

Immune Support

Fortify Your Defenses!

When your immune defenses are weakened by exposure to toxins, extreme temperatures, poor diet, bacteria, viruses, and environmental assaults, you're vulnerable to infection, disease, colds, and all kinds of nasty illnesses.

Immune Support Helps Your System Fight Back!

The Right Nutrient Combination Supports...

- Immune system function
- Inflammation and repair processes
- White blood cell response
- Healthy levels of T-lymphocyte cells
- Increases in antibodies
- Production of immune cells
- Bacterial, fungal and viral conditions
- Raised interferon levels
- Strength and stability of mucus membranes
- Skin cell protection
- Wound healing

For support, adults are recommended to take 4 tablets daily, or as directed by a healthcare professional.
