

Specifications

Dimensions: 72"L x 28"W x 42"H (33"H when handle bars are folded)

Weight: 80lbs

- Patented, hi torque, 48 volt, brushless, planetary gear motor delivers hi torque and low power consumption
- Produces 130NM of torque at 1650 watts • 1000 watt hour battery, with high quality Japanese or Korean 18650 cells, UN 38.3 certified, not Chinese cells.
- Motorcycle front suspension, rear suspension adjustable for compression and rebound.
- Folding handlebars and footplates simplify transport • Dual, independent, hydraulic disc brakes.
- Lightweight, large diameter aluminum tube frame.
- Large diameter front tire climbs cart curbs and obstacles.
- Cart geometry, plus low center of gravity, provides high speed stability, and incredible, sharp, low speed handling.
- Low PSI tires have low turf impact.
