

Flavo-C

Your Powerful Go-To for Vitamin C and Bioflavonoids!

Your body needs a full supply the whole vitamin C complex (not just ascorbic acid) to stay healthy. If your supply is low, your body is unable to protect itself against colds, flus, infections, or other foreign invaders. Symptoms commonly associated with vitamin C deficiency include gum disease, cellulite, arterial damage, scurvy, skin eruptions and other conditions, easily bruising, eye problems, spider and varicose veins, lowered immune defense, and increased capillary fragility.

Call on Flavo-C to Protect and Defend!
