CRAFTSMANSHIP AT ITS FINEST

Site Superintendent – Industrial Piping & Mechanical

About the role: We're seeking a hands-on Site Superintendent to lead field execution for industrial piping and mechanical projects at sites across the country. This person runs the day-to-day on site: crews, safety, schedule, and coordination with the client.

Key responsibilities

- Lead and supervise pipefitters, welders, and labor crews on active projects
- Own daily planning, look-ahead schedules, and manpower assignments
- Run site meetings, coordinate with the customer, GC, and other trades
- Drive site safety: JSAs, toolbox talks, enforcement of safety rules and procedures
- Monitor productivity, track quantities and extra work, support change orders and billing
- Assist with constructability reviews and high-level input into estimates and proposals

Requirements

- 5–10+ years industrial construction experience with strong mechanical/piping background
- Prior experience as Superintendent, Construction Manager, or General Foreman
- Able to read and interpret mechanical drawings, P&IDs, isometrics, and layout drawings
- Proven history leading crews on plant expansions, shutdowns, turnarounds, or new builds
- Strong communication, documentation, and client-facing skills
- Willing and able to travel nationwide and work extended hours during outages or critical phases

What we offer

- Competitive compensation (salary or hourly depending on candidate)
- Per diem and travel support on qualifying projects
- Opportunity to shape how projects are delivered and mentor the next generation of craftsmen
