

ANDRITZ Frautech disk separators

Highest efficiency for a top-quality end product

ANDRITZ Frautech disk separators for the chemical industry

ANDRITZ Frautech has been manufacturing separators since 1913. Thanks to our many years of experience and in-depth technical knowhow, we are able to solve any separation process requirements. Our separators are well known in the market for their reliability, outstanding performance, for the care that we dedicate to the materials of construction, and due to our great attention to detail.

For the chemical industry, we provide clarifiers, separators, and concentrators for liquid/liquid, liquid/solid and liquid/liquid/solid separation. These units are suitable for a wide range of applications, including:

- inorganic chemicals
- industrial fermentation processes
- the biotechnology industry
- the biofuel industry
- the petrochemical industry

Your benefits

- High separation efficiency
- Top-quality end products
- Easy to install, operate, and maintain
- Customized and skid-mounted solutions

Our solutions include solid bowl, self-cleaning, and nozzle separators for two-phase and three-phase separation. They can be supplied in ATEX-compliant design and manufactured with several different materials depending on the chemical and physical characteristics of the product to be processed.

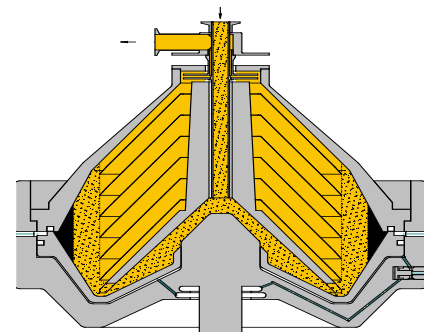

Process benefits

Efficiency in separation and filtration processes is reflected significantly in the quality of the end products. Our separators guarantee:

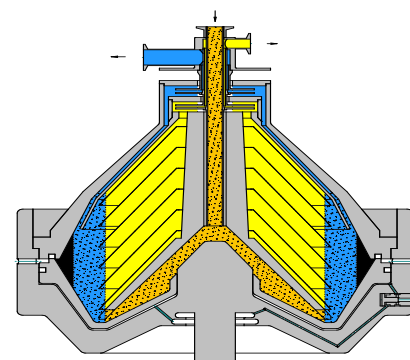

- removal of impurities from raw material prior to processing
- separation of impurities or by-products after chemical reaction
- product recovery from waste or side streams
- separation of contaminants from waste or side streams

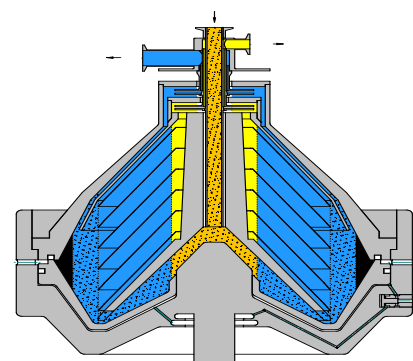

▲ ANDRITZ Frautech separators are available in different sizes and capacities.

▲ Clarifier bowl section

▲ Separator bowl section

▲ Concentrator bowl section
