

Delivery Routes

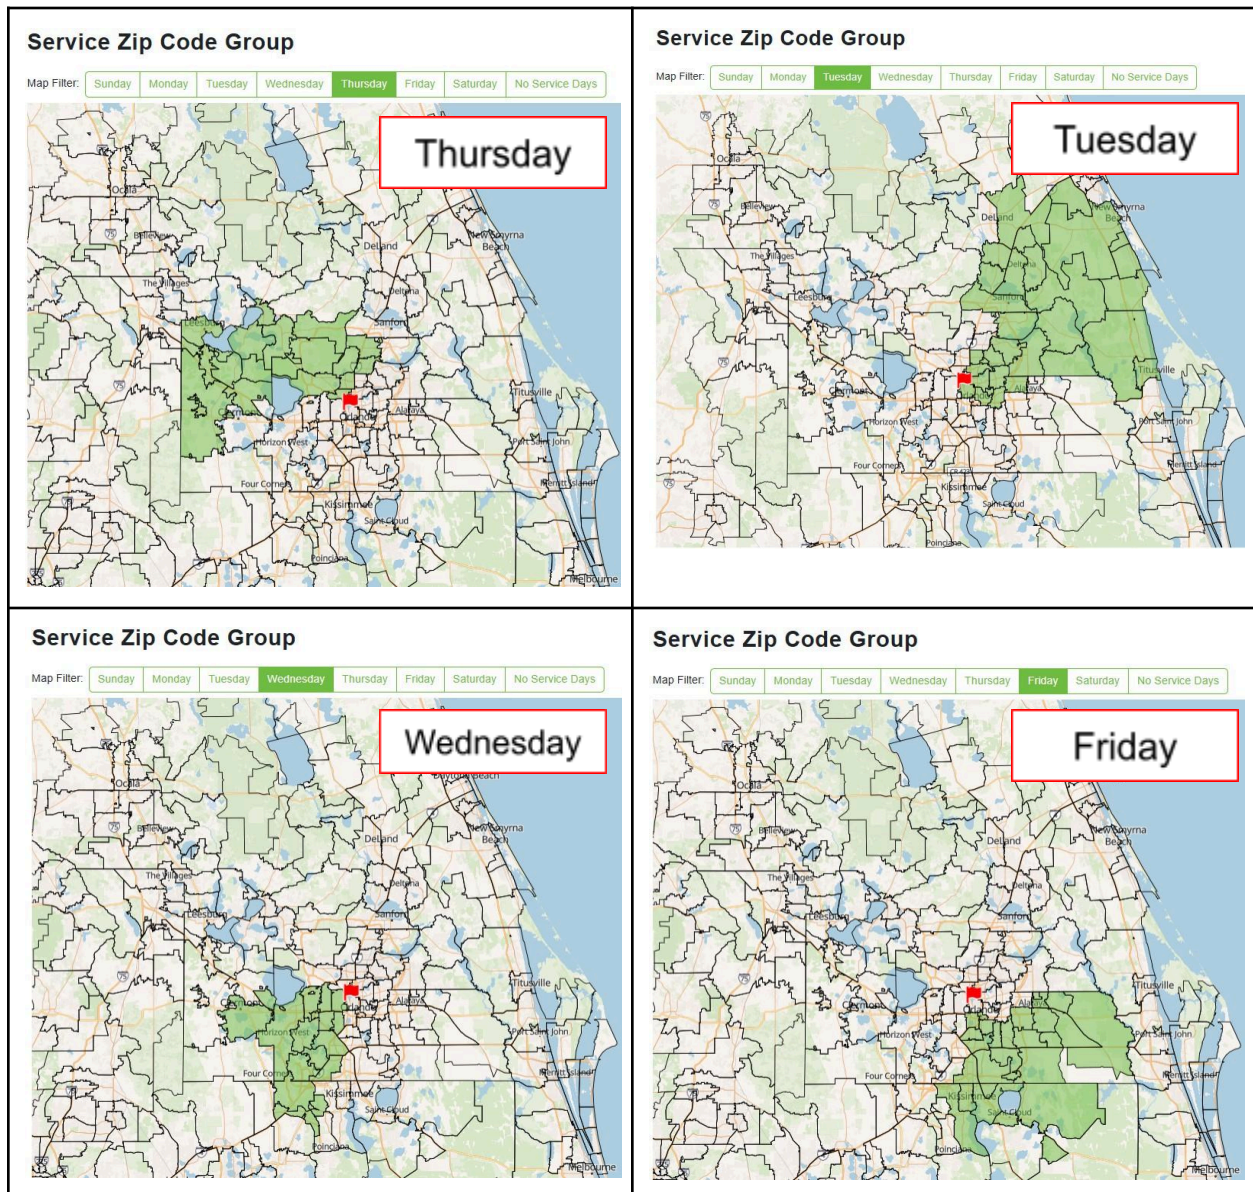

Revised: Oct 29, 2026

Subject: Scheduled Dispatch Route Days

Overview: Scheduled Routes offer customers a lower-price delivery alternative.

With dedicated delivery, dates and times are the priority, and port-to-port pricing is in effect.

With scheduled routes, multiple deliveries are efficiently routed for deliveries within the route, and return travel costs are omitted.

As with any procedure and program, some discretion is necessary to properly apply standards to specific situations. Staff should apply the standards typically and be ready to justify deviations.
