

# WESTERN CHOICE IV BRAND ALFALFA

- High forage yield potential
- Excellent forage quality potential
- Fast recovery after cutting
- High resistance to stem nematodes
- Winterhardy and persistent
- Widely adapted

Western Choice IV Brand Alfalfa is a superior blend of proprietary alfalfa varieties designed for high forage yield and forage quality potential, fast recovery after cutting, improved stand persistence and an excellent disease resistance package including high resistance to stem nematodes and resistance to Northern root knot nematodes. Other benefits include improved resistance to frost heaving and lower risk of mechanical injury to the plant. Western Choice IV Brand Alfalfa has the agronomic characteristics needed to perform over a wide range of environmental conditions and is adapted to all areas where fall dormancy 3, 4 and 5 varieties are planted.

## DISEASE / INSECT / NEMATODE RATINGS

Bacterial Wilt	Highly Resistant (HR)	5*
Fusarium Wilt	Highly Resistant (HR)	5*
Verticillium Wilt	Highly Resistant (HR)	5*
Anthracnose-Race 1	Highly Resistant (HR)	5*
Phytophthora Root Rot	Highly Resistant (HR)	5*
Aphanomyces-Race 1	Highly Resistant (HR)	5*
Wisconsin Disease Index	30 out of 30	
Pea Aphid	Resistant (R)	
Stem Nematode	Highly Resistant (HR)	
N. Root Knot Nematode	Resistant (R)	

\*Based on the Wisconsin Disease Rating Index.  
This is a 1 to 5 ranking with 5 being the best.

## ◆ Characteristics

Fall Dormancy ..... 4.0  
Winter Survival ..... 2.0  
Recovery After Cutting ..... Very Fast
