CORE COMPETENCIES

C. Slagter Construction, Inc. performs work throughout the State of Florida and the State of Georgia specializing in guardrails and bridges.

C. Slagter Construction was founded in 2005 to fill a void in the marketplace as a guardrail, cable rail, and decorative rail contractor. We are a Florida Corporation and as of February 2016 have received our Florida and Georgia Disadvantage Business Enterprise (DBE) Certification as a female-owned business. As subcontractors we have worked on and completed projects of all sizes, from small to multi-million dollar, and worked for owners including FDOT, FL Turnpike Authority, Florida counties, local municipalities, as well as private development and commercial contractors. We continue to grow, and have expanded our business beyond guardrail installation to include work on small and intermediate bridge rehabilitation.

DIFFERENTIATORS

We are also experienced with:

- ◆ HIGH TENSION CABLE RAIL
- ◆ CRASH CUSHIONS
- ◆ BRIDGE REHABILITATION
