CSA

The Alessi Research Centre (CSA) was set up in 1990 for two purposes: to draw up theoretical papers on topics associated with objects (to be published as books), and to coordinate work with young designers. Up until that time Alessi had only worked with "major designers", and I felt a certain degree of responsibility towards young, upcoming designers. Alberto Alessi

Merdolino Toilet Brush

TOILET BRUSH IN THERMOPLASTIC RESIN.

CODE ASG04 PRICE \$70

Created as part of the F.F.F. (Family Follows Fiction) meta project, an operation in the early 1990s that aimed to explore the affective structure of shapes and objects, starting from the idea of reproducing the object creation process followed by children and primitive cultures. In Stefano Giovannoni's design, the toilet brush is transformed from an "off limits" object into a svelte pot holding a long and strangely living shrub. This product scandalized the orthodox world of design, and has been hugely successful over the years.

DESIGNER

STEFANO GIOVANNONI

Born in La Spezia in 1954, Stefano as an architect and designer was taught by Buñuel at Florence University. In the early 80's he founded the King-Kong Production Group along with Guido Venturini. A technical designer par excellence he has industrial design in his DNA and the capacity to understand public sentiment like no other designer mentioned in this catalogue. His projects began with the Girotondo (1989 designed with Guido Venturini) and the first transparent objects in plastic from the Family Follows Fiction series (1993). There is a huge number of his items in the Officina Alessi Alessi and A di Alessi catalogues.

TOILET BRUSH IN THERMOPLASTIC RESIN, PVD
COATING, GOLD.

CODE SG04 100 PRICE \$380

Part of a collection presented in 1992 that scandalized designers, this pretty lavatory brush was the champion of the redemption of its type, for the first time considered by the design world. Re-proposed in an all-golden form, it has become a paradoxical object par excellence: it contradicts current logic, surprising with its oddity, and becomes an art object dedicated to collectors.
