

# Business Continuity & Resilience Services

Protecting Critical Operations. Strengthening Organizational Resilience.

---

**Operational Reality:** Disruptions from cyber incidents, supply chain failures, natural disasters, and infrastructure outages are increasing in frequency and impact. Organizations supporting critical infrastructure must align continuity planning with risk management and executive governance to maintain operational stability.

## Strategic Business Continuity Services

**Business Impact Analysis (BIA):** Identify critical functions and recovery priorities

**Continuity Planning:** Develop and maintain enterprise BCP frameworks

**Disaster Recovery Strategy:** IT recovery planning aligned to operational risk

**Tabletop Exercises:** Executive crisis simulations and response validation

**Third-Party Risk Integration:** Supplier and infrastructure dependency mapping

**Resilience Governance:** Executive reporting and board-level oversight

## Why DMB Consulting

DMB Consulting integrates cybersecurity, risk management, and operational continuity into a unified resilience strategy. We help organizations anticipate disruption, reduce downtime, and strengthen stakeholder confidence through practical, executive-level continuity leadership.
