamesh was originally about him. He is also the origin of the legends of ~~Herakles~~ Heracles. Nimrod was raised a shepherd but he forsakes this for a career as a hunter. He slays wild animals that have multiplied far more rapidly than mankind had causing many problems. He sacrifices his catches and kills on altars to God in commemoration of the Flood. Nimrod begins teaching men how to build walls, ~~dix~~ ditches and fortifications. It was his career that early on linked the Savior motif with the Hunter, when priorly the Savior was symbolized as a Shepherd. Nimrod became a shepherd over the black-headed people, a description for the Sumerians. Amazing association to this history from the Book of Jasher and ancient Hebraic writings is found in that the early Chinese called the first people the "black-headed people," who were under the guidance of a First Ruler of mankind. This year is a most amazing calendrical nexus between the Annus Mundi and the modern Gregorian calendars. Abraham was born in this year according to the 1000-year old commentary on the Talmud by Rashi (Rabbi Shlomo Yitzhaqi) (1) and Flavius Josephus who wrote that Abraham was born on the 292nd year after the Flood. This 1947 BC date is confirmed by the biblical chronologist ~~See~~ Stephen Jones in his Secrets of Time and in 1839 AD M. M. Noah wrote that an accurate accounting of Abraham's life reveals that he was born in the year 1948 AM in his preface to the English translation of the Book of Jasher. (3) Abraham was born in the only year that overlapped between 1948 Annus Mundi and 1948-47 BC. In a unique

parallel, the nation of Israel was reborn in 1948 Anno Domini. Abraham is born Abram, the son of Terah, a Babylonian general.

After 20 years of strife and fighting with the Japhethites, the Hamites led by a 40 year old Nimrod attack the Japhethites as these people are weakened by a sudden earthquake. The Japhethites are overthrown in battle. (4) This story is very old and recorded in the Book of Jasher, however we have confirmation of this story in the ancient Greek account of Hesiod in his Theogony when an earthquake, howling winds and a heat wave afflicted the Titans (Japhethites) when they were banished by Zeus. (5) Zeus's career to the Greeks mirrors the Semitic stories of Nimrod. Ham is dethroned after ruling for 65 years according to the chronologies available to Augustine over 16 centuries ago. He recorded this is his City of God. Nimrod is chosen as king and he castrates his grandfather Ham as a judicial act for violating Naamah in 2235 BC exactly 288 years priorly (144+144). Then Nimrod commits an act incurring the anger of God when he castrates the holy patriarch Noah, which was not a judicial act but done out of fear. Noah's sons were gigantic, the Anakim, who are banished to the west. This banishment to the west is a major theme of the early Greek traditions of the "sons of Deucalion," the Greek Noah called the New Wine Sailor. The Anakim travel to the far west and build for themselves the mighty Mycenaea, erecting the famous Lions Gate fortress. Nimrod feared that the ever-virile Noah would keep impregnating concubines and fathering these immense people. Other races of giants were the Rephaim, the Emims, Zuzims and Zamzummims. All of these races are mentioned in the Old Testament records. Some Anakim settle in Canaan. Nimrod then marries his own mother, the tall and beautiful ~~Semir~~ Semiramis, the daughter of Noah and Naamah. This was not an incestual move but a political one. In the ancient Near East imperial power descended through the female line. Many times a king ruled as "the son of the Great Mother." (6) The people relocate two days walk to the east and begin laying the foundation of great cities along the Euphrates. This is the first regnal year of Nimrod as AMAR.UDA.AK. This is 868 years after completion of the Great Pyramid, or two Judged Time periods of 434 years each.

Abram is ten years old when he is taken out of hiding and taken to live in the House of Noah. At his birth the court astrologers saw a strange star vision and determined that a child had been born whose seed would overthrow King Nimrod. The child was found to be that of General Terah, who took the child of a maid servant to Nimrod, who killed the child. Abram was secreted away from Shinar. (1) Abram begins a 30 year study under the ancient Noah who was 902 years old, learning the preflood histories, sciences, the Mysteries and the Elder Faith as well as the prophecies of Adam, Seth and Enoch. Noah taught Abram the secrets of Achuzan (Giza pyramid complex in Egypt) and the ancient patriarch taught Abram how to translate the preflood script. The Great Pyramid at that time was under water in the southern Mediterranean where the Egyptian Delta lies today. By earthquake in 1899 BC the entire region would be elevated, the Delta created and the pyramid found half-buried. This was the 400th year from the birth of Shem, patriarch of the Semitic people.

Under the old patriarchal cultures men had wives and concubines. The Great Flood was a fact in the post-apocalyptic period and the duty of all people was "...to be fruitful, and multiply and replenish the earth," the Noahic command recorded in Genesis. After 320 years there were at the base minimum 262, 144 females, the whole population being at least 520,000 humans all descended from 8 people who survived the Deluge. Even this most conservative estimate, at 20 year long intervals, still has the base population figure 20 years after this date at 524, 288 females, or over one million people. It must be remembered that at this time humans lived for four and three centuries easily, human longevity declining rapidly. By this date very few people have died of old age. The true population at this time would be about 1.5 million.

Groups of people, clans and families by this time have begun branching out to populate Syria, Aram, Canaan, Lebanon, Anatolia, Asia Minor, Phoenicia, Mycenaea, Sumer, Elam (Harappan valley cultures), Susa, Crete, northern India, Haran. Nimrod is known to the entire world, the seat of empire at Shinar (Sumer) and his exploits are immortalized in global mythological tradition. The king is the Hunter, a renowned warrior and wrestler, a lawgiver and king. A dispute with Noah's sons, the Anakim, ten years earlier now has Nimrod boasting that he defeated the Anunnaki themselves. Historic records from the Near East reveal that Sargon I (Nimrod) claimed to have vanquished the Seven Kings renowned from pre-flood antiquity. Later Nimrod would assume the title Hammurabi and he would claim to have defeated the Seven Sages. These are dynastic claims made to secure his rule over the people. For these claims many groups splintered away knowing him to be dishonest and an enemy of God. In the early Americas Nimrod was remembered as the giant-killed Glooskap, called The Liar. The belief the people had in Nimrod led to a further abomination. Many people now venerated Nimrod's mother and wife, the beautiful and tall ~~Semir~~ Semiramis, daughter of Noah and Naamah, as a goddess. Her brothers were the Anakim called Titans in old Greek lore.

It was here that we have the origin of the goddess/war god motif, the Mother and Son that found its way into the early iconography of almost every nation on this planet. In this year Abram is 28 years old, Noah is 920 years old.

1915 BC (1980 AM): 4020 Before Armageddon/ 3324 Anunnaki Chronology/ 2394 Phoenic Chronology/ 2124 Orbital Chronology/ 1188 Vedic Calendar/ 900 Anno Pyramid/ 324 After Flood

The Anunnaki planet NIBIRU enters the inner solar system and passes through it after 732 years in the Deep of southern space below the ecliptic. It now begins its 60 year journey north of the ecliptic to finish its 792 year orbit. Some interesting calendrics. This was 1188 from the start of the Black Age, the Kali Yuga which is an Anunnaki-related timeline. 1188 is 108x11, the number 11 being a sum identifying the Anunnaki according to the Babylonian Enuma Elish cuneiform tablet texts. This was the 900th year from completion of the Great Pyramid and 324 years after the Deluge, or 108x3. Recall that the pyramid was finished in the year 1080 Annus Mundi (2815 BC).

In this year the Babylonian recorded a great blackness that swallowed the stars, a dark god from below that they called Tiamat, a sky-dragon with seven heads that the Egyptians and later Greeks called Typhon. Typhon's arms stretched a hundred leagues in either direction and instead of hands he had serpent's heads. His head touched the stars and his vast wings darkened the sun while flaming rocks hit the ground. (1) The legends of Typhon (NIBIRU) actually provides more evidence of planet Phoenix as well. In the myth of Typhon the monster in space has a sister also connected to the darkening of the sun, another monster (alien planet) named Delphyne which preserves the root in [Phoen]ix. Del[phyne]. (2)

Hesiod's Theogony preserves this event as occurring a short time after Zeus (Nimrod) conquered the Titans (Japhethites and Anakim). Hesiod wrote that Typhon appeared in the sky with strange heads (old designation for comets) with black tails. The dragon heads gave off flames and vibrated the earth with noises as mountains trembled. Thunderbolts struck the earth as waters boiled until a fiery hurricane was born. Earthquakes shook the lands and the sea overextended its bounds. The disaster concluded with powerful lightning bolt flashing between Earth and ~~Typh~~ Typhon which gave rise to the innumerable legends of a hero-god who slew a sky-monster with his labrys (thunderbolt, later stylized into a battle-axe). (3) The "thunderbolt" was a flux tube of immense electrical energy that passes between two planets first witnessed by modern scientists in 1994 AD when comet Shoemaker-Levy 9 collided into Jupiter. This was NIBIRU's first appearance after the Flood, a phenomenon associated to the Anunnaki. At this date the Near East literally explodes with cuneiform tablet inscriptions concerning the Anunnaki, gods that must be prayed to and sacrificed to in order to keep them away. 32nd year of the reign of Nimrod.

Scholars estimate that the mysterious Amorite king of Babylon, Hammurabi, died about 1900-~~1680~~ 1680 BC. This is a 220 year period, an approximation. The fact is that Hammurabi was a tital given to Sargon I of Akkad only after the disaster of 1899 BC. Hammurabi is from Ammurapi, which itself derives from Amraphel. Nimrod was born in 1987 BC and lived 215 years to 1772 BC when Esau, a descendant of Abraham, murdered him. Nimrod would have lived much longer.

King Nimrod is almost finished with his major architectural project called the Tower of Babel. The structure was never a tower in the conventional sense, but a gigantic pyramid erected to replace the Altar of God [Great Pyramid of Giza] lost in the Deluge. The Giza complex at this date has been undersea in the southern Mediterranean off the coast of Egypt for 340 years. The land is so overpopulated by this time (2 million at least) that during the construction of the high structure men were not mourned when they were hurt or killed, but the other workers were angered when bricks were damaged on their way to being set in place. (1) The pyramid construction went on for almost two decades and incurred the wrath of the Creator. At this time the speech of men was understood by all, a variant of the speech of those from before the Flood. This universal language is attested in the old Sibylline Oracles, in several passages in ancient texts found in cuneiform as will be shown in this research and in the following references:

"Once upon a time, the whole Universe, the people in unison,
to Enlil in one tongue gave praise."

Sumerian text Enmerkar and the Lord of Aratta

"And the whole earth was of one language, and of one speech."

Genesis 11:1

"And all the earth was of one tongue and words of union."

Jasher 7:46

As the project drew to a close the Dark Satelllite, a rock and metal moon once in the train of NIBIRU passed close to earth as the flux tube electrical discharge struck the pyramid ~~xxx~~ structure electrocuting many people. At that instant a massive continental earthquake rocked northern Africa and the entire southern Mediterranean basin was elevated. The post-Flood shoreline was moved northward 108 miles and the receding seawater passed over the elevated seabed and limestone plateau creating the Delta rivers of the Nile. As will be shown in this research there is much proof that the Great Pyramid and Giza region was under the sea for an extended period of time and that this was known to our predecessors. In fact, early Egypt was not called Egypt at all, but The Raised Land because a god raised the land out of the sea. (2)

In Shinar the tower was vaporized along its upper third in a storm of vitrified detritus as the quakes vibrates the earth and swallowed a third of the workers. Entire districts of Shinar were destroyed and hundreds of thousands of people died. About 750,000 people fled in all directions with their possessions. The topography of the world changed as civilization of fragmented into migrating groups, some travelling as far as distant America before further global changes from meltwater seas from glacial landmasses closed the natural land bridges off with oceans.

The inhabitants of the fertile Nile valley found themselves battling groups of people escaping the chaos to wander into their territory. Seven clans in the Nile valley fought amongst one another with Mitzraim the victor. This is why the Old Testament records often refer to the Egyptians or their country as Mitzraim. The clans that were driven off became the Philistines, Cretans, Minoans, Pelasgians and other Aegean tribes that would later become powerful and unified by this ancient history to become the infamous Sea Peoples Federation throughout the Mediterranean that would fight in the famous Trojan War. This war for Egypt was called the Ethiopic War. Egypt is settled by the descendants of Ham and Ham is remembered as Anam, who the later Egyptians call Mena (Menes) and Ammon. He ruled the First Dynasty.

In Shinar the survivors that remained, still a dense population, renamed Sargon I as Amraphel (Ugaritic Ammurapi), a name in their speech meaning He Made Us Fall from their position as seat of empire. Nimrod was still king, not an emperor. The people gathered the remaining bricks and building materials and abandoned their pyramid to build the cities of Uruk (Uruk), Accad (Akkad), ~~Calneh~~ Calneh and Babel (Babylon). Archeologists have found the immense ruinous pile of vitrified bricks, noting that all usable bricks had been removed from the site.

The Dark Satelllite will maintain a regular orbit throughout history. The stories of this disaster claim that evil angels descended to afflict the people. This is the same thing that will happen when the Dark Satelllite arrives in 2052 AD to bring the Seven Anunnaki Kings that were imprisoned ~~before the Flood~~ at the Deluge.

This was the 48th year of Nimrod's reign and Abram's life. Noah was 940 years old.

 In this year the son of Ham (Chem/Anam) of Egypt named Oswiris ascends to the throne of Mitzraim in the Nile valley. This is the man from who the later Egyptians deified as the god ~~osirix~~ Osiris. Ham (Ammon) was castrated 49 years earlier by Nimrod, so Oswiris is at least 49 years old.

At this date the Elamites are in desperate need of resources and building materials in the Harappan valley and the Elamite army under the leadership of Chedorlaomer, called in the Near East tablet inscriptions as Kudurlagamar, invades Egypt. In the Genesis record this story is the background for Genesis 14. In Jasher we find that Chedorlaomer was a war general under Nimrod in Shinar before the Tower incident. Nimrod is depicted upon seals and vessel at Harappa and Mohenjo-daro as Pashupati, or Lord of the Animals, a horned man bearing a trident (labrys). The Elamites built cities all throughout the Harappan regions in the Indus Valley along the modern Pakastani-Indian borders.

Chedorlaomer marched an army around the northern regions of Sumer and Akkad, ingnoring the realm of Nimrod to invade Canaan, subdueing the Cities of the Plain called Sodom and Gomorrah, Admah, Zeboiim and Bela, cities found mentioned in the Ugaritic seals. These Canaanites were compelled to pay annual tribute of bitumin and salt from the shores of the Salt Sea (called Dead Sea today). (1) Bitumin is a fossil-fuel byproduct used for making glue, oils, caulking ships. Taking auxillaries from Canaan, the ~~Elamix~~ Elamite army then marched into Egypt and subdued them in the first regnal year of Oswiris. This year is the 440th year since the birth of Ham in 2338 BC, or 158,400 days, which is 79,200 days twice over. The Elamites were Semitic and conquered the Canaanites and Egyptians, two nations descended from Ham. This begins the fulfillment of Noah's Curse of Canaan and Ham. Noah is 941 years old and Abram is 49.

(1) Ancient Omen Texts in Babylonian attest that Agade (Akkad) was founded right after Sargon's first invasion of the west. (2) As the Elamites garrisoned Canaan and Egypt, Nimrod of Babylon leaves those areas alone, even leaving alone the Elamites to the east. He concentrates on the Euphrates-Tigris regions and their nothern and northwestern areas to extend his rule. Nimrod's greatest city at this time is Ereck (Uruk), called The Old City. (3) Abram is 52 years old.

Seven years after the Babel disaster the leading families of the east lost out in a contest of lots and were banished for 13 years. These were the Pandavas led by Yudhishtira in the Indian Mahabharata text, but he was called Chedorlaomer in the Near East tablet inscriptions and in Genesis 14. The banishment for 13 years was the subject of much communication in the old documents. In this year the wise prophet Vyasa said, "Much of sorrow and suffering is in store for 13 years to come. The portents indicate the destruction of the Kshatriya race...hundreds of kings will perish, and the old order of things will pass away." (1) The Law of the Lots was instituted after the Flood by Noah when his sons and his son's sons pulled lots to see where they would take their families for settlement.

This year is exactly 120 years after Ham began to rule in 2012 BC. This was the 55th year of the life of Abram, 55 years since Nimrod first ruled as king.

The venerable patriarch Noah dies at age 950 years old, born in 2830 BC, the first year of the Oppression of the Nephilim over the Sethites. The early Sumerians called him Utnapishtim and The Far Away because he chose to live in the west in Canaan with his son Shem, known to the locals as the priest Melchizedek, a highpriest carrying on the Elder Faith of the pre-flood ancestors. In this year Shem was 448 years old, his older brother Japheth, firstborn of Noah, was 450 years old. Widespread mourning leads to the arrival of envoys and kings from distant lands who come to pay their respects to the family of the Ancient One. With these arrivals from the west in the region later known as the Peloponnesse, or Mycenaea, were some of the Anakim, the old sons of Noah. They stay in Canaan as evidenced in the biblical records of Joshua and Numbers. This is the 1224th year of the Mayan Calendar, a number that will be shown over and over throughout this research to be indicative of a covenanted people. This was the 58th year of Abram's life.

After 13 years since Elam conquered Canaan and Egypt the Cities of the Plain (Sodom and Gomorrah) at the edge of the Salt Sea (Dead Sea) rebelled and ceased paying their annual tribute after 12 years of vassalage. The Elamites were at this time building great cities, their own soldiers now conscripted laborers and they did nothing about the insurgency at this time. In the Euphrate-Tigris valleys Nimrod too was empire-building, his seat at the new city of Babel named in commemoration of the Tower incident (Babel means "confusion"). His dominion had spread from Sumer, Akkad, Babylonia, Assyria, Haran, ~~XX~~ Aram (Syria), Anatolia of the Hittites as far as Asia Minor. Now powerful, Nimrod sent messages to his former general Chedorlaomer in Elam to submit back under his command. In the Sumerian text Enmerkar and the Lord of Aratta, Nimrod is Enmerkar and Chedorlaomer is the Lord of Aratta (Harappa) where we find Enmerkar appealing to the Lord of Aratta to ~~xxxx~~ return certain objects and submit to his authority but the Lord of Aratta responds with a message claiming that he cannot understand what language the message is, therefore cannot respond to it. The rebellion of the Hamitic peoples of ~~Canaan~~ Canaan is 70x5 years (350) since Canaan was cursed by Noah in 2235 BC. This revolt is 744+744 of the Olmec (Hamitic) timeline. After five full years passed after Sodom and Gomorrah rebelled against Elam the king of Babylon waited no longer. Nimrod believed that Elam's silence indicated weakness, for Chedorlaomer did nothing to punish the Sodomites. In this year Nimrod assembles a truly vast host of Sumerians, Akkadians, Babylonians, Hurrians, Aramaeans, Amorites, Hittites as well as a formidable contingent of giants of Rephaim and Anakim stock. Nimrod marched his army toward Elam on his way to the most famous battle of the Ancient World known as the Battle of Kuruksata. In his host was a nephew called Tidal in Genesis 14 but Tudul of the Hittites. Another king was Arioch, a son of Nimrod who reigned over Sumer as well as Mardon, a detested son of Nimrod even despised by Semiramis, the queen. Mardon was

truly gigantic (remember his mother was Semiramis, the tall daughter of Noah) and blood-thirsty. Mardon is remembered by the Graeco-Roman world as Ares (Mars), the violent god of war who was in the Babylonian annals called Martu.

Chedorlaomer met Nimrod's army with an inferior force of 5000 men, outnumbered by Nimrod 7-11. The start of the Battle of Kuruksata in the Mahabharata is the first recorded instance of a famous Bronze Age institution known as the Heroic Code. Before the terrible battle commenced both sides watched, "Numerous single combats between renowned warriors." (1) The 13 years preceding the battle is mentioned about a dozen times throughout the Mahabharata text. (2)

The Elamites slaughter the armies of Nimrod and this war saw the end of several famous giants. Mardon was killed. In humiliation Nimrod, Arioch and Tidal are subjected to Elamite rule and children are taken as security, Babylonia garrisoned with Elamite troops. Chedorlaomer becomes overlord of the Euphrates-Tigris basin. Scholars have linked the Lord of Aratta to Harappa, the Indus valley cities. (3)

The Battle of Kuruksata was over the right to the fossil-fuel products of Canaan, for it was Nimrod's intent to defeat the Elamites and then secure his dominion westward into Canaan to the Cities of the Plain. This battle occurred in the year 2016 Annus Mundi, or 1008+1008 years, and it was 2160 years (1080x2) since Earth had assumed its present orbit around the sun. The Elamites were early peoples of India and in the Indian Vedic time-line we see this as 1224. This was 360 years after the Deluge. This was the 68th year of Abram's life.

In Canaan, the future land of Israel, Abram's name is changed to Abraham and he enters a covenant with God. God promises him that his seed shall become mighty nations and spread across the face of the Earth, his descendants more than the stars for multitude. He is told that through his descendants all the nations of the world will be blessed. His progeny will first be slaves in Egypt but will later come out of bondage with great wealth. In biblical chronology the Abrahamic Covenant is instituted 430 years ~~before~~ before the Exodus of the Israelites from Egypt in 1447 BC. The date of 1447 BC for the Exodus is well-proven. Eusebius in his Chronicon also counted the 430 years from the promises made to Abraham to the Exodus. (1) The story of the promises is in Genesis and Jasher. (2)

The fulfillment of these promises has totally eluded modern Christians. Today it is taught that this covenant is fulfilled by the reemergence of the tiny nation-state of Israel in Palestine, but the nation of modern Israel has not at all fulfilled any of these conditions. The descendants of Abraham have literally FILLED THE EARTH today and who they are and what they have done to BLESS THE NATIONS will be fully disclosed in this research. Abraham is 70 years old.

(1) He is 75 years old and dwells again in ~~Canaan~~ Canaan.

Chedorlaomer brings his army of Elamites into Babylonia and summons the armies of Nimrod (Amraphel), Arioch or Sumer and Akkad and Tidal of Anatolia. This massive host passes over into Syria and south into the land of the giants called Bashan and Argob, vanquishing the giants called Emims, Zuzims and Zamzumims, giants living in Canaan. The Elamite confederation then crushes the Amorites on the way toward Sodom and Gomorrah. The attack from the north left the Sodomites and Gomorrites defenseless and their armies were routed and chased off into the lime pits bordering the Salt Sea. The invasion route was down the Kings Highway, a famous road in antiquity. Sodom and Gomorrah are sacked, the women and children taken with many of the people and their herds and livestock. Among the captives was Lot, nephew of Abraham. The Elamite confederation camps near Damascus close to the famous pre-flood foundation of megalithic blocks called Baalbek. The ancient stone tablets called the Khedorla'omer Texts confirm the Genesis account, for all of the participants of the Elamite confederation are named and the route they took invading Canaan is specifically given. This invasion was due to a rebellion that occurred 13 years earlier. (2)

Abraham discovers the matter and summons his allies, 318 Anakim giants, the sons of Noah and three Amorite chieftains with their forces and the combined groups form an army led by Abraham that falls upon the drunk and celebrating Elamite confederation outside Damascus. The small forces slays thousands sending men panicking into the wilderness as the kings Chedorlaomer, Tidal and ~~Arioch~~ Arioch are captured and put to the sword. Nimrod (Amraphel) escapes, his own deliverance foretold to him in a prophecy the same night he dreamed that his death would come to him by the seed of Abraham. (3) The death and defeat of Chedorlaomer is evidenced in the thousands-of-years-old Letter From Hammurabi where we read a demand from Hammurabi for the return of temple virgins taken priorly by Chedorlaomer. (4) This demand could never have been made had not Chedorlaomer first forcibly taken them to Elam before losing power to Babylon.

Sodom and the Cities of the Plain are given back their possessions and people and this begins 24 years of prosperity and isolationism. The Sodomites and their Canaanite neighbors grow famously rich and their prosperity results in a degeneration into hedonism and public demonstrations of torture of foreigners and locals caught helping them. With unlimited resources from their proceeds from the mineral harvesting from the Salt Sea they still refused to feed the poor, or clothe & them, give strangers lodging, food or water and they became a byword among the nations for their highway piracy; the rick taking from the poor.

Abraham meets with Shem, who is 465 years old and called Melchizedek, a highpriest in Canaan. Nimrod, free of Elamite dominion, secures his reign over his kingdom. At this time Amorites from Mitanni are populating his dominions.

In the 31st year of Hammurabi (Nimrod) Babylon annexes Larsa and all of southern Mesopotamia. He would forge another empire by his 35th year. (1) This dating is the Amorite dating from 1898 BC when Nimrod was Amraphel and had to begin his kingdom all over again after the 1899 BC Babel dispersion. The Amorites were a widespread and numerous people spread throughout Canaan, Aram, Mitanni and Babylonia. The Euphrates-Tigris basin teeming with Amorites, Nimrod grants them citizenship for their allegiance. In this year Nimrod officially becomes Hammurabi of the Amorite Dynasty of Babylon. Migrations of Amorites make Hammurabi a mighty king and his armies are replenished virtually overnight with the power of Elam broken. In this year the city of Nineveh is finished and Ashur fortified. These were located in the north in what would later be Assyria.

Hammurabi took on a dynastic name, Samu-Abi, which means Shem is my father. (2) This was a lie but many kings took fictitious names in antiquity to secure their rule over peoples of different stock.

After the Tubalites refused the Chittim their daughters for three years the Chittim went to the city of Sabinah and abducted the young Sabine women when the men were out in the fields at harvest. The Sabines and their allies attacked the Chittim but the war was abandoned when the Chittim at the walls held up the babies born from their unions. (1) The Tubalites retreated back home and this was the first Rape of the Sabines famous in history. The Book of Jasher reads that- "And the children of Chittim are the Romim who dwell in the valley of Canopia by the river Tibreu." (2) The Romans near the river Tiber. This reveals that the Rape of the Sabines famous in Roman history was a repeated occurrence from distant antiquity. It also demonstrates that the later copyists of the Jasher record which was written in Hebrew did so some time after 753 BC for they were familiar with the name of Rome (Romim), which did not exist priorly. The first Italians were Chittim, or

Japhethites.

Earth passes right through the strewn field of the Sodom-Trojan Apocalypse Group and extraterrestrial materials from the surface of NIBIRU saturate the atmosphere and rain down on the Fertile Crescent. Sodom and Gomorrah and the cities of the plain are totally destroyed in fire from the sky as the detritus of comets and meteorites with combustible materials fall upon the region around the Salt Sea. The cities had been constructed of the bituminous mortar and bricks and they burn killing all the inhabitants. The burning along the ground and the intensity of the extraterrestrial storm fossilized people standing near the Salt Sea. Lot's wife was one of these victims. (1)

The enemies of Sodom and Gomorrah met the same fate. Mohenjo-daro and the other Harappan cities of the Indus valley were obliterated by storms from the sky. Archeologists have recently excavated these desolate cities and found skeletons in the streets, unmarked by weapons, some holding children and others holding hands, all laid out as if they watched their destruction coming. Russian scientists found that the radioactivity levels of these skeletons was much higher than it was supposed to be. Thousand of congealed black stones have been found all over Mohenjo-daro. (2) The Kings Highway used by the Elamites to invade Sodom and Gomorrah is mentioned in an ancient Near ~~Tab~~ tablet text which reads that the cities along the Kings Highway were destroyed by a disaster. (3) Roman historian Tacitus relates that at the edge of the Dead Sea were once great cities. (4)

Between Sodom and Gomorrah and the Indus valley ruins was Sumer and lower Mesopotami. This disaster did not leave them unscathed. The Lamentation Texts of Sumer reveal that the ruin of their own cities was connected to the destruction of cities in the west. These texts reveal that the vast urban centers of Ur, Uruk, Nippur, Ediru among others were laid waste, lying in heaps, young laying in their mother's laps, fires ablaze. An evil wind brought the fiery destruction. (5) Though southern Mesopotamia was ravaged by the same destruction as the Indus and Sodom valley, Babylon was actually empowered again as refugees filtered into their untouched cities. In fact, according to Sitchin, the world-famous Sumerian scholar, Elamites joined the peoples of Babylonia.

the story of the destruction of Sodom and Gomorrah is a major biblical theme. More can be read about it in Anunnaki Homeworld. Abraham was 98 years old. The greatest significance of this story to our times concerns its calendrical parallel with our own Last Days civilization. We have seen already that NIBIRU is destined to orbit until it nearly collides into Earth in 2046 AD, and the destruction of Sodom and Gomorrah was in the year 2046 Annus Mundi. There is ~~deity~~ deity in the design. We have been warned.

The ancient Egyptian civilization that we have come to know was born in this year with the discovery and excavation of the Great Pyramid. At the Flood in 2239 BC the site of Achuzan (Giza) was buried in sediments and when the floodwaters receded to the poles with the continental plates now fractured, the Mediterranean sea covered Lower Egypt. The early coast of Egypt was 108 miles further inland and this is why the earliest metropolis of the Egyptians was Waset (Karnak), Thebes and those cities of Upper Egypt hundreds of miles into the African interior. For 62 years since 1899 BC the geography of Egypt had changed with a quake that elevated northern Africa, lifting the half-buried pyramids and Sphinx of the Giza Complex ~~xxxx~~ out of the sea. This elevation created the geographical anomaly known as the Egyptian Nile Delta, called the Nine Bows long ago. Lower Egypt was The Raised Land. The Egyptians discovered the gigantic pyramids and immediately attributed them to Thoth (Egyptian Enoch). They excavated the site removing thousands of tons of sediments, seashells and debris as others built the nearby city of Annu, called On in the Old Testament and later known as Heliopolis.

The Westcar Papyrus relates that a venerable old man who was 110 years old visited Egypt who astonished the king because he knew the number of the chambers of Thoth, which some Egyptologists translate as "secret chambers of the primeval sanctuary." This old man claimed to know where the plans-with-numbers were hidden. (1) He could translate the writings of Thoth. The stranger was a shepherd and in some Egyptian accounts he was called Philistis. These facts identify this man as Abraham, born in 1947 BC and was 110 years old, who had extensive flocks and herds mentioned in Genesis and Jasher and was in that same year living among the Philistines at Gerar. Abraham could translate the writings (2) on the lower surface of the Great Pyramid's casing blocks because Noah had taught him how to understand the antediluvian script. ~~xxxx~~ Thoth was a prophet, scribe of the gods, an architect and healer...Enoch.

Abraham's ~~xxxx~~ presence in ancient Egypt explains a number of peculiarities. Origen wrote that no one among the Egyptians were allowed to study geometry or astronomy until they had been circumcised. (3) This was the sign of the Abrahamic Covenant God instituted in 1877 BC exactly 40 years earlier. Eusebius wrote that Abraham taught the science of astrology to the Egyptians at Heliopolis. Scholars have long been critical of ancient Israelite institutions, finding their precedents in Egyptian traditional texts, not realizing that the early Egyptian priesthoods were influenced and guided by Abraham.

The Egyptian Book of the Dead was originally known as the Book of Thoth and was also referred to as the Book of Life, or Ritual of the Resurrection of Life. (4) It was said that these writings were originally taken from off the surfaces of the Great Pyramid, which was called then Per-am-rhid, a name used to denote the Book of the Dead. (5) This Book of the Dead was discovered during the First Dynasty according to 11th century BC Coffin Texts, which ~~xxxx~~ relate that they were found upon "...a wonderful object...a thing of great mystery, the like of which had never before been seen or looked upon." These monuments in Egypt were called the Pillar of Set, Abraham knowing they had been erected by the Sethites. The Great Pyramid was finished in 1080 Annus Mundi (2815 BC), exactly 972 years (108x9) before this date. Abraham possessed a tablet of symbols by which he ~~xx~~ used to know the past, present and future, reminiscent of the Sumerian Tablet of Destinies. (6) Old Arabian traditions affirm the Abraham's connection to the Great Pyramid is that they relate that he opened a very ancient coffer and discovered therein the truly old books of his ancestors Adam, Seth and Enoch. (7) This concerns the Sarcophagus in the Kings Chamber

that once had a granite sliding lid atop it. The proofs that Abraham had visited Egypt to translate the Enochian writings from off the surfaces of the Great Pyramid is the subject of Lost Scriptures of Giza.

Before the Deluge Abraham's ministry was prophesied by an angel to Enoch who said, "After the Flood...shall arise another generation, much afterwards...he who raised that generation [Abraham] shall reveal to them the books of thy handwriting [Enoch's], of thy fathers, to them he must point out the guardianship of the world..." (8) Abraham's learning and knowledge was passed down from Shem and Noah, both men living before the Flood. Noah was born in 2839 BC and his guidance came from Methuselah, the ancient son of Enoch. From Adam to Noah only ~~Methuselah~~ Methuselah was needed for the transference of information to Abraham, this being over 2000 years.

The discovery of the Pillars of Set quickly spread along the trade routes of the ancient world. The sages and scribes of even distant countries made journeys to Egypt knowing that the stories from the before the Flood related that the truth about Earth's past and future were conveyed upon the casing blocks of the monument. Gnostic traditions affirm this. In the Kybalion we read- "From the land of the Ganges [India] many advanced occultists wandered to the land of Egypt, and sat at the feet of the Master...from other lands also came the learned ones, all of whom regarded Hermes as the Master of Masters and his influence was so great that in spite of the many wanderings from the path on the parts of the centuries of teachings in these different lands, there may still be found a certain basic resemblance and correspondence which underlies the many and quite divergent theories entertained and taught by the occultists of these different lands today." (9) The Hermes traditions refer both to Enoch before the Flood and Abraham after it. Iamblichus wrote that Hermes wrote 20,000 books and the Egyptian priest-historian Manetho of Alexandria wrote that Hermes wrote 36,000 books. (10) This confusion was born from the knowledge that long ago there was a tremendous amount of literature available that was ~~copied~~ copied from the surface texts of the Great Pyramid. Hermes is often connected to Thoth. Over twenty-two centuries ago, Manetho wrote that before the Cataclysm in Egypt, Thoth inscribed upon stelae known as the Syriadic Columns [pillars] the principles of all knowledge. After the Flood, at a later period, the Second Thoth came to Egypt and translated these writings in the vulgar tongue of men, the original texts written in a sacred language. (11)

Abraham would spend 12 years (144 months) among the Egyptian priesthood and at the Giza site translating the Enochian records. The scholars from Egypt, Sumer and Akkad, Babylon, Aram, Phoenicia, Philistia, Crete, Susa, Anatolia, Canaan, Midian and from further abroad would see and be allowed to copy what they wished to take back to their countries. The Enochian inscriptions were so vast they required much abbreviation and this is what is discovered when studying the oldest writings in the world. Biblical texts are paraphrases of much lengthier materials and Sumerian, Sanskrit-Vedic, Zoroastrian, Near Eastern and Egyptian writings all mention histories and fragments of a theology that was known to them but lost over time, correspondences between these earlier human writings preserved today that show remarkable parallels between another though the cultures had little or no known contact. The Egyptians claimed their greatest writings were discovered in the ground, the Vedic texts claim their own writings came off of the surfaces of the Altar of Agni, having 10,800 verses on each of its 10,800 blocks and that these writings have been dug up. The Hindus claim that long ago their holy books were recovered "...from the bottom of the ocean," after the Flood. (12) Abraham's translations became the core prophetic and doctrinal texts by which humankind built their religions.

Sanchoniathon of Phoenicia, a scholar who lived and wrote about 1100 BC links Abraham to Thoth inadvertently, claiming that he had read some of the books of Thoth and that Thoth had lived about 800 years before himself. (13) This is only an approximate that places Thoth at 1900 BC, when Abraham was 47 years old. At approximately 470 BC Xanthos of Lydia wrote that Zoroaster's ministry was 600 years before the Trojan War. (14) This too is an approximate of great precision. ~~Abraham~~ Abraham was remembered at Zoroaster in early Persia (Iran) just as the people of India remembered him as Brahma, from A[Braham], with his wife Saraswati (Sarah). The Trojan War began in 1239 BC and lasted until 1229 BC with

an international war throughout the Mediterranean involving the Sea Peoples Federation, the Mycenaean and early Greeks and Egypt. Abraham's ministry in Egypt lasted 12 years, to 1825 BC so Xanthos' timeline is perfect at 600 years.

Proof of the Zoroaster-Abraham connection is seen in that At Zoroaster's birth and sign was seen in the heavens and a king attempted to slay him as an infant, these things related in the Book of Jasher for 1947 and 1937 BC. Zoroaster visited Babylon and was hidden away as a youth to endure decades of study in religious devotion. (15) The earliest relics of Zoroaster's writings are the Gathas, dating back to at least the 14th century BC. (16) The Gathas are devoid of the fantastic and merely fragments of a larger literature (17), which Pliny estimates as Zoroaster's total writings at 2,000,000 verses. (18) This is doubtful but is actually a memory of the innumerable texts found upon the Great Pyramid's surface that Abraham translated. The Gathas were regarded as very sacred and have suffered little from editors. They were included in the Avesta and remarkably, the finest writings are the oldest. The Avestan language is closest to the Sanskrit of the Vedic texts of ~~XXX~~ India. (19) Zoroaster's eschatology was extraordinarily advanced, and taught of the Day of the Lord and coming of the Savior (Saoshyant) to bring bodily resurrection to all men, good or evil. (20)

This 1837 BC date in the Ancient World when the casing blocks were discovered, excavated and their writings translated at Giza parallels the 1837 AD when the British Col. Vyse discovered the buried white limestone casing blocks at the base of the Great Pyramid that scholars had for centuries claimed never existed. The pyramid by 1837 AD was partially buried in rubble. see 1837 BC.

In the 12th and final year (144 months) of Abraham's ministry translating the Giza texts off the surface of the Great Pyramid planet Phoenix passes through the inner system completing its 138 year orbit on its way back out to the Kuiper Belt. Abraham's ministry in Egypt with the Great Pyramid's writings in the subject of Lost Scriptures of Giza, and the orbital history of planet Phoenix is the subject of When the Sun Darkens and Nostradamus and the Planets of Apocalypse where we find many startling connections between early knowledge of Phoenix, Enoch, Abraham and the Great Pyramid.

The calendrics for this year are intriguing. The end of the pre-flood world was in 2239 BC, or 2070 years after the destruction of the Pre-Adamic World in 4309 BC. This year of Abraham's final year in Egypt was the year 2070 Annus Mundi (414x5), and 414 years after the Flood. The Great Pyramid was begun and the Sphinx sculpted in 990 Annus Mundi, or 2905 BC, and this year was 990 Anno Pyramid, 990 years since the Giza Complex was finished in 2815 BC. The Great Pyramid was elevated on the plateau out of the sea in 1899 BC 74 years earlier, or 888 months, a Golden Proportion number. Abraham is 122 years old and his ancestor was still alive, Shem, at 512 years old. This was the 52nd year since the institution of the

Abrahamic Covenant.

The Word of God as being eternal was originally written past-tense. Abraham provided the sages of Egypt, the Near East, the Mediterranean world, India and abroad a vast corpus of ancient prophetic information concerning the future histories of the world, the Apocalypse, and the entire life and messages of the Chief Cornerstone (Christ) that were taken from the writings once adorning the Great Pyramid. These texts were the original Enochian writings, the antediluvian Word of God and they were composed in past-tense just as the Old Testament prophecies composed by the inspiration of men of God were also written in past-tense. As the Word of God is eternal the composition in past-tense serves the purpose of being unchanging, especially in the distant future when all the prophecies are fulfilled. The original ~~W~~ Word does not change and in the far future no changes will need to be implemented because the Holy Writ was in past-tense to begin with. Unfortunately, this method of ~~eschatological~~ eschatological preservation of messages to mankind was later misunderstood as centuries and then millennia passed, leading priests to develop entire religions based upon these holy prophetic records as if someone named Crishna, Vishnu, Buddha, Mithra, Zoroaster, Quetzalcoatl, Kulkukan, Votan, Viracocha, Indra among other Savior gods already existed in the past and fulfilled these prophecies.

Abraham, as found in the subject matter of the oldest writings and their teachings that were divulged by all those ancient personalities linked to Abraham, taught that a Savior was coming Who would walk among men, teach them the Truth and promise them ~~ax~~ resurrection. This Savior would visit mankind at a predetermined time. The entire structure of the Great Pyramid was built to commemorate His descent from heaven to rule the Monument of Man. Over time this story was badly embellished with a solar mythos adding details not found in the oldest writings, fictions that would be added to the early Christian documents to justify Roman authority over the Church.

The origin of Christianity and its predecessor faith, Gnosticism, will be fully disclosed throughout this research.

Nimrod was himself still alive and well at 165 years old. Kirjath-arba will later be renamed Hebron, a city famous in biblical history. Isaac is 25 years old and the venerable Shem is 515 years old.

Some Philistines steal one of Abraham's wells, a severe violation in antiquity under patriarchal law. In the Bronze Age such an act would lead to war. Abraham is famous throughout the Fertile Crescent nations and his name has been found in ancient cuneiform texts as Abramu. King Abimelech of Philistia apologizes to Abraham and they enter into a peace agreement. Abimelech did ~~know~~ not know it but he averted a national disaster. This was 414 years after the Ham, the ancestor of the Philistines, was Cursed for a sexual trespass against Noah (involving Naamah), 414 being a Cursed Earth period. This demonstrates that this year of Abimelech's apology extended the Cursed Time for Philistia to 1407 BC, another 414 years when the Israelite descendants of Abraham would conquer Canaan in the year 2488 Annus Mundi (1407 BC). This parallels fact that this was the 2488th year of the Phoenix Chronology. The story of Abraham and Abimelech is in Genesis and Jasher. (1)

1819 BC (2076 AM)

The Masonic text called the Inigo Jones Document records that this is the Annus Mundi year that the Great Pyramid was constructed. Many older Masonic writings mention Abraham and Enoch and the Great Pyramid. This is an apparent anachronism confusing Abraham's presence in Egypt at the Great Pyramid (4 years earlier in 1825 BC) with the construction of the monument.

Abraham is 140 years old and he is led to sacrifice Isaac on a mountain altar at the behest of God. Sorrowful but obedient, Abraham takes Isaac who is then 40 years old. Abraham knows that God has promised that through his seed shall be many mighty nations and that his descendants would fill the earth. He believed this promise was to be fulfilled through Isaac. His earlier son through an Egyptian ~~princess~~ princess, Hagar, named Ishmael, was in this year 54 years old. This was exactly 70 years since the Abrahamic Covenant was established. Just before Abraham is about to fulfill his oath a substitute is provided in the form of a ram caught in a nearby thicket. Discovering the matter of the intended sacrifice, the elderly Sarah rushed out and finds Isaac alive and well and the Book of Jasher reads that she was overcome with relief and died at that moment. It was for Sarah that Abraham bought the Cave of Machpelah. (1) The Abrahamic Covenant is now firmly ratified and the calendrics for this year bear it out as one of significance.

As the Annus Mundi year of 2088 this was 1044+1044, a Golden Proportion number. This was the year 2232 of the Orbital Chronology, or 744x3, the number 744 being a Golden Proportion number as well. This year was 1296 of the Vedic Calendar, or 432x3, also 144x9. It was 1008 Anno Pyramid and 432 (144x3) after the Flood in 2239 BC. As 92 years after the Babel dispersion this was 1104 months, or 552+552.

Even to events in the future this was an important year. This year was 360 years to the Exodus in 1447 BC, 400 years to the Israelite Conquest of Canaan in 1407 BC, and 1200 years to the fall of Jerusalem to Babylon in 607 BC. This begins an 1840 year countdown to 32 AD which is 22,080 months, or exactly 552x40. The year 32 AD marks the year the Chief Cornerstone visited men and finalized His work.

At age 60 Isaac father Jacob and Esau, twins. (1) Both of these males will grow up to have whole nations descended from them that will struggle against one another even as empires rise and fall, descended from both. The three major ethnic groups descended from Abraham are the Arabic nations that have populated the Middle East from their patriarch Ishmael, who was 74 years old at the birth of Jacob and Esau. Esau's descendants will populate Seir

and some will assimilate with Middle Eastern nations but the thread of Esau and his hatred of his brother Jacob will find its way to live among the Chittim of Italy, bred into the Roman people, the greatest enemies of Israel. This history will be disclosed fully in this research. The descendants of Jacob will populate the Earth in the most fascinating series of migrations in the ancient world, when Israelite tribes and clans became nations and empires. The threads of Ishmael, & Esau and Jacob are followed throughout this work. Abraham in this year is 160 years old (40x4). Shem is 550 years old.

God promised to Isaac the same covenant between Abraham and Him, this being 90 years after the institution of the Abrahamic Covenant, or 1080 months. The Roman historian and chronologist Marcus Varro as cited by Augustine related that at this exact time Assyria was ruled by its seventh king, the first Xerxes who also went by the throne name Balaeus. (2)

At this time the first king of Argos ruled, named Inachus. Argos would later be known as part of Mycenaea. Inachus is probably a corruption of Anak [Inach]us. The Anakim first settled the Peloponnese after being banished by Nimrod with the Japhethites. In the 3rd century BC Apollonius of Rhodes, chief custodian of the Library at Alexandria, wrote that the ancient lands of Greece were ruled by the sons of Deucalion. (3) Deucalion was the New Wine Sailor, the early Greek Noah and his sons were born after the Flood, called the Anakim. When Nimrod led the Hamites against the Japhethites and sons of Noah he did so after they were already ~~was~~ weakened by a disaster, a quake and storm in 1947 BC. They were defeated and banished to the far west, from which the term Tartarus developed. Evidence that Inachus is Anak is found in that the early Greeks claim that Inachus arrived at Argos in a migration escaping a disaster. (4) Even the alliance between the Japhethites (Titans) and the people of Inachus is found in that Inachus was associated with Iapetus who was the Grecian Japheth. Inachus also founded Iopolis, known today as Antioch in Syria. (5) We will review material later showing that the Anakim were also inhabiting Caria and Syria. The city called Argos was NOT ~~called~~ called Argos at this time, a name that will be attributed to it much later.

This is 641 years to Tiglath-pileser's first year of reign in 1135 BC when this ruined temple was rebuilt and planet Phoenix darkened the sun. By 1135 BC the Assyrian annals indicate that the temple had been in ruins for 60 years.

Nimrod is stirred to jealousy for he was the original Mighty Hunter. Nimrod and his personal guards go hunting in the Hule Marsh in Canaan, a pretext for finding the young upstart. As Nimrod separates himself from the men in the hunt he is himself ambushed by a 15 year old Esau who was disguised in a boar skin. Esau fights Nimrod, drops the huge king and decapitates him with his own sword fulfilling the prophecy that Nimrod would be killed by the seed of Terah, father of Abraham. Nimrod was 215 years when he died. Nimrod's men chased Esau and the youth flees, running all the way back to where Isaac has pitched his tent. When he arrives he finds his brother Jacob cooking a pot of food. Exhausted from his flight and scared he trades his birthright for the pot of stew to Jacob. (1)

Esau killing Nimrod is the origin for one of the most mysterious and widespread mythological motifs, the Boar-killing the King story so prolific in antiquity, a story with variants found in the Middle East, Africa, Asia Minor, Greece, India and Europe. This is the subject of King of the Giants: Mighty Hunter of World Mythology. Though hundreds of versions of this story are found in Asia, Africa and Europe, not one single story like this is found in the ancient Americas. Infact, the traditions of early American cultures remember the Mighty Hunter, his lies, his fall and pride and even the Flood and Tower. But none relate how he died. This lends credit to the fact that those people who became the early Americans had already left the Near East and all contact was for a long time severed with the Old World. After crossing natural land bridges those passes were then close over by impassable oceans as the polar caps melted and receded to their present positions. The death of Nimrod was 127 years after the Tower disaster and beginning of the Dispersion. The following year, 1771 BC, begins the first regnal year of Queen Semiramis of Babylon, a woman famous in the writings of the early Near East. Her generation were just reaching old age, as evidence by the death of Arphaxad. However, her own genetics may have been stronger for she was the direct daughter of both Noah and Naamah, rather than their grandchild. The ruse of masquerading as a pig was used much in antiquity to get the predatory animals like lions or wolves to think the hunter was a foraging pig. The predator would advance on the hunter and then be killed. This is the 175th year of Abraham and he dies after Nimrod is killed. He was born in the first regnal year of King Nimrod in 1947 BC.

Nimrod was a Hamitic king, under the curse of Noah. His death was 240 years (86,400 days) after the Golden Age of Cronus began when Ham became king in 2012 BC.

Salah dies, age 433 years, of Shemitic lineage born 37 years after the Flood. (1) In this year Jacob, 18 years old, moves into the House of Shem who was 568 years old. By this time Japheth is dead and well as Ham leaving Shem as the oldest man on the planet, born 98 years before the Flood. Jacob is the student of the ancient Shem (Melchizedek) just as Abraham was the student under Noah. This was the 108th year since the establishment of the Abrahamic Covenant in 1877 BC.

Shem, the patriarch of all Semitic peoples, at age 600, died. (1) His death ends the ancient Ogdoad, the Eight Ancient Ones, being Noah and Naamah, ~~Isap~~ Japheth, Ham and Shem with their three wives. Of antediluvian pedigree he did not grow old as others did after the Deluge, cellular deterioration as we experience today unknown to them. This "agelessness" of the pre-flood people was why the biblical record describes Melchizedek as that "... he had no beginning and no end," his beginning was before the Flood and after the Deluge he ~~outlined~~ outlined his sons, grandsons and great grandsons. This was the 110th years of Isaac and the 50th year of Jacob and Esau.

An Amorite Dynasty begins in Egypt referred to as the Hyksos Kings, or Foreign Rulers. These were also called the Shepherd Kings. The Amorites of Mitanni by this time have spread across the Fertile Crescent and occupied Syria, Canaan, Babylonia. The invasion of

the Amorite-led armies of Canaan, Babylonia, Mitanni, Philistia and the Amalekites never conquered the interior of Egypt but stayed in Lower Egypt, occupying Memphis and On. To the far south Thebes of Upper Egypt remained autonomous. The Hyksos occupation established a mercantile empire and brought great prosperity to Egypt. It was the dominion of the Hyksos that led to the prominence of the Israelites in Egyptian government.

The calendrics for this year are interesting. This was the 2160th year (1080x2) of the Annus Mundi calendar and 1104 years (552x2) since the beginning of the Anunnaki Dynasty, called the Oppression in 2839 BC when the Seven Nephilim Kings began to rule over the Sethites in the land that would later be called Egypt. This was 1080 years after the completion of the Great Pyramid in 2815 BC in Egypt. The Egyptians were Hamitic and this loss of Egyptian power was 500 years (6000 months) after Noah cursed Ham and his offspring. This occupation of Egypt was 144 years after the Battle of Kuruksata, the East against the West in 1879 BC. Jacob and Esau were 52 years old.

He calls Esau to him and asks him to hunt a fresh kill and cook the meat for him so he can give him his blessing. Jacob discovers the matter and contrives to steal the blessing from Esau, feeling that he is justified because 48 years earlier when Esau killed Nimrod and escaped the Babylonian soldiers in the Hule Marsh had sold his birthright to Jacob for food. Apparently Esau lied so Jacob cooked some meat and took it into his blind father pretending to be his brother. Isaac blessed Jacob and Esau was enraged. (1) Jacob flees the wrath of Esau and goes to the House of Eber, who was also a Shemite and at 448 years old was the oldest man alive at the time of the Semitic lineage. Jacob and Esau were 63 years old.

Jacob is confronted with a figure that he realizes is divine, an angel or avatar of God. He wrestles with the stranger to obtain blessing from God and in the conflict his hip is broken. The stranger awards him a new name, Israel. (1) The change of one's name was a fundamental tenet of the Elder Faith equivalent to receiving atonement, the covering of a spiritual garment. This is why the Revelation text had Christ proclaim that those who believe in Him will receive a new name. Through this stranger God promises Jacob- "And you shall have children of good characters; but their multitude shall be innumerable; and they shall leave what they have to a still more numerous posterity, to whom, and to whose posterity, I will give dominion of all land, and their posterity shall fill the earth and sea." (2) The tribes of Israel would multiply and become mighty and famous nations and empires. Jacob is 90 years old, or 1080 months.

Planet Phoenix passes through the inner system and transits directly between the orbits of Venus and Earth darkening the sun, completing its 138 year orbit. This visitation of Phoenix gave rise to the Bronze Age traditions of the Phoenix bird immersing into the sun every 5 ~~xxxx~~ centuries or so. This year was exactly one Phoenix Cycle of 552 years after the Great Flood. By this date there were at least 120,000,000 people on the planet, this being a very low approximation. In this year Jacob was 100 years old when his daughter Dinah was abducted by a Canaanite named Shechem. She had been violated so Jacob's mighty sons slew Shechem and the men of the city. (1) This is the background to an extraordinary story in the Book of Jasher. We find that the local Amorite overlords assembled an army of Canaanites to punish the sons of Jacob but the patriarch prayed to God on the field of battle and suddenly, in the daytime, the sun darkened terrifying the Canaanites followed by a terrible earthquake. (2) The Canaanites flee but the sons of Jacob pursue them and effect a great slaughter throughout the Canaanite cities. This was 260 years (52x5) from ~~xxx~~

the birth of Abraham in 1947 BC.

The ancient Chinese changed dynasties by what was known as the Mandate of Heaven. When cataclysmic events occurred it was the belief of the Orientals that this signified a need for dynastic change, that the gods were displeased with human government. The Chinese Bamboo Books relate that at this time the earth quaked, ~~meteoric~~ meteoric ~~rain~~ rain fell and there was a five-planet alignment in 1688 BC. (3) This was the collapse of the Xia (Chieh) Dynasty which was overthrown by a series of yellow fogs, a famine and the darkening of the sun. (4) The fall of the Xia Dynasty was specifically due to the darkening of the sun which some historians link to an eruption of the volcano Thera (5) because they sought to account for the darkness, not knowing about planet Phoenix.

Historian W.J. Perry's work on the Archaic Civilization was published in his 551-page work entitled Children of the Sun in 1923 AD. He provides a wealth of evidence that the ruling families and dynasties called themselves Children of the Sun during the Archaic Civilization period which abruptly ended in warring states and violence ~~in~~ "...about 1688 BC." (6) From this point on the rulers quit referring to themselves as Children of the Sun, which, until this date the sun was believed to be perfect and unchanging. The darkening of the sun shattered this old paradigm. Perry concluded by writings, "The destruction of the Archaic Civilization revealed fresh potentialities in man; mother-right gave way to father right, military aristocracies came into being, war gods emerged, and the world began to take on a shape that we all recognize." (7)

In the chronological records of Marcus Varro as conveyed by Augustine the land of Argos in southern Greece was ruled by Phoroneus, the son of Inachus, during the latter years of Isaac's life. (8) It was during the reign of Phoroneus of Argos (Mycenaea) when ancient writers claim that the Flood of Ogyges occurred. This disaster afflicted the area that would later be called the Peloponnesus. Augustine dates this disaster in the reign of Phoroneus. Citing Varro's Of the Race of the Roman People we read, "There occurred a remarkable celestial portent; for Castor reports that, in the brilliant star Venus, called Vesperugo by Plautus, and the lovely Hesperus by Homer, there occurred a strange prodigy, that it changed its color, size, form, course, which never happened before nor since. Adrastus of Cyzicus, and Dion of Naples, famous mathematicians, said that this occurred in the reign of Ogyges." (9) The planet we call Venus today was not originally known by this name. This name is an etymological relic that has caused much ~~historical~~ historical confusion with that of Phoenix. In fact, the two are ~~phonetically~~ phonetically similar. ~~Venus is not Phoenix and Phoenix is not Venus~~ Venus can be [V]oenix and Phoenix can be [Ph]oenix. Planet Venus never altered its course, changed shape, size and color. What was seen was Phoenix and evidence of this is the fact that the Flood of Ogyges was ~~accompanied~~ accompanied by a great darkness. (10) This event is also mentioned by Greek scholar Robert Graves as the Thriassian flooding of the Thriassian Plain which he asserts was an historic event. (11) The confusion with the planet we now call Venus derives from the fact that Phoenix transited between the orbit of Earth and Venus, crossing the ecliptic plane in a path unknown to the ancients, its passage from north-to-south. All the other planet, including Venus, follow the ecliptic. Phoenix does not.

The "Venus Solution" is commented on by researcher Frank Joseph. Joseph published the findings of elite scientists who met in 1997 AD in the fields of archeology, archaeoastronomy, geology, paleobotany, ~~and~~ climatology, astrophysics and oceanography who concluded that. They determined by ~~their~~ their findings that the Ancient World had suffered a series of cataclysmic impacts and disasters. One date focused on, and this was an approximate, was about 1628 BC. (12) This date is only 59 years from 1687 BC. Joseph then cites that this disaster occurred in the 9th year of the reign of King Amaziduga of the Hittites, when the king describes ~~in~~ in a stone tablet seeing a great celestial body called NINSIANNNA that other researchers pass off as Venus according to Joseph. (13) This would have been 1687 BC. The 1629 BC date originated with a scientific analysis of tree ring samples taken from around the world, some even from the ancient Bristle Pines of ~~a~~ California, from sea bed deposits and ice cores. These findings gave the approximate of 1628 BC. (14)

A closer approximate is the accepted date for earthquakes and floods that destroyed the early civilization of ~~Crete~~ Crete, at about 1700 BC. (15) This is only 13 years off. The destruction collapsed fortifications and preserved for archeologists evidence that there were indeed giants alive in the Bronze Age. Bat-winged battleaxes have been excavated at Crete measuring a heroic three and half feet across, exhibited today on walls. (16) Only men who stood nine to eleven foot tall could have wielded such massive weapons. As Crete was ruined so were other Mediterranean ports and cities. The famous story of the flooding of Joppa finds its origin with the 1687 BC. Joppa was on the Canaanite coast, close to where Rephaim and Anakim giants resided. Joppa may have been the origin of the stranger Ogyges who according to the oldest traditions was a leader of giants who washed ashore during the flooding. In fact, Ogyges is a name derived from a root meaning giant. That a disaster occurred is further seen in that stone masons and architects left their tools laying about the Minoan ruins as if they were in a hurry to leave. (17)

Many of the world's coastlines were permanently changed. A formerly thriving port in South America was shoved upward to an elevation of 12,000 feet, the entire mountainous range of the Andes raised overnight. The city of Tiahuanacu, the ruins around lake Titicaca, Puma Punka, the Urubamba valley were all elevated and abandoned because of the frigid conditions. The ruins have been dated at approximately 1600 BC by radiocarbon analysis. (18) The famous Gate of the Sun depicted angelic beings coming from heaven (Anunnaki) and a picture of Tammuz, the Weeping ~~God~~ God so popular in ancient Near Eastern iconography. With Tiahuanacu uninhabitable, the people migrated to Cuzco according to ancient Incan tradition. (19)

Throughout the entire world cities and civilizations were laid waste. It is a good assumption that millions of people died. The immense megalithic stoneworks of Baalbek were abandoned as were those strange statues of heads on Easter Island, archeologists baffled as to why whole workshops have been excavated with tools lying about as if men dropped them where they were. Thousands of islands vanished while others appeared. The basalt city of Metalanin, 11 square miles of gigantic earthworks, colossal pillars, temple edifices and artificial ~~way~~ waterways of dense and heavy basement rock on Ponape Island was ~~sub~~ submerged, tilted and later partially resurfaced where it lies today between Japan and Hawaii. This ruined city could have supported a population of a million people. (20) The same fate was suffered by those who lived among the ruins on Yap island in the ~~Caroline~~ Carolines. In Italy the Chittim in some communities at the base of Mount Vesuvius were totally buried alive under layers of volcanic pumice and ash at the exact same sites that would later become the Roman cities of Pompeii and Herculaneum that were also buried by the volcano in 79 BC.

The island of Malta was also flooded over. The famous Hypogeum is located on Malta, an underground complex of great mystery once housing 7000 skeletons though it was not a burial chamber. Also, Hagar Qim, a huge megalithic temple on Malta shows evidence of a tsunami, a three foot layer of silt was deposited over the ruins, as well as at Tarxien on Malta with its massive stone gates of round stones fitted to sockets and the same three foot layer of silt. (21) Gozo island near Malta has similar ruins, called Ggantija Temple, which means Work of the Giants. (22)

In this year Stonehenge was damaged and locals in the isles of what we would later call Britain would re-erect some of the monuments, the enormous sarsens and the smaller blue-stones. This is known as Stonehenge III. Interestingly, Sir Norman Lockyer, oblivious to this 1687 BC cataclysm, dated the erection of Stonehenge at 1680 BC.

That this would be a disastrous year for ancient American cultures is evidenced in the fact that this is 1687-1686 of the Olmec Calendar, paralleling the 1687 ~~year~~ BC year of our Gregorian dating. Further, this was 3552 Anunnaki Chronology, this being a Golden Proportion number being 1776+1776. This dating reflects a future disaster in 713 BC, the 2400th year of the Mayan Long-Count when the solar year will be changed from 360 days a year to 365.25 due to a near-collision between Earth and the Dark Satellite. This year of 1687 BC was 1426 of the Mayan Calendar from 3113 BC, or 713+713 years. This transit of

Phoenix ends the Early Bronze Age and the demographics of the Ancient World is altered. The date is fixed by the Rape of Dinah in 1687 BC by the chronological records of the Book of Jasher and by the biblical chronologist Stephen Jones in his Secrets of Time. This situation, her treacherous accusation ~~had~~ landed him in prison and the story is the source of the Egyptian Tale of Two Brothers which is preserved upon an ancient Egyptian papyrus in the in the British Museum. After several years in prison Joseph interpretes a dream for Pharaoh. He was falsely

accused of rape by Potiphar's wife. (1) Dreams troubled the king of Egypt and Joseph was summoned to interpret them after his unique ability was made known through other prisoners. The dream concerns seven years of plenty that Egypt would enjoy followed by seven years of severe famine. Joseph is ~~xxx~~ instantly elevated in status and proclaimed as Prime Minister of all Hyksos-controlled Egypt at 30 years old, exactly 13 years after being sold into slavery by his brothers, the sons of ~~B~~ Leah. (2) Joseph is Prime Minister under a Hyksos King and it was under these rulers, the Shepherd Kings, of Mesopotamia ~~xxx~~ and Canaan that the Israelites would flourish. The Shepherd Kings were an amalgamation of Canaanite-speaking people of Syria-Palestine. (3) Like the Israelites the Hyksos venerated Set (Seth) who was regarded as Lord of Lower Egypt. (4) Joseph lives in a palace at On (Memphis), the ancient city of ~~xxxx~~ Annu that would later be called Heliopolis, the center of Hyksos government and he is remembered as the famous and most revered Djoser. (5) Djoser is D[Joser], who was in Phoenicia called Ioseppe, the I resolving to the modern J, for Jseppe (Joseph). In this year Joseph turns 34 and he is married to a highpriest's daughter. In this year she gives birth to twin boys who are given Egyptian names. These two boys have a special destiny, becoming patriarchs of two more tribes that will be adopted into the Israelite families. These two will become the patriarchs over whole companies of nations and famous empires in the future. They will be renamed in 1639 BC. The prophet Isaiah wrote that in the days of Joseph the king of Egypt was Assyrian. (1) The calendrics for this year are stunning and convey the importance of these two sons of Joseph.

As 2232 Annus Muni this is ~~XX~~ 744x3. This is the year 1776 from the Descent of the Watchers, a year in the Anno Domini timeline that will begin the United States of America. This was 1440 years after the start of the Black Age, the Kali Yuga, being 144x10. This was 1152, or 144x8 years after the completion of the Great Pyramid in 2815 BC, the Great Pyramid being the ancient Seal of Israel as it is also the Seal of the United States. It was at the very site of Goshen, the land around the Great Pyramid where the Israelites lived in Egypt. This year was 576 years after the Deluge, or 144x4. The Abrahamic ~~xxx~~ Covenant was reaffirmed in 1807 BC, 144 years earlier.

The sons of Jacob and Leah with Benjamin the son of Rachel are sent back to Egypt from Canaan to buy more food. Joseph, Prime Minister of Egypt known as Djoser is 39 years old and he meets his brothers and reveals his identity to them. Jacob is told that his long lost beloved son is alive and second in command of Egypt. The House of Israel moves into Egypt and given the land of Goshen around the Great Pyramid complex, the same place that was the center of Sethite pre-flood civilization. (1) Jacob is 130 years old. Toward the end of this year is exactly 1447 years after start of the Vedic Calendar in 3103 BC, the year 1447 BC being the Exodus of Israel out of Egypt. This year begins Israel's first year in Egypt. The House of Israel is at this time numbered at 70. However, Ephraim and Manasseh, the two sons of Joseph (Djoser), would later be adopted into Israel by Jacob in 1639 BC, making this number 72. This year is 1656 (552x3) years to the 1st year of Christ in 1 BC.

The Great Famine ends after seven years. (1) Joseph has enriched the Hyksos Dynasty and now begins to build massive architectural monuments in Egypt, raising pyramids, temples and embarks upon the greatest project in all Egypt outside the Giza Complex, the 250 miles of canalworks along the Nile. This is done in response to the Nile's failure to rise for seven years, which caused the famine. This incredibly advanced feat of ancient engineering was ~~designed~~ designed to regulate the flow of the Nile during the flood season. A massive lake reservoir system was created that also boasted productive fisheries. Even today the locals call it Bar Jousseus, or Canal of Joseph. Herodotus, Pliny all confirm the canal's origin with the Israelites. (2) There are many places in Egypt still bearing Joseph's name. This is the 360th year from Ham's 1st year on the throne in 2012 BC.

Jacob (Israel) dies at age 147 in the very beginning of the year. On his deathbed he summoned Joseph and his ~~two~~ two sons, Manasseh and Ephraim who are both 24 years old. Inspired by God the old patriarch blessed both of these young men and prophesies ~~that~~ that these two men would father mighty empires descended from Israel in the Last Days. They are renamed Manasseh (forgetful) and Ephraim (doubly fruitful) and formerly adopted into the Israelite family. These men were Egyptian by culture but both Egyptian and Israelite in pedigree. Joseph is told that God has already blessed him beyond all of his sons so the blessing passed to his two sons, Manasseh and Ephraim. These will become the 13th Tribe, with Benjamin these future nations are those referred to in Scripture as Rachel's children, the beloved of Jacob. The amazing history of these nations and empires in Europe and America will be revealed in this research. Ephraim will become the mightiest of all peoples ever seen on this earth, the Tribe of Adoption who has as their national seal the Great Pyramid.

The calendrics for the death of Jacob and the Abrahamic Blessing passing onto the two sons of Joseph is fascinating. This year was 3600 years (600x6) of the Anunnaki Chronology, a system of Great Years each 600 years long. It was taught long ago that every 600 years a "Great Man" arises or is born. (1) This was the year 2400 since Earth began orbiting the present sun and 1800 years (600x3) from 3439 BC when the Watchers descended from NIBIRU (heaven) to Earth. Noah was born 600 years before the Flood, in 2839 BC, exactly 1200 years (600x2) before the adoption of Manasseh and Ephraim and death of Jacob. This

was 600 years after the Deluge in 2239 BC. Because Jacob was born 147 years priorly in 1787 BC then he was conceived about 270 days earlier, ~~xxx~~ nine months in the ~~w~~ womb, so its a safe assumption that he was conceived 148 years before he blessed ~~R~~ Ephraim and Manesseh, this being 1776 months.

At the death of Jacob the Israelites assemble~~s~~ and follow Joseph, the Prime Minister, to Canaan, to bury their patriarch. Joseph orders the Israelites to march in the funeral procession in a certain positional order around the body of Jacob, their positions serving as prophetic allusions to the distinct future geographical regions the descendants of these men would later possess in the earth. The tribes of Benjamin, Manesseh and Ephraim are positioned on the west. (2) The procession travels to the Cave of Machpelah which Abraham bought from the Canaanites (Hittites) in 1807 BC 168 years earlier to bury Sarah. Joining them were 31 Canaanites kings and their ~~xxxxxxxx~~ retainers who honored the memory of Abraham, ~~Jaco~~ Isaac, Jacob and his sons. Esau appeared at the cave and attempted to bar the burial, the brother and enemy of Jacob.

A battle ensued and the conflict was evenly matched, as Esau had brought family and retainers. One of the Israelites was named Chusham who was deaf and mute. The man ran out into the battlefield and slew Esau with a sword and chopped Esau's head off just as the youthful Esau had decapitated Nimrod in 1772 BC. Joseph and the Israelites prevailed against the enemies and even took Zepho and others as prisoner who were bound in chains and taken back to Egypt. (3) This begins the fascinating history of Zepho, the grandson of Esau who would take the blood of Esau to the land of ancient Italy.

In the chronology of Marcus Varro according to Augustine, in the year Jacob died the 4th king ruled Argos. This dynasty began with Inachus, then Phornoeus, Apis and now Argos. This man was how the city in southern Greece got its name. Argos was not originally called by this name. Varro relates that this begins the nation of the Argives. (4) The Argives will be famously immortalized in the pages of Homer's Iliad.

The Pharaoh that elevated Joseph (Djoser) in Egypt died and he is succeeded by his son ~~Magron~~ Magron. (1) He assumed the title Thutmose I, Magron being his Assyrian-Canaanite name. He too was of the Hyksos Dynasty. Magron was born in 1666 BC in the same year that Magron's father made Joseph the Prime Minister, 41 years priorly. Before his death he asjed Jospheh to guide his some (Thutmose I) in his reign and throughout his entire reign the co-rulership between Djoser (Joseph) and Thutmose I never met with an problems. The kings of Egypt regularly had five names. (2) These would be a personal name, throne name, dynastic name and epithets attributed for personal exploits or traits. During their co-rulership, Canaan, Philistia and Nubia would be subdued and made to pay tribute. (3)

As the Hyksos powers waned, their power base in Mesopotamia at Mitanni where the Amorites ruled over the Near East but were contending with the rising might of the Hittites, the sons of Esau assemble a massive army of Midianites (Arabians), Ishmaelites, people from Seir and Canaan in a combined army of 800,000 soldiers. The Egyptians with a ~~small~~ small group of Israelites go out to meet the enemy. Out on the frontier the Egyptians are routed leaving the Israelites behind as they flee. Fighting fiercely the Israelites beat back the invaders. Joseph (Djoser) is victorious and the corpses of the enemy numbered about 200,300. (1) Though they had saved the nation a fear of the Israelites took

root among the people that would later haunt them. One of those that hated the Israelites was Zepho, grandson of Esau who was already in his 32nd year of slavery in Egypt after his capture in the battle over the Cave of Machpelah when Esau was killed after the death of Jacob. This was 50th year of Israel going into Egypt in 1657 BC.

The Hittites of Anatolia, a Japhetic empire throughout Phrygia, Caria, Asia Minor as far as Ilium where Troy sits and Lebanon and Syria with garrisons into Canaan invade Mesopotamia and overthrow the Amorite Dynasty of Babylon, beginning the Hittite Dynasty of Babylon. This was 270 years from 1865 BC when Hammurabi (Nimrod) again led successful Amorite invasions into the west. This overthrow of Amorite power critically weakened the Hyksos control over Egypt and severed the aid the Shepherd Kings received in the administration of their empire with Assyria and Mesopotamia. This power shift was immediately felt throughout Egypt. Under Hyksos rule the Two Kingdoms, Lower and Upper Egypt prospered and the nation had grown populous and wealthy. This new political climate brought Egyptian nationalism to the forefront.

The 270 years of ~~fx~~ firmly established Amorite control of the Fertile Crescent ended, this was 90x3 years, or 1080+1080+1080 months. This was 744 years after Japheth born before the Flood in 2339 BC, 252 years from the birth of Isaac and 62 years since the Israelites had entered Egypt, or 744 months.

At the beginning of the year Joseph (Djoser), aged 110, died and the Egyptians mourn and bury him in the Tombs of the Kings, known to us as the Valley of the Kings. This area is placed under heavy Egyptian guard due to a state secret concerning a prophecy uttered by the sorcerers of Egypt that when the bones of Djoser are removed from Egypt the land will suffer great plagues and darkness. (1) At the start of the year when Joseph died it was still the 71st year since Jacob brought his house from Canaan to live in Egypt. (2) Also in this year king Magron died, known better as Thutmose I after exactly 40 years of co-rulership of Lower Egypt with Djoser (Joseph). Thutmose I is succeeded by his son, ~~Thut~~ Thutmose II whose reign would only last nine years. The death of Joseph, Thutmose I and the prophecy of Joseph's bones occur 138 years (1656 months being 552x3 or 414x4) before the fulfillment of the prediction in 1447 BC with the Ten Plagues on Egypt and ~~Exodus~~ Exodus of Israel.

Joseph's death begins a 20 year period according to the Book of Jasher wherein all the patriarchs of Israel die off, leaving only Joseph's sons Manasseh and Ephraim alive after 1565 BC. The order of their deaths and ages is: Zebulun at 114; Simeon at 120; Reuben at 125; Dan at 123; Issachar at 122; Asher at 123; Gad at 125; Judah at 129; Naphtali at 129 and Levi the last at 137. (3) Interestingly, coins from Egypt once thought to be amulets bear Joseph's name in hieroglyphics as well as his Egyptian title, Saba Sabani, the coins having an image of Joseph with a cow- a reference to Pharaoh's ~~dream~~ dream of the seven fat cows followed by the seven lean cows. The Famine. This was publicized by Dr. Sa'id Muhammed Thabet of Egypt in 2009 AD. (4) According to Augustine, at the death of Joseph in Egypt the fourth king of Argos still reigned in southern Greece, Argus. (5) That the ancient chroniclers like Marcus Varro and those before him so diligently recorded the dynasty of old Mycenaea denotes the importance of this government to the ancients. This people were the direct descendants not of Japheth, Shem or Ham, but of Noah and Naaamah, a lineage born after the Flood and founded by the powerful Anakim.

Toward the end of the year we arrive at the 72nd year since the Israelites moved into Egypt, thus concluding the narrative of the Book of Genesis.

Some time during the previous year when Joseph died the grandson of Esau named Zepho and his kin escaped Egypt, after 54 years of bondage under the Israelites. Zepho escapes to Libya and becomes a war general under King Angeas, beginning his 50 years of rule to ~~1534~~ 1534 BC. At that time King Angeas desires to marry a beautiful daughter of a man named Uzu who was ~~regarded~~ regarded as a local god in Italia among the Chittim. Her name was Jania. After formerly requesting the girl the Chittim refused him because they had arranged her marriage to someone else. King Angeas of Libya was enraged, and allied with Sardinia, he made war against the Chittim. Hearing of the alliance, King Turnus of Chittim launched his ships from Italia to Sardinia and defeated them. (1) Then the Libyans sailed to Italia and fought Turnus between two places called Alphanu and Romah (a pre-Roman site) and the Chittim were defeated. Jania was captured and taken to King Angeas. (2) This begins the ancestral hatred between Italy (Rome) and northern Africa (Libya and Carthage) It is known that sailing from ~~Egypt~~ Egypt to Rome takes 16 days (3), but Libya is closer than Egypt. The people called Romans have not yet arrived to Italia. They would arrive and then amalgamate with the local populace. For this reason the early Jews called the Romans by the name of Khittim. Zepho too part in these battles.

Zepho, grandson of Esau and general over King Angeas army in Libya, has repeatedly tried to persuade King Angeas to make war against Egypt. It is widely known that the political situation in Egypt is unstable. The Shepherd Kings powerbase in Assyria and Mesopotamia has weakened by the Hittite takeover. But Zepho's true ambition is revenge against the Israelites for the death of his ~~grandfather~~ grandfather Esau and his enslavement for 54 years. But King Angeas refuses. Enraged, Zepho travels to Chittim (Italia) and lives among the populace, becoming a hero when he kills a strange creature hiding in caves that had been killing off local livestock. (1) This begins the line of Esau among the people of Italy, a spirit of hatred against the Israelites that would manifest over and over throughout history in the annals of Rome and Europe. This date is precisely 828 years (414+414), or two Cursed Earth periods before the 753 BC famous founding of Rome. Back in Libya in this year Queen Jania of Chittim married to King Angeas of Libya fell ill but was made better after ships sent to Italia returned with water and soil from her homeland. (2)

Zepho, now a hero among the people of Chittim, assembled a force of locals and began repelling the Libyans which resulted in the people electing him as king. Thutmose II of Egypt died and he is succeeded by Amenhotep. His wife is the famous Queen Hatshepsut who enjoy a reign of 21 years of peace. In this year Thutmose III is born, a man who would later overthrow his mother and initiate a heavy oppression over Israel. Amenhotep is a native Egyptian ruler under the Hyksos Dynasty but Hatshepsut is an Amorite princess, now a queen. A reference to Phoenix is found in a Greek papyrus translation of an older Egyptian text dating from the reign of Amenhotep- "For in the Typhon time the sun is veiled." (1) Ty[phon] is etymologically related to [Phoen]ix. The Egyptians too knew that it darkened the sun. There is no evidence that Phoenix appeared during the reign of Amenhotep. This is merely an Egyptian reference to the phenomenon. Phoenix would not appear until 1549 BC, six years after the death of Amenhotep. This is the 81st year since the Israelites took up residence in Egypt.

This is 40 years after the Canaanite invasion of Egypt instigated by Esau's sons in 1607 BC that was slaughtered by the force of defending Israelites. This prior invasion was in the reign of Thutmose I, also called Amhose. After the Canaanite invaders were defeated, the Egyptians made deep incursions into Canaan and further north to ~~Syria~~ Syria, this being a Hyksos Dynasty occupation from their center at Lower Egypt. Now, in 1567 BC the king of Kadesh in northern Syria leads a confederacy of Syrians, ~~Hittites~~ Hittites and Canaanites into Egypt. This invasion is unsuccessful for ~~Thutmose III~~ Thutmose III defeated the confederacy at Megiddo (valley of Armageddon) but Kadesh still posed a threat. (1) The name Kadesh means Holy City and some researchers believe that this is a reference to the city of Urusalem (Jerusalem), a popular Canaanite stronghold. Thutmose III now begins a series of 17 military campaigns against Canaan and Syria.

The historical-archeological record perfectly compliments the chronological record of the Book of Jasher. The dating of this event is precise. The international politics behind the Syrian confederation is due to the Hittite presence in the north and northeast as well as the waning of the Amorite powers that strengthened what the Egyptians terms as the Hyksos (Foreign Rulers). The land of Canaan and Syria were a buffer zone between two empires, the Hittites and Amorites. The calendrics for this year are astonishing.

As this involved a major historical war fought at Armageddon we find it interesting that this is the exact midpoint in the entire Anunnaki Chronology, the 7344 years (2448x3) of the entire chronology, which is also ~~encoded~~ encoded within the ~~chronometry~~ chronometry of the Great Pyramid. 1567 BC is 3672 years Before Armageddon and also ~~3672~~ 3672 years into the Anunnaki Chronology which began in 5239 BC. 3672+3672 is 7344. This year is the 1872nd year (144x13) from the Descent of the Watchers in 3439 BC and the 90th year (1080 months) since the Israelites entered Egypt in 1657 BC.

The Shepherd Kings heavily fortify Tanis and Memphis in Lower Egypt. Upper Egypt has become mighty, a separate nationalistic Egyptian government. The Hyksos are Syrians, Assyrians, Babylonians, Canaanites and are also members of the Sea Peoples Federation. The Hittites continue to garrison Canaan and Syria as the power of the Amorites wanes.

The Hyksos relinquish control over Libya and Nubia and concentrate on their holdings in the east which are quickly being absorbed by the Hittites. The Amorites of Mitanni are already Hittite sympathizers and Thutmose III, now three years after defeating Kadesh, marches his army across Canaan and into Mesopotamia across the Euphrates ~~to~~ river in Babylonia and crushes the kingdom of Mitanni. (1) He intensifies Egyptian expansion into Palestine, Syria and northward opposing the Hittite presence. He overruns Canaan and the kings of Canaan become Egyptian vassals, which explains why ~~350~~ 120 years later in 1445 BC the Canaanite kings sent clay tablet messages to Pharaoh to protect them from the invading Apiru (Hebrews), the texts called the Amarna Documents. Because the Hyksos power begins to wane the Libyans more freely send out plundering expeditions to different islands. They again raid the coasts of the Chittim in Italia. And again Zepho drives them off. (2) This was the 670th year since Noah proclaimed the Curse on Ham and Canaan in 2235 BC, and the 92nd year from the Israelites entering Egypt. Israelites forced to labor this year. (3)

1555 BC (2340 AM): 3660 Before Armageddon/ 3684 Anunnaki Chronology/ 2754 Phoenix Chronology/ 2484 Orbital Chronology/ 1260 Anno Pyramid/ 684 After Flood/ 344 After Babel This begins the narrative of the Book of Exodus, which was 108 years before the Exodus of Israel from Egypt in 1447 BC. This year was also the 108th year of the lives of both Manesseh and Ephraim, the sons of Joseph, born in 1663 BC. Amenhotep died leaving his wife Hatshepsut, or Amorite pedigree, on the throne. Amenhotep's son Melol assumed the throne name Thutmose III and the exploits his father performed were attributed to himself, like the famous battle of Kadesh in 1567 BC. The son assumed the deeds of his father because he continued his reign by sitting on the throne of Egypt beside his own mother, Hatshepsut, wife of Amenhotep. Thutmose III was a nationalist ruler secretly against the Hyksos occupation. His mother would continue to rule Egypt with him for 22 more years until he forcibly removes her from the throne. This in Jasher is considered the first year of the Oppression of the Israelites. (1) this was the 102nd year since the Israelites entered Egypt, being 1224 months. The sum of 1224 will resurface throughout this chronology over and over concerning Israelite and Israelite-descended peoples and their timelines. 1224 is half of 2448 (2448 AM being year of Exodus in 1447 BC). This was the year 2484 since the Earth had entered this newer orbit, or 414x6. As this was 1260 from the completion of the Great Pyramid, built by the Sethite ancestors of the Israelites, it was also 252 years after the Abrahamic Covenant was confirmed in 1807 BC, 1260 being 252x5. As this year marks the rise of a king of Egypt not sympathetic to the Israelites we see this year as 680 years after the Curse of Ham and Canaan by Noah in 2235 BC, or 244,800 days (680x360), the number 2448 AM being 1447 BC, the Exodus and judgements upon Egypt. As a result of the growing population of Israel in Goshen of lower Egypt a conspiracy is hatched. Slowly, over a course of weeks and months, Egyptian laborers and residents of Egyptian origin living among the ~~to~~ Israelite slowly begin departing, leaving nothing but Israelites and other foreigners at all the labor details, setting the stage for their complete subjugation.

In this year Libyan ships under the order of King Angeas plunder the coasts of Chittim (Italia), Zepho, king of the Chittim and grandson of Esau, captured and killed them all. King Angeas of Libya is enraged and assembles his forces and allies while Zepho sends messages to his kin in Edom to come to his aid, but they refused. Desperate, the people of Chittim, being Etruscans, Latins and Sabines remembered that Zepho was the great grandson of Abraham, the famed patriarch who withstood Nimrod ~~to~~ prior to the great Dispersion at Babel. They begged Zepho to humble himself and pray to the God of Abraham and Isaac, whom they had heard about. Zepho listened to reason and complied and God instantly strengthened the people of Chittim who then defeated the Libyan hosts, even felling their great general Sosiphtar. King Angeas escaped with his son Azdrubel. (2). This same scenario will be repeated in 207 BC when the Carthaginian (African) general Asdrubel was defeated by the Romans (Chittim) in the Punic Wars. After the defeat of Libya the Chaldean seer and magi

Balaam who was originally from Mesopotami leaves the court of Angeas in Libya and takes up residence with Zepho in Italia. Zepho, after securing his victory despite the odds and intervention of God, quickly abandoned the God of Abraham and Isaac and ~~begin~~ began heathen practices. (3) Zepho amassed a great army of Chittim and they sailed to Canaan where they joined armies of his kin in Edom and Ishmaelites. With these combines armies Zepho attacked Egypt and faught at the valley of Pathros initially defeating the Egyptians but stopped by an inferior army of Israelites. (4) This battle during the reign of Thutmose III was exactly 52 years after the last time Egypt was invaded by Canaanites, Ishmaelites and Edomites, and with the same result. This battle was 324 years (108x3) after the famous Battle of Kuruksata in 1879 BC. Zepho escapes back to Chittim. Many of his kin, the descendants of Esau, remove from Edom and join him in Italia~~s~~ becoming members of the nobility.

After passing over the ecliptic for 15 years completing their 301 year orbit, the Sodom-Trojan Apocalypse Comet Group passes in close proximity to Earth. A comet is seen brilliantly in the heavens by the Chinese and Egyptians. According to the Tulli Papayrus the priests of Karnak recorded that in the 22nd year of Thutmose III there ~~sappeared~~ appeared an extremely brilliant comet, one very different that those of old. (1) The reference to 22 years is a reference to fact that Thutmose III did not truly rule Egypt until after he seized total

power from his mother Hatshepsut in this year, 22 years after the death of his father Amenhotep. The Tulli Papyrus describes that the comet (disk of fire) broke apart in the sky and became smaller disks. (2) Thutmose III immediately begins killing off his political rivals and enemies in mock trials for fictitious offenses. He becomes a tyrannical dictator. (3) According to the 2nd century AD bishop of Antioch named Theophilus, the Egyptian king Tethmoses is referred to as the Pharaoh that began the Oppression. (4) According to Exodus 2:23 Thutmose reigned "...for a long time," and was succeeded by Amasis, who according to Manetho the priest-historian of Alexandria, Egypt was Rameses.

This was the 124th year of the Israelites coming into Egypt and yet the Oppression was not yet in full operation. Conditions for the Israelites had gradually worsened but still they maintained freedoms and privileges. Though labor conscription was occurring and the Israelites with some other foreigners were the backbone of the manual labor force, they were still at this time relatively free. This year was the 414th year (Cursed Earth period) from the birth of Abraham in 1947 BC, which was also the first regnal year of Nimrod.

1. The End of Eden 140; 2. The End of Eden 165-167, author Phillips believes this date is 1486 BC (47 years off) but this is due to wrong chronology employed by him for Thutmose III; 3. The End of Eden 112-113; 4. The Wars of Gods and Men: Abraham: The Fateful Years: Sitchin

1531 BC (2364 AM): 3636 Before Armageddon/ 3708 Anunnaki Chronology/ 2778 Phoenix Chronology/ 2508 Orbital Chronology/ 1284 Anno Pyramid/ 708 After Flood/ 368 After Babel The Amorite founded Hyksos Dynasty ends after 204 years (2448 months) over Lower Egypt, paralleling the year 2448 * Annus Mundi (1447 BC) when the Israelite flee Egypt in the Exodus. This is 84 years ~~before~~ before the Exodus. Interestingly, one of the Hyksos kings bears that same non-Egyptian name as one of the gigantic sons of Anak who is found in the biblical record named Sheshai. (1) In fact, in 1445 BC when the spies of Israel go into the interior of Canaan they come face to face with the giant named Sheshai, a son of Anak described as enormous. This is further evidence that ancient Mycenaea (Argos) was part of the Hyksos federation. With collapse of Hyksos Dynasty in Egypt Thutmose III is in complete control of all Egypt, Lower and Upper Egypt. A council is held on what to do about the swelling population of foreigners in Lower Egypt, especially Israel. The Egyptians express amazement at how fast the Israelites had multiplied in the 126 years they had been in Egypt, that they only seemed to increase in numbers with the more assignments given to them. Pharaoh published a formal decree for the male children of all newborn Israelites to be killed. (2) Israelites are forced to build pyramids, funerary complexes and cities. Historians note that it was during the reign of Thutmose III that Egyptian records first mention the institution of slavery. (3) This was the 276th year from the confirmation of the Abrahamic Covenant in 1807 BC, 276 being 138+138.

In the 130th year of the Israelites in Egypt Pharaoh ~~Thutmose III~~ Thutmose III has a dream of an old man holding up a pair of balances (scales: a symbol of judgement) with Egypt's mighty and nobles in one scale and a milk kid in the other (Israel), the kid outweighing all of Egypt. Balaam the seer interpreted this dream to mean that a deliverer had been born in Egypt, an evil arising against Egypt. (1) Again Thutmose III orders the deaths of all male children, ordering that they be cast into the Nile. (2) The prior order had been largely ignored but now the slave status of Israel is acknowledged throughout Egypt and the murder of Israelites was now obeyed. This is considered the first year of the Oppression, the year Moses was born. This repeats the prior patterns set by the birth of Noah in

2839 BC who was born in the first year of the Sethite Oppression by the Nephilim Dynasty before the Flood, and ~~Rax~~ Abraham who was born in 1947 BC in the first regnal year of the wicked Nimrod, 420 years before the birth of Moses (70x6). As officers are sent among the Israelites to hunt and execute children the Hebrews begin hiding their babies in back rooms but Egyptian women begin the cruel practice of entering the houses of Israelites with their own infants to torment those women who lost their babies. The Egyptian women would pinch their own babies to make them cry which induced hidden Hebrew babies to start crying, which were then reported to the Egyptian officers.

Moses is born, prophesied by Elder Faith traditions as the coming of the lawgiver. He is named Shemaiah and Moses is only the name he received by later generations who had forgotten his real name. The name Moses is a relic of the Egyptian title from Teth-Moses, the king. (3) Nimrod had usurped the prophecies in an attempt to gain the faith of the people that he was the predicted Lawgiver, which the Amorites accepted when he was sitting on the throne as Hammurabi, the Lawgiver. But the laws Hammurabi gave the people venerated the Anunnaki, as seen on the famous Code of Hammurabi stele. Nimrod, as Sargon I of Akkad, claimed to have been born and then hunted, placed in a basket by a river and found by someone of importance. Nimrod tried to emulate each capacity of the Elder Faith prophecies: the Shepherd, the Conqueror, the Giant-Killer, the King, the Savior, the Lawgiver, all roles later fulfilled by ~~M~~ Abraham, Jacob, Joseph, Moses, ~~M~~ Joshua, and David. These were prophetic foreshadowing of the coming of the Deliverer, the Christ.

Manetho of Alexandria wrote that Moses received a priestly education at Memphis (4) and that he was rescued from the Nile by the daughter of Pharaoh, raised in a royal court and in his life he became famous for his military exploits. (5) According to Augustine, at the birth of Moses the fifth king was then ruling Argos, named Criasus. (6) The dominant people in the Peloponness was now the Argives. This year was 260 years (52x5) since the birth of ~~Q~~ Jacob in 1787 BC and 350 years (70x5) from the institution of the Abraham Covenant in 1877 BC, 280 years (70x4) since it was confirmed in 1807 BC.

The Sphinx was partially buried and Thutmose III had a stele placed between the paws of the Sphinx which reads that the temple area of the Sphinx had been built in "...the First Time of the domain of Set." Set is an Egyptian memory of Seth, or Sethites. Thutmose III also erected at the city of Memphis four colossal pillars that would one day be placed on ships and carried to the empires descended from the very Israelites that erected them in Egypt. One would be placed on the Thames river in England and the other in New York city of the United States, these two latter day empires being the 13th Tribe of Israel, the tribe of adoption. The Seal of Israel would forever be the Great Pyramid (United States) and the Sphinx (Great Britain's old Seal). This was the 432nd year since the birth of Abraham in 1947 BC and the 720th year from the Curse of Ham, which includes Egypt, made in 2235 BC.

Moses visited his Israelite parents in Goshen. His real Egyptian name is not known but his Hebrew name was Shemaiah. In Goshen he saw firsthand how his people were treated and even killed an Egyptian soldier who raped a Hebrew woman while her husband was tied and forced to watch. (1) The matter was reported and Pharaoh sought to kill Moses but he fled Egypt and took up residence in Ethiopia (Kush) among the court. He would remain there for nine years before the people elected him king. This was the 148th year of the Israelites going into Egypt, or 1776 months.

In this year the men of Ephraim prematurely invade Canaan believing that the allotted period of their enslavement is over. The other Israelites do not join them. The Ephraimites are slaughtered by the Philistines, 30,000 men dying. 20,000 of the Philistines are killed. Only 10 men of Ephraim make it back to Egypt. (2) This will be a name to remember. King Janeas is interred in a huge funerary complex in Italia that takes six years to build. His burial will not occur until 1478 BC and during this time no one will be elected king over the Chittim, an interregnum period.

Troy would continue for 252 years to 1229 BC when a Mycenaean led Greek invasion force destroys the city and scatters the people during a major Mediterranean Sea Peoples Federation war.

After King Janeas is buried in a massive funerary complex that required six years of labor to construct, Latinus is made king of Italia and he builds a huge navy in this the 22nd year Moses was king of Kush (Ethiopia). Latinus through history is a name to remember. In this his first regnal year the Chittim attack Libya, about 15 days sail. The Africans are defeated and king Azdrubel is killed. His daughter Ushpezania is captured and married to Latinus. The Chittim depart back to Italia and the Libyans after this defeat make Azdrubel's younger brother king, Anibal (Hannibal). This was 106 years after Libya first attacked the Chittim in 1584 BC. The Libyans attacked Italia also in 1580, 1565 and 1555 BC. This was the first time the Chittim ever attacked Libya. This invasion was early in the year. In this same year King Anibal of Libya puts together a navy and invades Chittim with his entire army winning many victories over the Chittim in land battles in an overseas campaign that lasts 18 years. (1)

This is precisely what occurred 1260 years later in 218 BC in the Second Punic War when the people of the north African coast (Carthage) were at war with Rome. In 218 BC the Carthaginian General Hannibal (Anibal) invaded Italy with his African army and almost made it to the walls of Rome in a war lasting 18 years on Roman soil. Further, demonstrating that the past can be reflected in future events, in 207 BC during this war the brother of Hannibal was killed, his name being Asdrubel (Azdrubel) Beginning in 1478 BC the Book of Jasher reads clearly- "And Anibal continued the war for eighteen years with the children of Chittim, and Anibal dwelt in the land of Chittim and encamped there for a long time." In the 196th year of the Israelites entering Egypt in 1657 BC, Pharaoh Thutmose III died in agony and shame after a bone-breaking chariot accident that terminated ten years of leprosy and boils that afflicted him. Thutmose III had lived 115 years (1380 months being 138x10), a lifespan not uncommon at that time. Moses would live to 120 years. In ~~1381~~ this year Moses was 66 years old (792 months). This death came 72 years after 1533 BC when all of Egypt wondered at the sight of a strange comet. Thutmose III's son succeeds him, the famous ~~Rameses~~ Ramesis, who would reign for 14 years before drowning in the Red Sea chasing the Israelites in 1447 BC. This was the 196th year of Israel's presence in Egypt.

1460 BC (2435 AM): 3565 Before Armageddon/ 3779 Anunnaki Chronology/ 2849 Phoenix Chronology/ 2579 Orbital Chronology/ 1355 Anno Pyramid/ 779 After Flood/ 439 After Babel This was a bad year for the people descended ~~from~~ Ham. Ham took the ~~throne~~ throne in 2012 BC after the Flood, exactly 552 years before this 1460 BC date, the Phoenix Cycle a duration that ends with cataclysm, destructions and ruinations. After 18 years the

Libyo-Latin War ends after the Chittim counterattack Libya and Anibal, unable to conquer them in Italia, returned to fight on his own soil. The whole campaign was a loss of wealth and men. The Libyans were a Hamitic people. Another branch of ~~the~~ Hamitic ~~is~~ line were the Kushites who are persuaded in this year by Queen Adoniah to send Moses away because he was not like them and he would not lay with her to produce an heir. Her son by the former king, Kikianus was old enough to reign over Kush and he was the same race they were. (1) Moses left with many presents and travelled to Midian but the Midianites mistook him for an escaped prisoner and imprisoned him, where he would stay for ten years. Moses was in fact left in a cave for dead but a woman named Zipporah saved him by feeding him secretly. (2) Had Moses stayed in Kush he would have begun a memorable dynasty and his departure was their loss.

This is the most pivotal year in WORLD HISTORY, the year Bronze Age Egypt ~~collapsed~~ collapsed in a series of disasters, quakes and astronomical phenomena, the Israelites with foreigners among them fled into Saudi Arabia and Moses led the Israelites through the wilderness. Before we can review everything that occurred in this year we must first review these astonishing calendrics.

Rene Andrew Boulay, a historian employed formerly with the National Space Agency (NSA) as a cryptologist and reporter on intelligence activities, an antiquarian and chronologist, wrote- "Scholars agree that the key to establishing the time of events in biblical times hinges on fixing the time of the Exodus." His own calculations place the Exodus at 1447 BC. (1) The renowned researcher and author of Ages in Chaos named Immanuel Velikovsky wrote that- "...computations have been made which indicate 1447 as the year of the Exodus." (2) Biblical chronologist and author of Secrets in Time places the date of the Exodus exactly on 1447 BC, a researcher who used the Scriptures, the Book of Jasher, the Jubilees text and Assyrian Eponyms to arrive at this date. In Jones' research the year 1447 BC was also the year 2448 AM (Annus Mundi). In the old Jewish Seder Haddaroth the plagues on Egypt and exodus took place in the Hebrew year 2448. (3) Having no idea when the Exodus occurred the authors Patrick Geryl in ~~Gina~~ Gino Ratincx independently discovered that the Egyptian number for CATAclym was 2448. ~~(4)~~ (4) The sum of 2448 years is exactly a third of the entire Anunnaki Chronology from 5239 BC to 2106 AD when they are destroyed by the Chief Cornerstone. As found in Chronotecture: Lost Science of Prophetic Engineering the number 2448 is found prominently in the measurements of the Great Pyramid. Even chronologists long ago almost got the date right. Hevelius in Cometographia ~~XXXX~~ (1668 AD) wrote- "In the Year of the World [Annus Mundi] 2453 [he was 5 years ~~or~~ off) according to certain authorities, a comet was seen in Syria, Babylonian, India, in the sign Jo, in the form of a disk, at the very time when the Israelites were on their march from Egypt to the Promise Land...the Exodus of the Israelites is placed by Calvisius in the Year of the World 2453." (5)

The biblical method of dating the Exodus and Egyptian disasters results with the same 1447 BC (2448 AM) date. According to the Book of Exodus the Israelites escaped Egypt 430 years after their sojourn in Egypt began, beginning in 1877 BC when Abraham was told by God his descendants would be captive in ~~Egypt~~ Egypt. This was the institution of ~~the~~ the Abrahamic

Covenant. The Church father and historian Eusebius over 15 centuries ago in his own Chronicon wrote that the Exodus occurred 430 years after God and Abraham entered into a covenant. (6) We will review more amazing calendrics before we conclude our review of 1447 BC.

Egyptologists claim there is no evidence of the Exodus and 1447 BC disaster, however, the entire history of Egypt after this period denotes that these events did indeed occur. Further, the Egyptian Ipuwer text reads that plagues and darkness afflicted Egypt and was "...foretold to the ancestors." (7) Remember that it was prophesied that if the bones of Joseph were removed from the Tombs of the Kings then Egypt would be destroyed. Interestingly, ~~XXXXXXXXXXXXXXXXXXXX~~ we read that at the Exodus the Israelites took the bones of the patriarchs and ~~Joseph~~ Joseph out of the tombs to carry them into Canaan according to the Testament of Simeon. (8) The removal of the bones is mentioned in the Book of Jasher. In his Admonitions of a Sage, Ipuwer wrote that "...what the pyramid has hidden is now empty." ~~XX~~ Before the Israelites left they went inside the Great Pyramid and retrieved three artifacts from before the Flood, gold, incense and myrrh, objects that would serve as signs of the presence of God on earth in the future. Ipuwer wrote that the plagues struck Egypt, the sun covered in darkness, people covered in fear, blood was everywhere and whole cities were destroyed. (9) This is confirmed in 2 Esdras where we read that the WHOLE WORLD suffered an earthquake as heavenly omens "...troubled the men of the age." (10) Ipuwer also mentions that Crete was cut off in this year and he lamented the loss of spices, cedar and wares the Cretan merchants brought to Egypt.

The disaster was due to the near pass of the Ancient Earth-Killer Comet Group which passed close to Earth after 330 years below the ecliptic. Plagues break out all over Egypt and quite possibly the world, Tacitus writing that the horrible epidemic disfigured the body. (11) The Haggadoth text of the Jews reads that the 10th plague on Egypt was the worst, for the majority of all Egyptian ~~fatal~~ fatalities during this episode were during the 10th plague. (12) Velikovsky cites records that the Egyptian disaster caused by a comet and detailed by Roman historian Campester and the Egyptian Petosiris was a fact well attested by others. (13) The Chinese Mawangdui Silk Almanac tells of a great comet with TEN TAILS that Graham Phillips dates at approximately 1500 BC. (14) This would be the origin of the Ten Plagues motif, his dating only ~~13 years~~ 53 years off. Phillips relates that the ten tails literally filled the heavens. (15) Eusebius quoted a lost book of Artapanus, who in turn quoted an older source that claimed that the 10th plague on Egypt was accompanied by a major quake that felled many temples and structures. (16) In Exodus we find that Moses "...stretched forth his hand toward heaven; and there was thick darkness over the land of Egypt three days; they ~~sa~~ saw not one another, neither rose any from his place for three days." (17) Josephus in Antiquities wrote that the Egyptians could hardly breathe, their breath hindered by the thick air (volcanic ash or extraterrestrial dust) and they died miserably. (18)

The darkness and volcanic ash leads us to a well-proven fact of history. The Egyptian scribe Ipuwer mentioned the loss of Crete and this has been the conclusion of archeologists as well. Crete with its palatial city Knossos were destroyed by quakes, tidal waves and these were the result of the eruption of Santorini at ~~Thera~~ Thera, an eruption that also destroyed Mycenaea. At Thera colossal skulls once belonging to giants were found under ruined cyclopean masonry (19) and at Knossos was a gigantic bronze sword longer than any known sword in Europe, gold plated on the hilt and with a crystal faceted knob. (20) According to Aegean historian Chester Starr Knossos fell approximately 1450 BC (21), this estimate of course being only 3 years off. Concerning Knossos, H.G. Wells wrote, "But about 1400 BC disaster came perhaps very suddenly upon its prosperity. The palace of Minos was destroyed, and its ruins have never been rebuilt or inhabited from that day to this...nature alone may have destroyed Knossos, or the Greeks may have finished what the earthquake began." (22) Knossos was resplendent with realistic art, surprisingly modern women's apparel, hairstyles, advanced plumbing and sewage systems and drainage. Baïke

in Life of the Ancient East on page 392 wrote, "It took the European world more than 3000 years to regain the sanitary knowledge which was lost when the Minoan empire collapsed." (23) Mycenaea III begins, the civilization begun by the Anakim giants having been destroyed in 1687 BC with the fall of the Early Bronze Age, or Archaic Civilization, and the disaster in 1447 BC ruining Mycenaea (Argos) a second time. With Mycenaea III there was a shift in construction methods and pottery exhibits major Minoan influences (24) because the people of Knossus came ashore from the ruined islands. The Linear A script of Minoan Crete ceases and the survivors develop Linear B by adjusting it to other proto-greek scripts. Many of the megalithic cities and temples destroyed in 1687 BC and at the Phoenix cataclysm and rebuilt which are destroyed again in 1447 BC are abandoned for good, overtaken by the deserts, the jungles and coasts. 1447 BC is precisely 240 years of 360 days a year each, or 86,400 days after the 1687 BC cataclysm.

Concerning Europe, a particularly old tradition ~~xx~~ relates that Pharaoh in Egypt ordered his bricklaying slaves to leave the country when an epidemic threatened the people. Many people under Danaus (Tribe of Dan) sailed to Greece and Asia Minor while the majority followed Moses by land to Canaan. (25) Aeschylus in Suppliants wrote that ~~Danaus~~ the Danaoi came to Greece after being slaves in Egypt. The Danaoi were the people of the Divine Seed. (26) The Greek history of Cecrops begins the traditional history of Athens. Cecrops came to the city that would later be called Athens in Greece from Argos, ~~xxxx~~ but it was known that he had earlier come from Egypt. When he arrived at Athens the city was suffering famine. The Athenian Acropolis then guarded a sacred olive tree, the symbol of Abrahamic origin. In the ruinous destruction of Egypt there were many peoples escaping Africa and ancient Greek traditions hold that at this time in early Athens, Thebes and Argos appeared people fleeing Egypt. The history of the tribe of Dan, ancient Israelite mariners, is a history of the early Greeks. The legends of Danaus and his fifty daughters sailing from Egypt to Argos is the memory of a migration of people of Israelite origin who became the Danaan of the Peloponessus and Asia Minor. The Israelite migrations to ancient ~~Greece~~ Greekdom and the Aegean will be disclosed in this research.

When the Israelites departed Egypt they took a census and found that they had 603,550 men of war aged 20 and older, not counting the tribe of Levi. (27) Biblical critics have disbelieved this basing their calculations by modern birthrate statistits. But today very few families have the ~~xxxx~~ children our predecessors did. In antiquity it was the honor of a woman to produce as many children as she could and men sought to increase their houses by having many children. The institution of concubines was for the purpose in antiquity of increasing one's house. But even ignoring the fact that historic records indicate that many women had as many as 20 children in a lifetime, we will stay with the lowest possible statistics. What is found is surprising. The Israelites entered Egypt in 1657 BC and Scriptures reads that they entered as a family of 70. But this 70 included Jacob, his sons (12 men) and their wives and concubines. The Exodus occurred 210 years (70x3) later. Here are the statistics for just 30 women having 3 girls in a 20 year period:

20 yrs. is 90 girls	120 yrs. is 21,870 girls
40 yrs. is 270 girls	140 yrs. is 65,610 girls
60 yrs. is 810 girls	160 yrs. is 196,830 girls
80 yrs. is 2430 girls	180 yrs. is 590,490 girls
100 yrs. is 7290 girls	200x 200 yrs. is 1,771,470 girls
	210 yrs. is 2,657,205 girls (x1.5)

This 2,657,205 are only females. Double this and we have an Israelite population of 5,314,410. With half this population dead by the year 1447 BC we still have the same 2,657,205. These statistics multiply only after 20 year intervals, therefore Israel could easily have been 5 million people strong at the Exodus with 603,550 men of war.

The Israelites passed over the dry bed of the Red Sea led by Moses and we have monumental evidence from ~~Egypt~~ Egypt that this occurred. A black granite monument at El-Arish relates

birth of Isaac. The Law was given to the Israelites 360 years after the Abrahamic Covenant was confirmed in 1807 BC.

The Israelites send spies into the land of Canaan. Joshua and Caleb are faithful and know that the Israelites can overcome the occupants of the land and they are not scared of the great giants, the anakim. The ten other spies report woe and messages of futility to Moses and the whole nation is cursed to wander for 40 years. Thirty-eight of these years are already over. The Anakim were the ~~new~~ descendants of Anak who was the son of Arba, who was the son of Noah and Naamah after the Flood. These people were originally noble and faithful who were allies to Abraham when he rescued Lot from the forces of Chedorlaomer after the plunder of Sodom and Gomorrah in 1872 BC. By this time the Anakim had thoroughly assimilated with the local Canaanites and were now the enemies of the descendants of Abraham. Fearing the giants the Israelites had been cursed.

King Latinus of Chittim died in Italia after reigning for 45 years, dated by the Jasher record at 14 years after the Exodus (1) He is succeeded by King Abianus. This year is 204 years ~~before~~ before the Fall of Troy in 1229 BC, or 2448 months. The later Trojan people would migrate to Italy and build Rome in 753 BC, which was 680 years after this date, or 244,800 days after 1433 BC. This year was the 414th year since the birth of Isaac in 1847 BC.

In the Book of Jasher we read- "And in the thirty-sixth year of the children of Israel's departure from Egypt, the Lord smote the heart of Sihon, king of the Amorites, and waged war, and went forth to fight with the children of Moab." (1) King Sihon was an Amorite giant, a Rephaim of Bashan, anciently referred to as a Land of Giants. Sihon attacked Moab at the instigation of Balaam the seer of Chaldea who had fled Egypt after the Exodus. Balaam fled Italia 123 years earlier at the death of Esau's grandson Zepho in 1534 BC. Balaam's career was illustrious in antiquity, from Chaldea, to Libya, Italia, Egypt and Bashan. Moabites are defeated by the Amorites under Sihon and refuse Israel passage through the wilderness. This in turn enraged the Israelites and Moses leads them against the land of Bashan. The giant king Og and Sihon are killed and many of the Rephaim and Anakim giants are slain with many Amorites. The Israelites take sixty cities of Argob. Also in this exact year planet Phoenix passes into the inner solar system completing its 138 year orbit on its way back out to the Kuiper Belt at the far edge of the solar system. At this time debris breaks away from the surface of Phoenix to become the Joshua Comet Group.

Amenhotep III (who later becomes Thutmose IV) has erected the Temple of Luxor in Upper Egypt, which displays representations of the Virgin giving birth to the Son. In the first scene of this prophetic textual episode, Thoth, Scribe of the Gods, announces the birth of the Son of the Virgin. (2) This temple was ~~xxx~~ finished 1080 years before Alexander the Great ordered it to be rebuilt (it was ruined) in 331 BC. In this year Amenhotep III becomes Akenamen, switching his religious allegiance, beginning a 33 year reign to the end of 1379 BC. Later he will again change his name to Akhenaten, married to the beautiful Nefertiti.

Moses died at age 120. (1) Joshua, one of the former spies in 1445 BC that surveyed Canaan is elected the leader by Moses. Joshua (Yeshua: Savior) is the older Hebrew for the Greek name Jesus. Joshua leads the Israelites in the Conquest of Canaan to enforce the Law of the Lots implemented shortly after the Flood when the sons of Shem won the regions the Canaanites occupied later. Even the patriarch Ham warned the Canaanites against occupying a land allotted to others. The Israelites pass over the Jordan river as a miraculous phenomenon impedes its flow. (2) The Canaanites are caught by surprise and Jericho is surrounded, its walls felled in another miraculous event (perhaps a quake). The Amorite garrison city of Ai is then taken. Archeological record demonstrates that both Jericho and Ai were deserted from the beginning of the 15th century BC until the 11th century BC. (3) The kings of Canaan amass all their armies and they outnumber the Israelites by many. A countless multitude of the ~~xxx~~ enemy meet them in the field of battle.

At this instant a gigantic celestial body approached earth. Earth remains travelling around the sun but its rotation is stopped in a gravitational gridlock with another huge unknown body of the Joshua Comet Group, an object much larger than any comet. Meteorites fall from the sky and rain upon the Canaanites effecting a mass slaughter. As the enemy is routed the Israelites believe they do not have enough daylight remaining to clear the land of living enemies but the sun remains fixed in the sky for several more hours creating a day over well over 24 hours. The prophet Habakkuk described the event of the moon and sun stopping in the sky as God shooting arrows at the Earth (meteorites) when appeared in the ~~glittering~~ sky "...Thy glittering spear." (4)

The ancient Peruvian empire according to the historian Montesinos recorded that the dawn did not rise, that sunrise was delayed by 20 hours. This occurred in ~~5th~~ the 3rd year of the 15th king of Cuzco, the megalithic city in the Andes the ~~8~~ survivors of Tiahuanacu built after the 1687 BC global destruction of the Archaic Civilization, this king named Titu Yupanqui Pachacuti II. (5) Amazingly, Sitchin, working only with approximates, was 13 years off from the actual date of 1407 BC using the ~~Rmx~~ Peruvian chronologies. This history is made more believable because of the other Peruvian traditions that the people of Cuzco were from Tiahuanacu, which was destroyed 280 years earlier covering 15 regnal descents. This means that the 15 kings reigned on average 18.6 years each, a very believable chronology. In When the Sun Darkens the 1407 BC astronomical near-collision is addressed in more depth with citations of many ancient texts and traditions concerning the sun and moon standing still.

In the biblical book of Joshua and Numbers we learn that the surviving Anakim and Rephaim giants fled Canaan and the might of Israel into the land of Philistia. This will prove historically interesting, as the last wave of giants to assault the Israelites centuries later were from among the Philistines. Namely Goliath and his sons. Other giants take to ships and escape to some Aegean isles, to Mycenaea among the descendants of the Anakim and as far as ancient Albion, known better as the ~~British~~ British Isles. In Albion they are called the Fomorions and Firbolgs. Other giant remain in their strongholds in the Valley of Rephaim (of the Giants) which is a territory allotted to the tribe of Dan. But the Danites refuse to make war with them despite efforts of assistance from other tribes. Many Danites built ships and migrated into the Aegean and ~~intermarried~~ intermarried among the Achaeans as others sailed to Crete and Mycenaean-controlled Greece. Dan became a popular seafaring race, as Scripture laments- "Why does Dan remain in ships?" (6) The Danites would become the Danaans of the Peloponnese and the Tuatha de Danaan of ~~ancient~~ ancient Ireland who finally defeat the giants. Other Danites took ships to the island of Cyprus which they renamed Ia-Dan (Isle of Dan). (7) This reflects the passage in the Book of Psalms- "they call their lands after their own names." (8) The Conquest of Canaan and their end nationally was precisely 828 years (2 Cursed Earth periods of 414 years) ~~after~~ after Canaan and Ham were cursed by ~~N~~ Noah for Ham's violating his wife Naamah in 22335 BC. Arabic traditions maintain that ever since the sun stilled in Joshua's day so they could slay the giants in Canaan, the regulation of the stars has been confused. (9) It was at this time that the pole shifted to Polaris from where it was formerly pointed at Arktos. Arktos was the Great Bear, the Big Dipper constellation and Polaris is in the Little Bear.

Moses instructed that the lot of inherited lands belonging to Levi be given over to the tribe of Manasseh, the son of Joseph, adopted into Israel. Joshua obeyed this dictate, because the Levites were the priestly tribe who lived spread out among the tribes. The other half of Joseph was the tribe of Ephraim also had its allotted territory. Ephraim would be called Joseph many times in the prophetic ~~texts~~ texts. (10) This is why the rosters of the tribes later in Scripture mention the tribes as separate, as Manasseh and Joseph with Ephraim mentioned hardly at all.

This was the year 930 (792+138) since the birth of Shem before the Flood in 2337 BC and 540 years (half of 1080) since Abraham's birth in 1947 BC. It was 400 years after the Abrahamic Covenant was confirmed in 1807 BC. As this year of 1407 BC was 2488 ~~Annus~~ Annus Mundi, or 1244+1244 years, we begin the Year of Israel Calendar. Israel has joined the nations of the world, no longer wandering, and the number 1244 will resurface EVERYWHERE in the unfolding history of the Israelites and their descendants. The Seal of Israel was the Great Pyramid in Egypt, finished in 2815 BC (1080 AM), or 1408 years before this 1407 BC date, which counts 1408 years to the 1st year of the Anno Domini ~~Year~~ (Year of the Lord) calendar. Further, the patriarch Jacob, renamed Israel, died at age 147, and Israel was born as a nation in 1407 BC.

By this time the tribe of Dan in large groups have set sail for the Aegean, Asia Minor and southern Greece (ancient Peloponnese).

In the 5th year after Israel passed over Jordan, the Chittim from Italia crossed over the Mediterranean (a sail of about 20 days straight course) and made war against the children of Esau in the 31st year of the reign of King Abianus of Chittim. This is dated in two ways in the Jasher text, both arriving at this date. (1) The Edomites faught against them with a large army but lost to the Chittim, and the king of Edom, Hadad, was slain in his 48th year of rule in Seir. (2) "And the children of Chittim ruled over Edom, and Edom came under the hand of the children of Chittim and became ONE KINGDOM from that day." (3) It was 178 years earlier when the grandson of Esau, Zepho, became a hero in Italia in 1580 BC. In 1555 BC, 153 years earlier, many people kin to Esau from Edom took up residence in Italia with Zepho. The chronicles in the Book of Jasher pay particular attention to the nations of ancient Italy, the Chittim, the ancestors of the Romans as acknowledged by the Jasher copyists- "And the children of Chittim are the Romim who dwell in the valley of canopia by the river Tibreu (Tiber)." (4) Though Esau had turned evil and an enemy of the Israelites, he too was covered by the promises God gave his fathar Isaac and Abraham...that his seed would produce mighty nations. ~~The~~ Through the Edomite assimilation into the Chittim the seed of Esau would propser through Israel's greatest enemy: Rome. It is not without coincidence that the ruins at Seir today, called Petra, where the seat of the Edomites had been, are Roman. This ancestral enmity between Israel and Rome will continue throughout history and manifest later in the antipathy between Christian Europe and the Roman Catholic Church.

King ~~Abianus~~ Abianus of Italia (Chittim) died in his 38th year of reign and is succeeded by Latinus II who would reign 50 years until 1345 BC. (1)

By this time Akenamen has changed his name and religious allegiance, to Akenaten, venerating the sun disk as the expression of the Deity. Prior to this he was known as Amenhotep IV, a name venerating the eldest of the Egyptian gods, Amen. His beautiful wife was Queen Nefertiti. In this year Akenaten moves to his new capitol city, Amarna between Uper and lower Egypt, having crippled the ancient ~~priesthoods~~ priesthods and restructured Egypt's administration. He would reside there until his death by poisoning in 1379 BC.

Archeologists excavated a library of ancienr Canaanite texts known todat as the ~~Amarna~~ Amarna Documents, please from Urusalim (pre-Israelite Jerusalem) and other Canaanite cities that were addressed to Pharaon Amenophis IV (2), another variant of Amenhotep IV, who had renamed himself Akenaten. (3) The Amarna tablets indicate that the Saka and the Apiru were invading and these Canaanite kings appealed to Egypt for assistance. (4) The Apiru were the Hebrews, a racial epithet, but the Saka was a dynastic description of the Israelites used by many nations in antiquity. The prophet Amos wrote that Israel would be known by the name of Isaac (5) and the Assyrians and Phoenics both referred to the Israelites as Beth-Sak, or Bit-Sak, or House of Isaac. (6) These will hold true for many more centuries. The hundreds od requests for Egyptian military assistance were met with silence as Moses first and then Joshua led the Israelites in the Conquest of Canaan. An example:

"Message of Yapahu, ruler of Gezer, your servant...May the king, my lord, the sun from the sky, take thought for his land. Since the Apiru (Habiri: Hebrews) are stronger than we, may the king, my lord, give me his help, and may the king, my lord, get me away from the Apiru lest the Apiru destroy us." (7) The help never came because Egypt was nation-building, having been destroyed utterly 52 years earlier during the Ten Plagues in 1447 BC. Priorly the Egyptians ruled over Canaan and the Canaanite kings when endangered by the Israelites pretended that Pharaoh was still ~~xxxx~~ ruler over their cities though there had not been an Egyptian presence in decades. With the Hittites pressing from the south, the Israelites from the east and northeast, the Canaanites of the southern cities wanted to be back under Egyptian authority.

Scholars have perplexed over the parallelism between Psalm 104 and the Hymn of Aten of Akenaten in Egypt. (8) The Psalms are largely attributed to David. There is no mystery. The Israelites worshipped One God and they obtained this faith from their patriarchs, who received it from Abraham, Isaac and Jacob. The Egyptians had obtained their faith from Abraham between 1837-1825 BC when he translated the Giza texts. There are hundreds of biblical passages mirrored in Egyptian and other ancient religious writings. The similarities merely denote common origin. The modes of expression differed. At this time Egypt was in religious chaos. The Ten Plagues and Exodus event was not only traumatizing but caused the Egyptians to question their gods. The temple priesthods began to vie with one another for the affection of the people, cults venerating Amen, the eldest known as the Hidden One, others elevating Thoth. But Pharaoh chose a monotheistic view and became ~~Akento~~ Akenaten, placing his capitol between the warring factions of Lower and Upper Egypt. His move was popular with the people but he became an enemy of the cults. A new nationalist religion was taking root that sought answers from Egypt's own past and the veneration of historic personages to the status of gods. This was the Osirian Cult of Isis and Osiris. This year was 502 years after Osiris' first regnal year as king of Egypt in 1897 BC, paralleling the 52nd year from the Exodus from Egypt.
