

TOGETHER, WE ARE STRONGER.

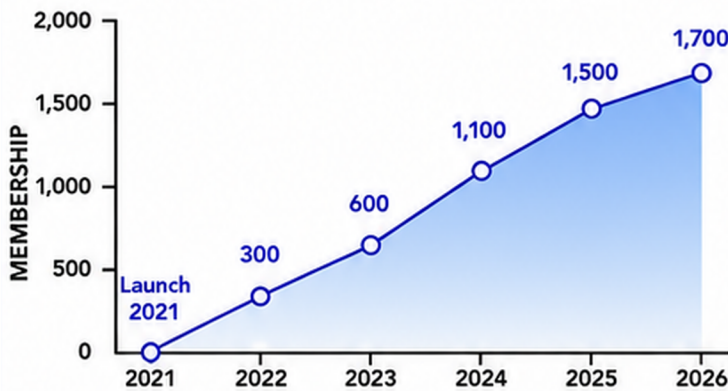

Strength to Fight. Courage to Care.

The PC Tribe is a patient-led, men-only brotherhood for men facing cancer. What began in 2021 as a small online community has grown into a trusted national network of 1,700 men navigating diagnosis, treatment, recurrence, survivorship, and life beyond cancer.

We create spaces where men can connect openly, learn from one another, and rediscover strength through shared experience.

WHAT WE DO

EXPERT ZOOMS

Regular conversations with physicians, researchers, and advocates to help men understand evolving treatment options and the realities of living with prostate cancer.

PEER BROTHERHOOD

Daily connection and support between men who understand the parts of prostate cancer that are hardest to explain— anxiety, relationships, recurrence, uncertainty, and recovery.

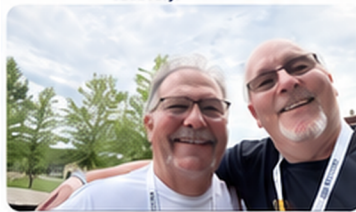

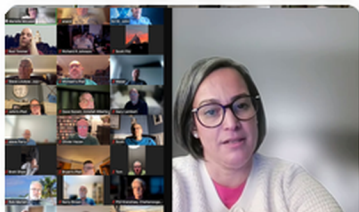

THE RENDEZVOUS

Our annual retreat where online connections become real-world brotherhood. Men gather face-to-face to share, learn, laugh, share experiences, and support one another beyond the screen.

COMMUNITY ENGAGEMENT

A safe, respectful space where men can ask questions, share resources, celebrate wins, and lift each other up—every step of the way.

WHY IT MATTERS

Prostate cancer changes more than the body. It affects identity, relationships, confidence, and the future.

Too many men face it in silence. Clinical care is essential—but it rarely addresses the full emotional reality.

The PC Tribe helps men find others who understand what is difficult to put into words.
