

“And it does almost everything that a standard office machine can do!”

“Look!... it really is the most portable typewriter in the World!”

Over three quarters of a million of this design have been sold!

The EMPIRE Aristocrat is a minor triumph of precision engineering and ingenuity of design. It weighs only 8½ lbs. and stands no higher than an ordinary match box. Yet it gives a standard keyboard, a writing line of 9½ inches (92 Pica and 115 Elite characters) and all the mechanical features necessary to give a performance almost equal to that of a full size office machine.

The touch of the EMPIRE is light and the response of the keys is particularly pleasing to the experienced typist. The frame is mounted on neat rubber suction pads so that although it is so small and compact, it cannot jump or move even on a polished surface.

The EMPIRE Aristocrat is now available fitted with either Pica or Elite styles of type. The neat top copies in either style are clean-cut and attractive, while six clear carbon copies are easily obtainable. All operating features are visible and accessible from the front of the machine.

Considered to be ten years ahead of its time in design the EMPIRE Aristocrat is without doubt the most compact portable typewriter in the world. It is backed by nearly 50 years' manufacturing experience. And at this moment over 750,000 machines of this unique design are in daily service all over the world.

EMPIRE *Aristocrat*

THE MOST PORTABLE TYPEWRITER IN THE WORLD

All these practical typewriter features

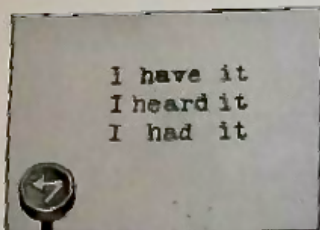

The neatly designed ribbon covers keep the ribbon free from dust, and add to the appearance of the machine.

The line space lever is brought into operation by the touch of a button. When not in use it folds neatly at the side of the carriage.

The carriage will take paper up to 9½" wide, and has a writing line of 92 Pica and 115 Elite characters.

The back space key is a distinctive red and is invaluable for corrections and additions.

When it is necessary to re-insert the paper, the exact writing position is easily regained by the use of the line guide.

Vertical and horizontal lines can be drawn by inserting the point of a pencil in the hole provided in the card grip, and moving the carriage.

with this compactness and portability . . .

The EMPIRE Aristocrat in its case can be put away in a shallow drawer.

It can be carried in a small dressing or attache case.

The neat handle slides back flush with the case for easy storage or packing. Case locks automatically.

It will slip into an ordinary brief case for a journey by plane, car or train.

STANDS NO HIGHER THAN A MATCHBOX

EMPIRE

Aristocrat

An EMPIRE Aristocrat allows you to transfer your thoughts to paper much more easily, more swiftly than hand writing; correspondence, notes or reports are neat and legible; carbon copies can be filed for future reference; and typewriting has a businesslike appearance—shows that you are methodical, efficient and businesslike yourself.

This personal typewriter is really portable; it can be carried easily from room to room; can be slipped into a brief case and carried on a journey!

Doctor, dentist, lawyer, student, journalist, salesman, shopkeeper, foreman, teacher—there is no occupation, trade or profession where an EMPIRE Aristocrat will not save time and energy. And in every case it will add status and dignity to your dealings with others; will help you socially and in your career.

In these days of form filling, a typewriter is a necessity if you are in business. In the home it will make that "after hours" correspondence a pleasure instead of a task.

The personal typewriter for everyone with writing to do
